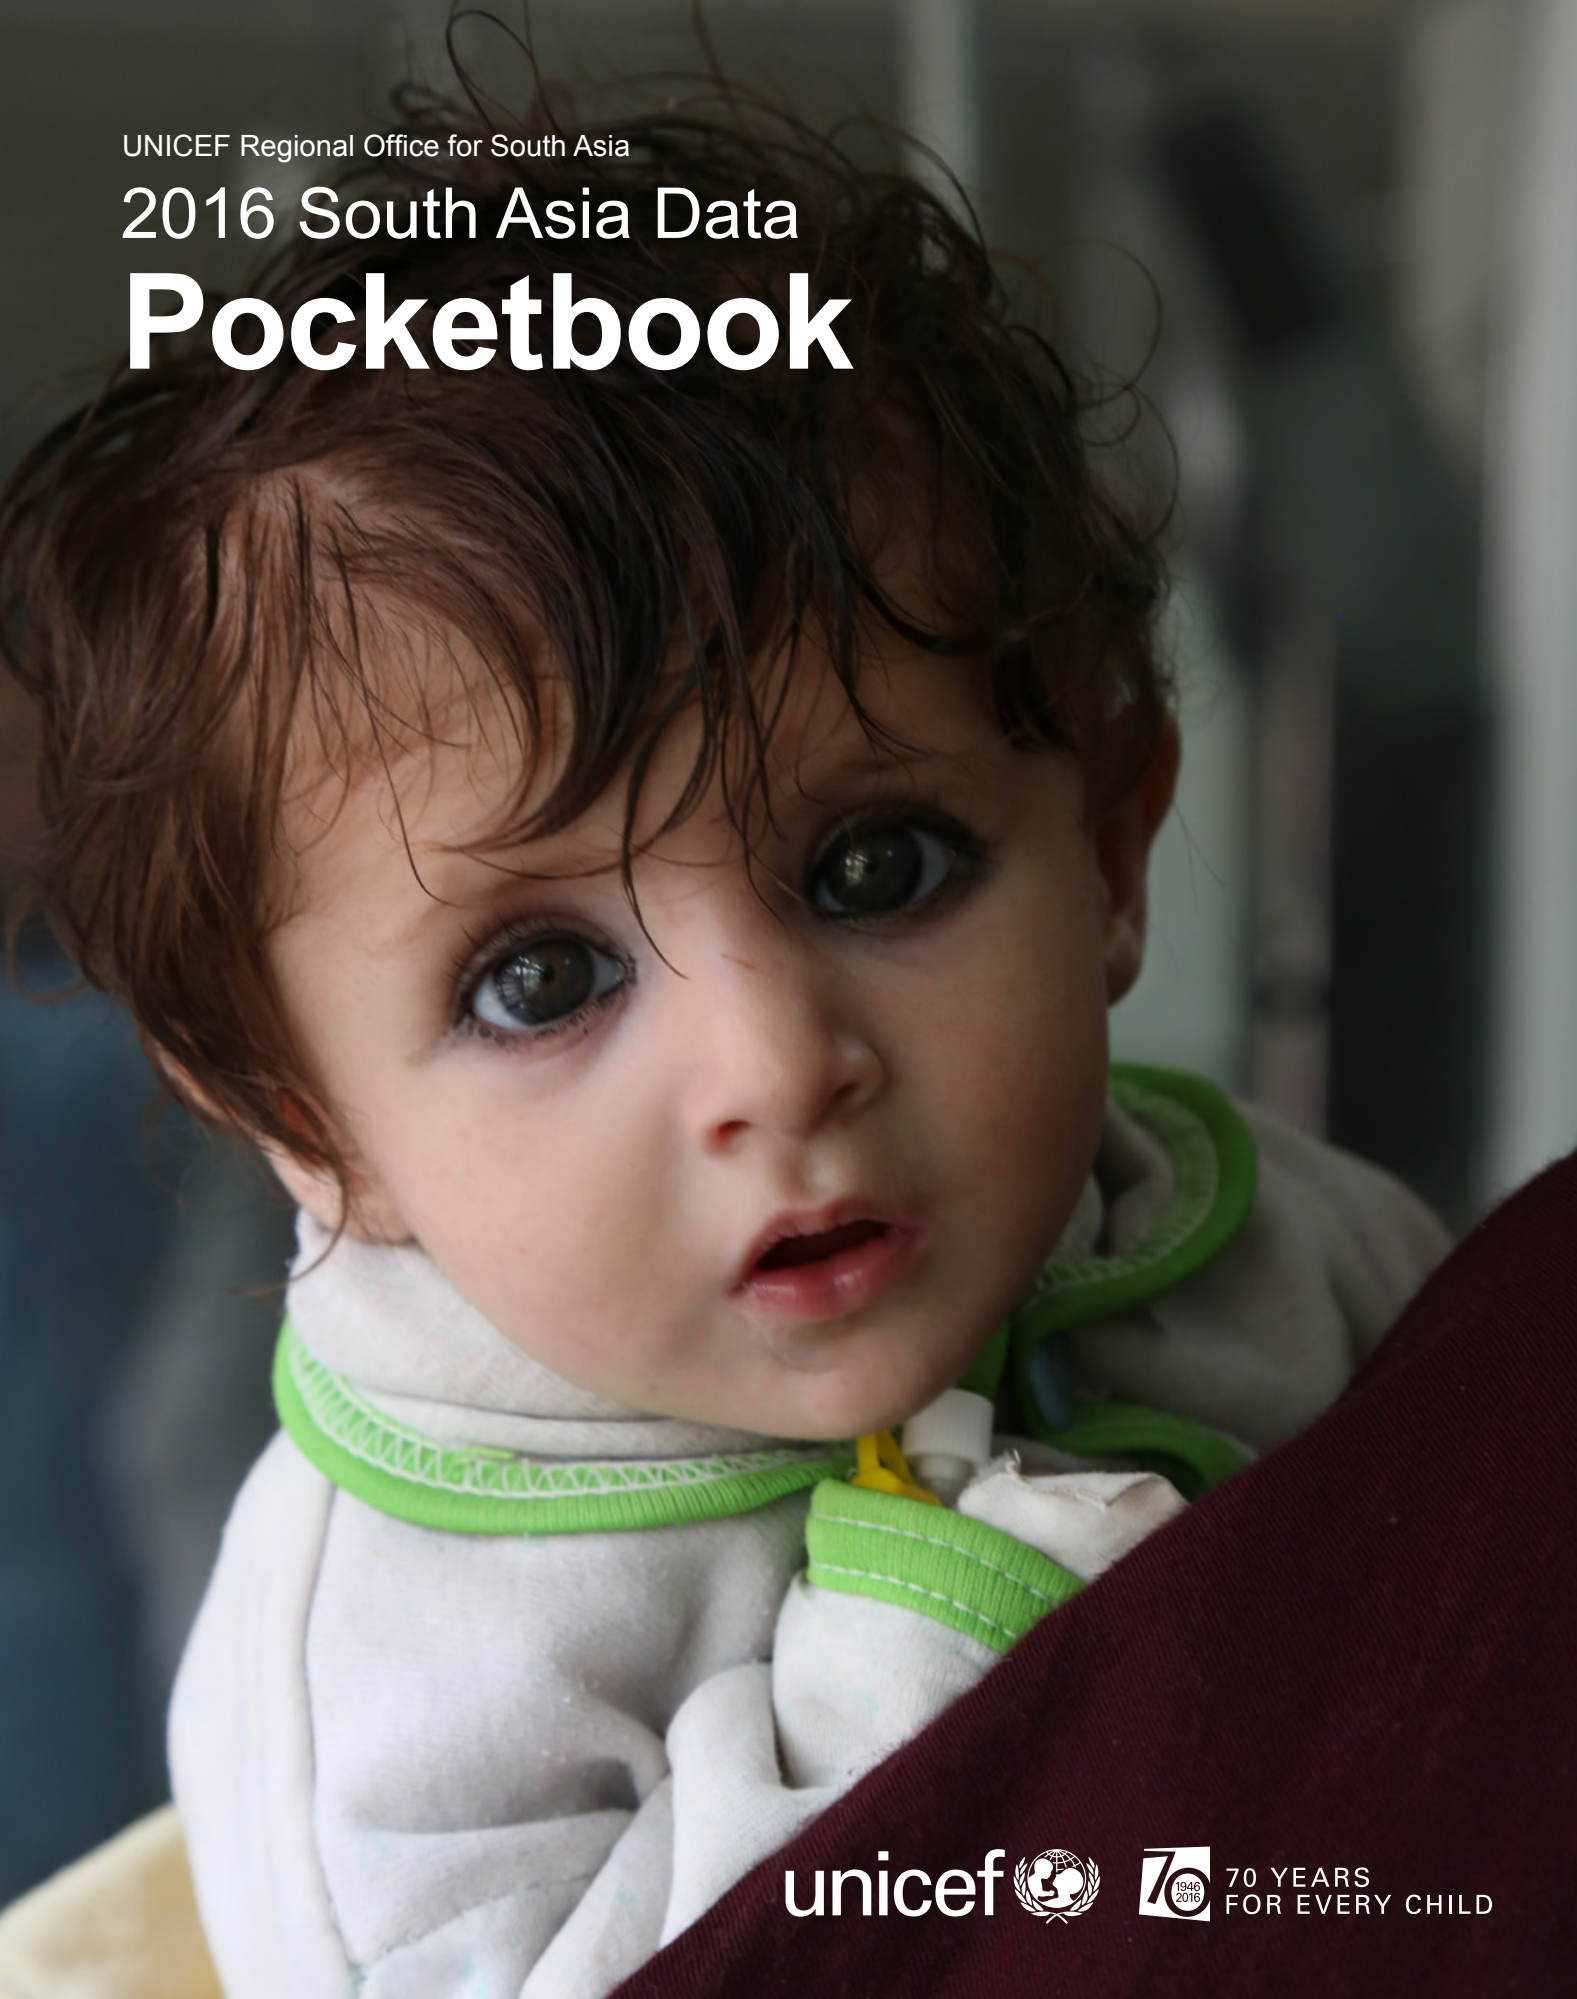
UNICEF Regional Office for South Asia

2016 South Asia Data Pocketbook



unicef

70 YEARS FOR EVERY CHILD

Cover Photo: © UNICEF ROSA/Roger Lemoyne/2015

Dear colleagues,

The 2016 South Asia Data Pocketbook includes updated data from The State of the World's Children 2016, Human Development Report 2015, Asian Development Outlook 2016, World Development Indicator database, latest MICS, DHS and other National surveys.

We hope you find it useful in your work.

With best wishes,

Programme & Planning section
UNICEF ROSA
Kathmandu, Nepal

UNICEF Regional Office for South Asia (ROSA)
Headline Results by 2017

