

CANCELLATION OF LITB-2026-9204675

UNICEF would like to thank you for your interest in Solicitation **LITB-2026-9204675** and for the time and effort invested in reviewing the solicitation documents and submitting clarification requests.

Following the clarification requests received from prospective bidders, UNICEF has identified the need for further clarification and confirmation from the relevant government authorities regarding certain technical requirements, including the applicable minimum technical specifications, installation requirements, and compatibility aspects of the Smart Laboratories equipment.

As these clarifications are necessary to ensure that the procurement documentation fully reflects the approved technical requirements and provides all bidders with clear, complete, and consistent information, UNICEF has decided to cancel the current solicitation and relaunch the procurement process at a later stage once the required clarifications have been obtained and the technical documentation finalized.

UNICEF is currently engaging with the relevant government authorities and technical stakeholders to review and confirm the requirements, ensuring that the future solicitation accurately addresses the technical, operational, installation, and compatibility aspects of the supplies.

This process will support a transparent, fair, and competitive procurement process and ensure that all prospective bidders have a clear and common understanding of the requirements when the solicitation is reissued.

A new solicitation will be issued once the technical documentation has been finalized. UNICEF appreciates your understanding and thanks you for your continued interest in working with UNICEF.
