

## Regional Network of Child and Adolescent Communicators - LACVOX

### LACVOX MANIFEST

#### VISION

We are a network full of life, powerful and united, we are structured to exchange experiences between countries and engage as a team which shares information and communication with the strength of a single voice, with the power of friendship. Together we will make LACVOX strong.

#### MISSION

We want to perform as one voice that will help change people's lives, the way adults think about children and adolescents; this is what we want to design campaigns for. We want to excel with a positive image and we want to have our own niche where our voice is heard. We want all children and adolescents to be informed and know our experiences. We want to do this through one voice.
