He was shivering and his chest was heaving. So, we rushed him to the hospitals and the doctors confirmed that he had pneumonia. He’s now undergoing treatment.”</p> <p>If not treated in time, pneumonia can be fatal.</p> <p>So can HIB, a bacteria that usually strikes children under five.</p> <p>In efforts to reduce the rate of child mortality, the minister of health of Bangladeshw announced that the hib vaccine will now be available to all children under 5</p> <p>SOT: RUHUL HAQUE, MINISTER for HEALTH AND FAMILIY WELFARE “One of the programs our honorable prime minister is very interested to look after is children’s health, who has kindly instructed us to look into the children’s hospitals around the country. So, this is very much in line with our thoughts, which would help reduce the mortality of children and others.”</p> <p>SOT: SAMIR SAHA , PEDIATRICIAN “More than 100 countries have introduced this vaccine and they have eliminated this organism from their own population. We are also</p>	<p>Shotlist</p> <ol style="list-style-type: none"> 1. WS: man in bicycle on the road 2. WS: Khulna Shishu hospital (pan right) 3. CU: child crying 4.