Educate all girls and boys
12 million currently out-of-school children enjoy quality education

End child marriage
750,000 child marriages are averted

Stop stunting
12 million fewer children with stunted growth and development

Stop open defecation
120 million fewer individuals practice open defecation

Save newborns
300,000 additional newborn lives are saved

Eradicate polio
No new polio case

AFGHANISTAN

Population		
Total population, 2016 (thousands)[10]	29,157	
Population aged under 18, 2013-2014 (thousands, % of total population)[12]	15,146	52%
Population aged under 5, 2013-2014 (thousands, % of total population)[12]	4,811	17%
Population annual growth rate, 2013-2014 (%)[12]	2.03	
Life expectancy at birth (years), 2015[1]	61	
Total fertility rate, 2015[14]	5.3	

Poverty & Inequality	
Human Development Index (HDI), 2014 (rank/188 countries)[2]	171
Inequality-adjusted Human Development Index (IHDI), 2014 (rank/151 countries)[2]	131
Gender Inequality Index (GII), 2014 (rank/155 countries)[2]	152
Multidimensional Poverty Index (MPI), 2010-2011 (value)[2]	0.293
Gini coefficient of income inequality, 2005-2013[2]	27.8
Population below the national poverty line, 2013-2014 (%)[12]	39.1
Population below int'l income poverty line (PPP US$ 1.9/day), 2009-2013 (%)[1]	n.a.

