	<p>SOT Jimmy Kolker UNICEF Chief HIV and AIDS “The problem is that so many people, especially young people are continuing to get infected and the behaviour change messages are being honed and focused on vulnerable groups but the progress there hasn’t been as encouraging as it should be. There’s still hundreds of thousands of new infections every year.”</p> <p>The report says that community support is one of the best way to ensure successful HIV AIDS prevention. UNICEF and its partners are making sure that all anti AIDS programme do not exist in a vacuum, but strengthen the health, education and social welfare systems of the countries in which they operate.</p> <p>This is CN reporting for UNICEF television. Unite for Children.</p>	<p>been as encouraging as it should be. There’s still hundreds of thousands of new infections every year. Njinicom, Cameroon, March 2008 14. WS women in the street.
