

1. UNICEF video news package with narration and UNICEF video news package without narration

SHOTLIST:

KAMPONG SPEU, CAMBODIA (29 March, 2005)

1. Medium shot, Sok Em collects water for cleaning dishes
2. Medium shot, Sok Em washes dishes inside house, with children watching
3. Close up, daughter's face
4. INT: Khmer: SOK EM; Paraphrased translation:
"Before, the children often got sick with diarrhea, she says. All of our money went to taking care of health problems."
5. Wide shot, Children pumping water at well
6. Wide shot, Sok Em and children washing hands outside home
7. Close up, Sok Em and children washing hands
8. Wide shot, village children pumping and washing at well
9. Close up, boys washing
10. Close up, water flowing from nozzle
11. Close up, boy and girl pumping well
12. Wide shot, boy herding cows across field
13. Close up, Woman holding daughter
14. Wide shot, woman with daughter outside house
15. Close up, drill turning with water spraying
16. Wide shot, drill equipment punching through water table
17. Close up, water spraying drill apparatus
18. INT: Eng: DR. JOSÉ M. ECHEVARRIA, ECHO Head of Office, Cambodia:
"The problem is that to provide water is the first step in an emergency situation because it's the first need. But now the second step is to provide good sanitation and to educate the people on sanitation measures."
19. Medium shot, girl dips under well spout for quick shower
20. Wide shot, latrines at school, children approach
21. Wide shot, children hanging out in schoolyard
22. Medium shot, three girls playing game
23. Wide shot, hygiene education class in village
24. Medium shot, villagers listening to presentation
25. Close up, volunteer explaining hygiene tips
- 26 - 28. Wide shot, health volunteers drive on motorcycles
29. Wide shot temporary immunization outreach station in village
30. Medium shot, Baby gets vaccination
31. Medium shot, Expecting mother gets check up
32. Medium shot, Boy receives vitamin A supplement
- 33 – 34. Wide shot, Girls carrying water in bucket from well to latrines
35. Close up, girls on swing
36. Wide shot, children playing on swings

STORYLINE:

Finding clean water has never been such a simple task for Sok Em. Until a few months ago, she could only draw from a murky pond outside her village. Its water took a toll on her four children.

Before, the children often got sick with diarrhea, she says. All of our money went to taking care of health problems.

Earlier this year, engineers installed a well and pump just two houses down the road. Now that they have access to safer water, Sok Em says her children are much healthier.

This well is the product of a partnership between UNICEF and ECHO, the European Commission's Humanitarian Department. The two organizations are working with local communities to boost child survival in Cambodia, which suffers from Asia's worst child mortality rate. An average of one of every eight children here dies before the age of five, in part because many have no access to clean water and sanitation facilities.

UNICEF and ECHO are supporting the drilling of more than 400 new wells in villages and schools this year, supplying water to at least eight thousand families.

"The problem is that to provide water is the first step in an emergency situation because it's the first need. But now the second step is to provide good sanitation and to educate the people on sanitation measures. Now that they have water, the second step is sanitation. With clean water and good sanitation all will have the complete package."

Construction is under way to set up latrines in 40 schools by the end of the year.

UNICEF believes investing in latrines and hygiene promotion in school is critical to change behaviors at an early age and create the demand for sanitation for the next generation of parents.

Community hygiene classes teach villagers how to safely use the water for everything from washing to cooking.

In addition to water and sanitation, UNICEF and ECHO are helping put community health care on the road.

Mobile vaccination teams roll out to pay monthly visits to small villages. They immunize young children against tetanus, measles, polio and other illnesses and check up on pregnant mothers.

Children are also given vitamin A supplements to boost their immune system and tablets to get rid of intestinal worms.

By bringing health care and safe water directly to the communities in need, ECHO and UNICEF are supporting critical activities to help more young Cambodians survive their childhood.

In Kampong Speu, Cambodia, this is Steve Nettleton reporting for UNICEF. For every child, advance humanity.

2. UNICEF video news footage 1

1. Medium shot, Sok Em collects water for cleaning dishes
2. Medium shot, Sok Em washes dishes inside house, with children watching
3. Close up, daughter's face
4. Close up, son's face
5. Medium shot, Interview with Sok Em, son sits on lap
6. Wide shot, children pumping water at well
7. Wide shot, Sok Em and children leave house, camera pans with them
8. Wide shot, Sok Em and children sitting on ground outside house, washing hands
9. Close up, washing hands in basin
10. Close up, low angle, washing hands in basin
11. Medium shot, children at well pumping water
12. Close up two boys washing, pouring water on themselves

13. Close up, boy washing head and face
14. Medium shot, children working crank
15. Medium shot, hygiene poster on board
16. Close up, tap with water flowing
17. Medium shot, two children cranking water
18. Wide shot, zoom out, boy and cow walk across field
19. Mother carrying crying girl child
20. Wide shot, mother carrying crying girl child
21. Medium shot, girl carrying younger sister

3. UNICEF video news footage 2

1. Medium shot, drill digging for water, punching through water table, water spraying
2. Close up, drill turning with water spraying
3. Wide shot, construction workers with drill equipment
4. Medium shot, drilling machinery
5. Medium shot, Interview with Dr. Jose M. Echevarria, ECHO Head of Office, Cambodia
6. Medium shot, girl washing under tap
7. Wide shot, two girls approach school latrines, other children follow
8. Wide shot, girls entering and leaving latrine
9. Wide shot, school playground
10. Medium shot, four girls playing game with stones
11. Close up, game
12. Wide shot, village health training, establishing shot
13. Medium shot, villagers at training
14. Medium shot, volunteer explaining hygiene using poster (see News Footage Tape 1, shot #15)
15. Wide shot, zoom out, two health volunteers on motorbikes
16. Wide shot, from front, health volunteers on bikes
17. Wide shot, from POV second rider, health volunteers on bikes
18. Wide shot, villagers gathered at temporary immunization outreach station
19. Close up, vaccination being prepared
20. Medium shot, baby being given injection
21. Medium shot, pregnant woman gets checkup
22. Medium shot, child gets Vitamin A supplement
23. Wide shot, two girls carry water to latrines
24. Close up, three girls on swing
25. Wide shot, girls on swings