Health	
Neo-natal mortality rate (deaths per 1,000 live births), 2015[14]	22
Infant mortality rate (deaths per 1,000 live births), 2015[14]	45
Under 5 mortality rate (deaths per 1,000 live births), 2015[14]	55

Maternal mortality ratio (deaths per 100,000 live births), 2015[43]	396
Skilled attendance at birth, 2015 (%)[14]	50
Children under 1 yr. immunized (BCG), 2015 (%)[14]	73.7
Children under 1 yr. immunized (DPT 3), 2015 (%)[14]	57.7
Children under 1 yr. immunized (Polio 3), 2015 (%)[14]	64.8
Children under 1 yr. immunized (Measles), 2015 (%)[14]	60.4
Number of new cases of wild poliovirus type 1 (WPV1), 2015[44]	20
Nutrition	
Underweight prevalence, moderate and severe, children under 5 yr., 2010-2015 (%)[1]	25
Stunting prevalence, moderate and severe, children under 5 yr., 2010-2015 (%)[1]	41
Vitamin A supplementation coverage, children 6-59 months, 2014 (%)[1*]	95
Households consuming iodized salt, 2013 (%)[13]	43.6
Low birthweight, 2009-2013 (%)[1]	n.a.
Exclusive breastfeeding <6 months, 2013 (%)[13]	58.4
Introduction to solid, semi-solid or soft foods, children 6-8 months, 2013 (%)[13]	41.3
WASH	
Population using improved drinking water sources, 2013-2014 (%)[12]	64.8
Population using improved sanitation facilities, 2013-2014 (%)[12]	39
Population practicing open defecation, 2015 (%)[42]	13
HIV and AIDS	
Adult HIV/AIDS prevalence rate (15-49 years), 2014 (%)[1]	<0.1

Education

Primary school net enrolment ratio, 2010-2014 (%, Male, Female)[1a]	M - n.a.	F - n.a.
Females as % of males, primary school, 2013-2014 (GER)[12]	71	
Primary completion rate as % of relevant age group[3]	n.a.	
Survival rate to last primary grade, 2013-2014 (%)[12]	84.2	
Secondary school net enrolment ratio, 2010-2014 (%, Male, Female)[1a]	M - 62	F - 35
Females as % of males, secondary school, 2013-2014 (GER)[12]	55	
Out-of-school children of primary school age, 2013 (number, both sexes)[45]	n.a.	
Out-of-school adolescents of lower secondary school age, 2014 (number, both sexes)[45]	852,184	
Youth literacy rate (15-24 years), 2015 (%)[45k]	58	
Adult literacy rate, 2015 (%)[45k]	38	

Child Protection & Emergency Situation

Birth registration, 2010-2011 (%)[11]	37.4	
Women aged 20-24 who were married/in union before age 18, 2013-2014 (%)[12]	33.8	
Legal age of marriage (years, Male, Female)[d]	M -18	F -16
Child labour, 2013-2014 (%)[12]	29.5	
Minimum age for work (years)[e]	15	
Minimum age for criminal responsibility (years)[4]	12	
Justification of wife beating, 2010-2015 (%, Male, Female)[1a]	M - n.a.	F - 90
Persons recognized as refugees, 2015[5]	257,553	
Internally displaced persons protected/assisted by UNHCR, 2015[5]	1,174,306	

MDG Performance[6]

Early achiever:	TB prevalence, Safe drinking water
On-track:	Underweight children, HIV prevalence, TB incidence, Forest cover, Protected area
Slow:	Country line poverty, Gender secondary, Under-5 mortality, Infant mortality, Maternal mortality, Skilled birth attendance, Antenatal care, Basic sanitation
Regressing:	Gender tertiary, CO_2 emissions per GDP

Economy

Least Developed Countries status[41]	Yes
World Trade Organization membership[7]	Yes
Total Gross Domestic Product (GDP), 2014 (US$ in millions)[9]	22,830
Annual growth rate of GDP, 2015 (%)[8]	1.5
GDP per capita, 2014 (US$)[9]	730
Annual growth rate of GDP per capita, 2015 (%)[8]	-0.4
Gross National Income per capita, PPP, 2015 (US$)[3]	1,990
Current account balance as a % of GDP, 2015[8]	4.5
Central Government revenues as a % of GDP, 2015[8]	29.2
Net Official Development Assistance (ODA) as % of GNI, 2014[3]	23.3
Net ODA per capita, 2014 (US$)[3]	152.5
Total remittances receipts, 2014 (US$ millions)[9]	636
Total workers' remittances receipts as % of GDP, 2014[9b]	2.79

