

DRC - Polio Communication Indicators

Problems	Input indicators	Output indicators	Result indicators
<p>Presence of cases of resistance to immunization against polio in some Health Zones (HZ) (Mapping)</p>	<p>% of Health Zones (HZ) that have identified resistance pockets</p> <p># of identified resistance pockets</p> <p>% of HZs with skilled human resources</p> <p>% of HZs with sufficient material and financial resources for managing cases of resistance</p>	<p>% of local leaders that have used incentives for resistant groups/# of leaders that have been sensitized or trained</p>	<p>% of resolved resistance cases/# targeted</p> <p>% of resistant parents that have accepted to have their children vaccinated/# of targeted resistant parents</p>
<p>Parents that don't have enough information on the dates and the illness against which their children have been vaccinated during the campaigns.</p>	<p>% of HZs that have a communication plan on the polio campaign</p> <p>% of HZs that have networks that are trained and equipped in communication media</p> <p>% of HZs that have community radios</p>	<p>% of HZs that have implemented their communication plans</p> <p>% of community radios that have broadcast messages on the Polio campaign/# targeted</p>	<p>% of parents informed of the dates of the campaign/# targeted</p> <p>% of parents who know which disease their children were vaccinated against/# of parents informed</p>

Problems	Input indicators	Output indicators	Result indicators
<p>Difficult access to information on the Polio campaign for special groups (pygmies, fishermen, "shegues", displaced)</p> <p>(Mapping)</p>	<p>% of HZs that have mapped special population groups</p> <p>% of HZs that have developed specific communication approaches for special population groups/# of HZs planned</p>	<p>% of HZs that have implemented communication approaches on managing special population groups/# of HZs planned</p> <p>% of leaders within special population groups that have provided incentives for the immunization of their children/# targeted</p>	<p>% households within special population groups that have had their children vaccinated/# of households sensitized/targeted</p>

DRC - Indicators for Systematic EPI Communication

Problems	Input indicators	Output indicators	Result indicators
<p>In 198 HZ, numerous parents do not complete the immunization schedule for their children</p> <p>(Mapping)</p>	<p>% of HZs that have Community mobilisers</p> <p># of Community Mobilisers trained and equipped with communication media/# planned</p>	<p>% of HZs that have set up a communication approach relative to getting back those that have been lost/# of initial HZs (198)</p> <p>% of HZs and networks that have effectively contributed to getting back those that have been lost</p>	<p>% of children that were attracted back by Community Mobilisers/ # of targeted children</p>
<p>Lack of promotion for child survival activities.</p>	<p>% of HZs that have a communication plan for child survival, including routine EPI</p> <p>% of HZs that have a communication micro plan on routine EPI</p> <p>% of communication micro plans that have been effectively funded</p>	<p>% of HZs that have implemented their communication plan on Child survival/# planned</p>	<p>% of HZs that carry out activities for the promotion of Survival in the community/# planned</p>

<p>Lack of communication within health spaces</p>	<p>% of HZs with health agents (HA) and community staff that have been trained and equipped</p>	<p>% of HAs that properly run educational sessions in the CS/# planned</p> <p>% of SAs whose vaccinators adequately communicate with mothers/# planned</p> <p>% of HZs whose Community Mobilisers develop communication activities within the community/# planned</p>	<p>% of parents which regularly use immunization services to ensure complete immunization of their children/# planned</p>

DRC - Baseline indicators

- % of HZs that have a communication plan based on the coverage and social data
- % of HZs that have networks that are trained and equipped
- % of HZs that have mapped special population groups
- % of HZs that have mapped resistance pockets as well as their scope
- % of HZs that have costed funding that is available for communication activities
