	<p><u>Script</u></p> <p>In Niger today, more than half of the population lives at least 5 kilometres away from any kind of health facility.</p> <p>Providing essential primary health care in more remote communities and to millions of children living across this vast and arid country is a challenge...</p> <p>But it's also a priority to save children's lives and improve their access to health care.</p> <p>To address these important needs, UNICEF and its partners have been building Community Health Posts in underserved rural areas with the goal of having at least 1 health facility for every 5,000 people.</p> <p>These clinics provide not only a package of basic health interventions but also offer preventive care as well as counselling and children's growth monitoring.</p> <p>SOUNDBITE: Akhil Iyer, UNICEF Representative in Niger: "It's a packet of cost-effective health and nutrition interventions, some of them very simple such as immunization and vitamin A supplementation to reduce child mortality before 5 years of age and it has already been shown to have a proven impact around the world, so it's a question of jumpstarting it in Niger, and we can bring the mortality rate down quickly."</p> <p>These measures provide effective treatment to children under 5 who often fall victim to malnutrition and become vulnerable to deadly yet preventable diseases.</p> <p>In Niger, pneumonia, diarrhoea, and malaria are responsible for almost 60 per cent of children's deaths.</p> <p>SOUNDBITE: Noël Zagré, Nutrition Chief, UNICEF Niger: "Malnourished children -- if they are not treated against malnutrition, they are at a very high risk of death, especially when they have diarrhoea or a respiratory infection."</p> <p>Providing effective treatment against these 3 major diseases significantly reduces child mortality.</p> <p>Community-based health initiatives and adequately trained health workers are essential to address the needs of vulnerable children and increase their chances of survival.</p>	<p><u>Shotlist</u></p> <p>Madarounfa and Maradi region and Maradi region, Southern N (2007)</p> <ol style="list-style-type: none"> 1.