Public Expenditure

Central Government expenditure as % of GDP, 2015[8]	28.6
Public spending (Education) as a % of GDP, 2009-2013[1a]	5
Public spending (Health) as a % of GDP, 2009-2013[1a]	2
Public spending (Military) as a % of GDP, 2009-2013[1a]	1

* All dates have been updated from UNOHCHR website- <http://tbinternet.ohchr.org/_layouts/TreatyBodyExternal/Countries.aspx>

Definition of the Indicators

Adult HIV/AIDS prevalence rate: Percentage of adults (aged 15-49) living with HIV as of 2009.

Adult literacy rate: Number of literate persons aged 15 and above, expressed as a percentage of the total population in that age group.

Birth registration: Percentage of children less than 5 years old who were registered at the moment of the survey. The numerator of this indicator includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Child labour: Percentage of children 5-14 years old involved in child labour at the moment of the survey. A child is considered to be involved in child labour under the following conditions: (a) children 5-11 years old who, during the reference week, did at least one hour of economic activity or at least 28 hours of household chores, or (b) children 12-14 years old who, during the reference week, did at least 14 hours of economic activity or at least 28 hours of household chores.

Child marriage: Percentage of women 20–24 years old who were first married or in union before they were 18 years old.

Current account balance: Sum of the balance of trade for merchandise, net trade in services and factor income, and net transfers.

Debt service (as a % of exports of goods & services): Total debt service payments of each economy, which comprise principal repayments (excluding on short-term debt) and interest payments on outstanding external debt, as a percentage of exports of goods and services.

Debt service (as % of GNI): Sum of principal repayments and interest actually paid in foreign currency, goods, or services on long-term debt, interest paid on short-term debt, and repayments (repurchases and charges) to the IMF.

Gender Inequality Index (GII): A composite measure reflecting inequality in achievements between women and men in three dimensions: reproductive health, empowerment and the labour market.

Gender Parity Index (GPI): Ratio of female to male values of a given indicator. It measures progress towards gender parity in education participation and/or learning opportunities available for women in relation to those available to men.

Gini coefficient of income inequality: Measure of the deviation of the distribution of income (or consumption) among individuals or households within a country from a perfectly equal distribution. A value of 0 represents absolute equality, a value of 100 absolute inequality.

Government revenue: All non-repayable receipts, both current and capital, plus grants.

Gross Domestic Product (GDP): Sum of value added by all resident producers plus any taxes (less subsidies) not included in the valuation of output. GDP per capita is GDP divided by midyear population. Growth is calculated from constant price GDP data in local currency.

Gross Enrolment Ratio (GER): Total enrolment in primary or secondary school, regardless of age, expressed as percentage of the official primary or secondary school aged population.

Gross National Income (GNI): Sum of value added by all resident producers, plus any product taxes (less subsidies) not included in the valuation of output, plus net receipts of primary income (compensation of employees and property income) from abroad. GNI per capita is GNI divided by midyear population.

Human Development Index (HDI): A composite index measuring average achievement in three basic dimensions of human development: a long and healthy life, knowledge and a decent standard of living.

Inequality-adjusted Human Development Index (IHDI): HDI value adjusted for inequalities in the three basic dimensions of human development.

Infant mortality rate: Probability of dying between birth and exactly 1 year of age, expressed per 1,000 live births.

Internationally displaced persons protection/assisted by UNHCR: Persons who are displaced within their country and to whom UNHCR extends protection and/or assistance.

Iodized salt consumption: Percentage of households consuming adequately iodized salt (15 parts per million or more).

Least Developed Country: Criteria for inclusion in the list of Least Developed Country status – population less than 75 million; per capita GNI less than US$750; Human Assets Index less than 55; Economic Vulnerability Index greater than 37. A country must satisfy all three criteria to be added to the list. To qualify for graduation, a country must meet the thresholds for two of the three criteria in two consecutive triennial reviews by the Committee for Development Policy.

