## Unicef Chad Situation Report on the Emergency in Tissi

*Reporting Period: April – May 2013*

# Highlights

Chad is currently facing **simultaneous, acute emergencies** which are stretching capacity and current funding levels. UNICEF and partners have responded well to the most recent refugee and returnee influxes but we remain vigilant given current political turmoil in neighboring countries as well as a high risk for epidemics.

## **Influx of Refugees and Returnees from Darfur:**

UNICEF Response on-track; limited partners;  
Additional resources urgently required.

- Since March 2013, 30,000 refugees and 22,000 returnees have been registered in and around the remote border town of Tissi (more than 18 sites/villages); the region is characterized by chronic instability since 2004.
- Basic social services are inexistent, most of them destroyed or damaged during the 2004-2006 civil war and ethnic tension in the Sila region; among the priority needs being addressed are access to potable water, hygiene promotion, shelter, health and nutrition care for children and women.
- One of the major concerns is the overall protection of beneficiaries as the continued conflict in North Darfur could spill-over into Chad.
- After a rapid assessment was conducted at the end of March 2013 following the latest influx in the first week of April, UNICEF deployed a Rapid Response Team on April 13th, to provide WASH, Health, Nutrition and Protection lifesaving interventions.
- Through partnerships with government counterparts and six international and local NGOs and the establishment of a robust supply chain worth 1.2 million US\$, UNICEF provided humanitarian assistance to more than 100,000 beneficiaries (refugees, returnees and the vulnerable host community) and supported the immunization of more than 30,000 children against measles, as well as established a community-based network to monitor, act and report on violence against children and women.

## FACT SHEET

## Child Protection

- Programme Cooperation Agreement with DRAS (Direction Regionale Action Sociale)
- 06 Social workers / Child Protection Officers and 36 Community Workers deployed
- 08 Child Well-being Committees in place
- 08 Child Friendly Spaces receiving an average of 2,960 children on a daily basis
- Support provided to 5,186 vulnerable children including 253 orphans
- 84 community leaders identified and trained on GBV Prevention, Monitoring and Reporting

## Education

- UNICEF has developed an action plan to provide primary school teaching in partnership with the DREN, OPAD, Agro Action and other partners
- UNICEF in partnership with the DREN (Delegation Regionale de l' Education Nationale) conducted an assessment from April 18th to April 25th; JRS, OPAD and Agro Action as Education cluster members took an active role in the assessment
- School age children represent 30% of the total affected population
- 20% of children were enrolled in school in Darfur before the conflict
- None of the 29 schools in the Tissi catchment built in durable material
- Lack of class rooms, teachers and school supply

## FACT SHEET

## Health

- Programme Cooperation Agreement with ASSAR and 30,000 US\$ with the DRS ( Direction Regionale de la Sante)
- Rehabilitation of Tissi Health Center and 05 health posts in hosting villages ( Kelle, UmDukhum, Bir nahal, Rout-Rout) including MSF-F health clinic in Haraza handed over to UNICEF partner ASSAR
- 16 nurses, midwives deployed for maternal and child health activities
- 36 Community Health Workers identified for community health intervention in 18 villages
- 1 Cold Chain Unit and vaccines; 30,000 immunized against measles
- 08 IAEH Kits 2006 delivered to Tissi and the 05 health posts

## Non Food Items

NFI

- 10,000 LLITNs Pre-positioned in Tissi and 05 others sites; 5,000 LLITN distributed
- 5,000 plastic mats distributed
- 5,000 plastic sheetings delivered to provide adequate shelter for children and women
- 1,000 blankets distributed to children under 01 year old.

## Nutrition

- Programme Cooperation Agreement with ASSAR and the DRS of Sila
- 06 OTP for management of Severe Acute Malnutrition and Moderate Acute Malnutrition
- 353 new SAM admissions on April and May 2013
- Prevention of Malnutrition: PlumpyDoz Blanket Feeding
- Micronutrient Supplementation: 15,000 Children 6-59 months received Vitamin A supplementation and deworming

## FACT SHEET

## WASH

- Programme Cooperation Agreement with IAS
- 02 boreholes and 02 bladders in Goz A Mir refugee camp
- 02 boreholes in Abgadam for refugee population
- 16 boreholes in 14 returnees sites and villages
- Programme Cooperation Agreement with the DRH for the Rehabilitation of Tissi Water Distribution System: Solar Power and 06 water distribution points
- Programme Cooperation Agreement with AFDI : hygiene promotion
- 500 Basic Water Family Kits distributed to 5,000 families
- 6,500 families received Water Purification tablets for home based water treatment
- 23,500 people received key messages on good hygiene and waterborne disease prevention
- Programme Cooperation Agreement with FPT for hygiene promotion and construction of 300 emergency latrines.

Estimated funding requirement until Dec 2013

**USD 5.2 million**

Secured Funding as of June 2013

USD 600,000

Pledged Funding as of June 2013

USD 600,000

**Current Funding Gap**

**USD 4 million**

Funding Partners: ECHO - DFID - OFDA - Unicef Nat Com

The USD 5.2 million requirement for **Tissi** falls within the broader USD 66 million requirement under the **Humanitarian Action for Children (HAC)** in Chad for 2013, which is currently being revised through the CAP mid-year review.
