

UNICEF Albania informs all prospective bidders that, following the receipt of requests for clarification under the above-mentioned solicitation, the procurement schedule has been revised. Some of the clarification requests require confirmation of technical specifications and implementation requirements from the relevant government counterpart(s). Additional time is therefore required to obtain the necessary official information to ensure that complete, accurate, and consistent responses are provided to all prospective bidders.

To uphold the principles of fairness, transparency, and equal treatment of all bidders, UNICEF has revised the solicitation timeline as follows:

- **Revised deadline for issuance of responses to requests for clarification: 10 July 2026**
- **Revised bid submission deadline: 22 July 2026**

All prospective bidders are advised to take the above revisions into account when preparing their bids. All other terms and conditions of the solicitation remain unchanged. This amendment forms an integral part of the solicitation documents and shall be read together with all previously issued solicitation documentation.

Responses to Requests for Clarification

The proposed equipment should fully comply with the minimum technical specifications and performance requirements of the solicitation. IT equipment offered under this solicitation must comply with applicable European Union requirements and carry a valid **CE marking**, demonstrating conformity with EU safety, health, and environmental protection standards.

Question 1: *For IT supplies, will brands other than BENQ be accepted for the Smart Boards? If yes, please provide the full technical requirements, as these have not been specified.*

Response: UNICEF Albania is seeking advice and additional official technical input from the relevant government institution(s), including, where applicable, the responsible technical authorities. The final requirement approved by the responsible government counterpart will be made available to all vendors immediately upon confirmation.

The extension is therefore necessary to ensure that all responses provided to prospective bidders are complete, accurate, and consistent with the final technical requirements.

Question 2: *Is installation included in the scope of the offer? Will delivery be required outside Tirana?*

Response: Yes. Bidders shall include all installation costs in their financial proposal.

Delivery and installation will be required for **30 selected schools** located across the following **10 municipalities**:

- Kukës
- Librazhd
- Dibër
- Gjirokastrë
- Pogradec
- Kurbin
- Vorë
- Sarandë
- Divjakë
- Skrapar

For ease of reference, the list of schools selected by the Ministry of Education can be found on the following page.