Life expectancy at birth: Number of years newborn children would live if subject to the mortality risks prevailing for the cross section of population at the time of their birth.

Maternal mortality ratio: Number of deaths of women from pregnancy-related causes per 100,000 live births during the same time period.

Multidimensional Poverty Index (MPI): Share of the population that is multidimensionally poor, adjusted by the intensity of deprivations.

Neonatal mortality rate: Probability of dying during the first 28 completed days of life, expressed per 1,000 live births.

Official Development Assistance (ODA): Net ODA, consisting of disbursements of loans made on concessional terms (net of repayments of principal) and grants by official agencies of the members of the Development Assistance Committee (DAC), by multilateral institutions, and by non-DAC countries to promote economic development and welfare in countries and territories in the DAC list of ODA recipients. It includes loans with a grant element of at least 25 percent (calculated at a rate of discount of 10 percent). ODA per capita is calculated by dividing net ODA received by the midyear population estimate, and data are in current U.S. dollars.

Ozone Depleting Potential (ODP): It refers to the amount of ozone depletion caused by a substance. It is the ratio of the impact on ozone of a chemical substance compared to the impact of a similar mass of chlorofluorocarbons (CFCs)-11. The OPD of CFC-11 is defined to be 1. CFCs have ODPs that range from 0.6 to 1, while hydrochlorofluorocarbons (HCFCs) have ODPs that range from 0.001 to 0.52. The halons have ODPs of up to 10 while methyl bromide has an ODP of 0.6.

Percentage of population below international poverty line of US$1.9 per day: Percentage of population living on less than US$1.9 per day at 2011 prices, adjusted for purchasing power parity. The new poverty threshold reflects revisions to purchasing power parity exchange rates based on the results of the 2011 International Comparison Program. The revisions reveal that the cost of living is higher across the developing world than previously estimated.

Persons recognized as refugees: Individuals recognized under the 1951 UN Convention relating to the Status of Refugees and its 1967 Protocol; individuals recognized under the 1969 OAU Convention Governing the Specific Aspects of Refugees Problems in Africa; those recognized in accordance with the UNHCR Statute; individuals granted complementary forms of protection and those enjoying "temporary protection'. Also includes people in a refugee-like situation.

Population practicing open defecation: Percentage of population that do not have a toilet and therefore defecate in the open (bush, field, and other open places).

Population using improved drinking water sources: Percentage of the population using any of the following as their main drinking water source: drinking water supply piped into dwelling, plot, yard or neighbor's yard; public tap or standpipe; tube well or borehole; protected dug well; protected spring; rainwater; bottled water plus one of the previous sources as their secondary source.

Population using improved sanitation facilities: Percentage of the population using any of the following sanitation facilities, not shared with other households: flush

or pour-flush latrine connected to a piped sewerage system, septic tank or pit latrine; ventilated improved pit latrine; pit latrine with a slab; composting toilet.

Primary completion rate as % of relevant age group: Total number of students of any age in the last grade of primary school, minus the number of repeaters in that grade, divided by the number of children of official graduation age. The completion rate can exceed 100 percent if there are many overage students in the last grade of primary school.

Primary school net attendance ratio: Number of children attending primary or secondary school who are of official primary school age, expressed as a percentage of the total number of children of official primary school age.

Primary school net enrolment ratio: Number of children enrolled in primary or secondary school who are of official primary school age, expressed as a percentage of the total number of children of official primary school age.

Secondary school net attendance ratio: Number of children attending secondary or tertiary school who are of official secondary school age, expressed as a percentage of the total number of children of official secondary school age.

Secondary school net enrolment ratio: Number of children enrolled in secondary school who are of official secondary school age, expressed as a percentage of the total number of children of official secondary school age. Does not include secondary school- aged children enrolled in tertiary education owing to challenges in age reporting and recording at that level.

Skilled attendance at birth: Percentage of births attended by skilled health personnel (doctors, nurses or midwives).

Stunting (moderate and severe): Number of children under age 5 who fall below minus two standard deviations from median height for age of reference population.

Survival rate to the last grade of primary school: Percentage of children entering the first grade of primary school who eventually reach the last grade of primary school.

