

Thank you.

Let me introduce my self and you can learn lots of things from my life history

My name is Melsachew Asefa.. I learned at John F. Kennedy Elementary school. And I joined high school at Tikur Anbessa. I got 2.00 point in ESLCE or high school leaving exam. And I know that this point can get me to universities but according to the condition of Ethiopia, shortage of universities. And I can't join private college because I have no money for that.

I felt sad when I lost my result. But I had hope. The reason of why I lost my result is, when I joined grade 11, I loved a pretty girl and I could not study. I always taught about her. Because of this, I could not study very hard. So I felt. I don't know where she is now.

Even if I had lost my results I have many hopes. I write poems, literatures, dramas and other things. Now let me tell you about my family life.

We are poor; I can say it, we are poor. My mother makes money through making Injera when there is a ceremony at some ones place. My sister is a grade 9 student. I live with my step father. He always say to me "why are you sitting, Why don't you try to find a job." But think how I can get a job, if there is no opporitiounty to get one?

You need to work hard on your education. If you are not a scholar, life is hard. So you have to learn and learn. As I believe, poverty is not only lucks of basic necessity. It is also luck of moral; luck of hope is poverty too. You need to be rich with hope. First work hard, if you can't achieve one thing , try another. Even only hope does not give you a fortune. But you also need to work hard to get your hope real.

The government and the private sectors have to organize and teach young people and also young people need to take every job opportunity which we get. Also the government need to talk and ask what we young people feel. We are not only being job seekers, we also need to be creative.

Thank you
