Refugees school-aged children accessing education including support with teaching and learning materials since the beginning of March 2015 in the camp

167

Children transferred from Tchoukoutalia were newly enrolled in Dar Es Salam camp school in the last month

UNICEF response highlights to date**Health and Nutrition**

- UNICEF provided the Bagasola Health District with 19 basic health kits (for 19,000 consultations) and 1 basic health kits for malaria (including 250 tests and treatments) for the emergency response. The most frequent pathologies for children are acute diarrhea (21.7%), respiratory infections (20.8%), and suspected malaria (14.4%).
- 420 people were sensitized about prevention of sexually transmitted infections in Dar Es Salam camp in two awareness sessions.
- UNICEF and partner ALNADJA organized nutritional screenings for children under 5 in Tchoukoutalia and Ngouboua. 268 cases of severe acute malnutrition (SAM) were detected and referred for care in UNICEF-supported nutritional units in the program.
- In Koufoua area, a nutritional and medical screening was done by UNICEF staff in which 64 cases of moderate acute malnutrition (MAM) and 29 SAM cases were identified out of 255 children screened. All children with SAM and MAM received appropriate follow-up therapeutic care and further medical care as needed.

Child Protection

- 13 unaccompanied children were identified and registered in Koufoua and referred to appropriate follow-up care.

WASH

- 2,466 households (6,077 people) were reached with Basic Family WASH kits in Koufoua and Bagasola during the last month. Each kit contains: 1 bucket (10 liters), 2 Collapsible Jerry cans, 60 Chlorine tablets, and 120 bags of PUR, 10 Toilet Soaps, pieces of linen soap.