Total fertility rate: Number of children who would be born per woman if she lived to the end of her childbearing years and bore children at each age in accordance with prevailing age-specific fertility rates.

Under-five mortality rate: Probability of dying between birth and exactly 5 years of age, expressed per 1,000 live births.

Underweight (moderate and severe): Percentage of children aged 0–59 months who are below minus two standard deviations from median weight-for-age of the World Health Organization (WHO) Child Growth Standards.

Vitamin A supplementation (full coverage): Estimated percentage of children aged 6-59 months reached with two doses of vitamin A supplements.

Youth literacy rate: Number of literate persons aged 15-24, expressed as a percentage of the total population in that age group.

Notes

a Data refer to the most recent year available during the period specified

b GDP data source: UNCTAD secretariat calculations, based on UN DESA Statistics Division, National Accounts Main Aggregates Database

c Nationally observed literacy data are used

d **Afghanistan**: Civil law, article 70 and 71, 1977. Note; the father of a girl or competent court can 'consent' to the marriage of a girl who is 15 years in extenuating circumstances.
Bangladesh: Child Marriage Restraint Act, 1929. Currently under revision as Draft Child Marriage Control Act-2013.
Bhutan: Marriage Act, 1980 (amended in 1996)
India: Prohibition of Child Marriage Act, 2006
Maldives: Law on the protection of the Rights of the child, 1991 (amended in 2000)
Nepal: Civil Code, 1854 (amendment in Nepal Gazette Circular, Part 2, 01 October 2015). The legal age of marriage is 20 years for both male and female.
Pakistan: : Child Marriages Restraint Act, 1929. Female: 18yrs in Sindh and 16yrs for Federal and other Provinces.
Sri Lanka: Marriage Registration Act No. 18, 1995 (Amendment)

e **Afghanistan**: Labour Law, 2007, Article 13 (1)
Bangladesh: Labour Act, 2006
Bhutan: Labour and Employment Act, 2007
India: Child Labour (Prohibition and Regulation) Act, Amendment Bill, 2016
Maldives: Employment Act, 2008
Nepal: Child Labour (Prohibition and Regulation) Act, 2000
Pakistan: Employment of Children Act, 1991
Sri Lanka: Employment of Women, Young persons and Children Act No. 47, 1956 (amended in 1999)

f *Early achiever - Has already met the target; On track - Expected to hit the target by 2015; Slow - Expected to hit the target after 2015; Regressing - Slipping backwards or stagnating*

q For the two Optional Protocols, the initial report is required as a stand alone report 2 years after ratification. Thereafter, reports should be integrated into the regular CRC reports.

r Regional averages for underweight (moderate and severe) are estimated using statistical modeling of data from the UNICEF-WHO-World Bank Joint Global Nutrition Database, 2013 revision (completed September 2014).

u Full coverage with vitamin A supplements is reported as the lower percentage of 2 annual coverage points (i.e., lower point between semester 1 (January-June) and semester 2 (July-December) of 2013). Data are only presented for VAS priority countries; thus aggregates are only based on and representative of these priority countries.

x Data refers to years or periods other than those specified in the column heading, differ from the standard definition or refer to only part of a country. Such data are not included in the calculation of regional and global averages.

y Data refer to years or periods other than those specified in the column heading, differ from the standard definition or refer to only part of a country. Such data are included in the calculation of regional and global averages.

z **How to read the equity table:** The equity table in this pocketbook provide statistics for key health, education, and protection indicators, disaggregated across several demographic characteristics of a child's life (e.g.: male/female, urban/rural). The values in the "Disparity Gap" row represent the absolute percentage point difference between the best-performing and worst-performing groups for each demographic category. Disparity gaps range from 0-100; larger values reflect greater inequity while smaller values reflect less inequity. For child mortality rates, the value is the absolute difference in the number of deaths per 1,000 live births. For negative indicators (child undernutrition and mortality), disparity gaps are calculated in the opposite direction. Negative disparity gaps indicate that a generally deprived group performs better on a specific indicator than a generally advantaged group. **Note on data**: All data in the equity matrices come from the most recently published country-level DHS or MICS reports.
