

**MDG deadline:**  
**2015**

**global**

ensure the sustainable supply of affordable health and nutrition commodities and the delivery of increased financial resources

**macro**

integrate child health and nutrition needs into national policies, plans and budgets

**meso**

strengthen district and community health and nutrition systems; ensure access to water and sanitation

**micro**

empower families to improve their health, feeding and childcare practices

**Achieving the MDG target – halving the proportion of underweight children between 1990 and 2015 – will involve efforts at micro, meso, macro and global levels, as well as partnerships among all sectors of society.**
