- US$ 19.8 million
  - Funds received: US$ 0.4 M
  - Carry-forward: US$ 3.7 M
  - Funding gap: US$ 15.7 M
**Funding Overview and Partnerships**

In 2020, UNICEF is appealing for US$ 19.8 million to provide life-saving services for vulnerable and conflict-affected Libyan and non-Libyan children and women. As of March 2020, the Governments of Denmark, France, Germany, Italy, Japan, Korea, Sweden, and the United States have generously contributed to UNICEF’s humanitarian preparedness and response for Libya. UNICEF expresses its sincere gratitude to all public donors for the valuable contributions received. The 2020 Humanitarian Action for Children (HAC) is still critically underfunded across all sectors, with an overall funding gap of 79 per cent (US$ 15.7 million). The child protection, education, and water, sanitation, and hygiene (WASH) sectors are the most under-funded, significantly limiting UNICEF’s capacity to reach an estimated 100,000 conflict-affected and vulnerable children and individuals with life-saving essential services. UNICEF implements all programmes aiming to assist the most vulnerable Libyan and non-Libyan conflict-affected or vulnerable migrant, refugees or internally displaced persons (IDP) in collaboration with relevant government ministries and 19 national and international non-governmental organizations.

**Situation Overview & Humanitarian Needs**

The armed conflict in Libya continues after nine years, and excluding the additional threat from COVID-19 pandemic, it is estimated that in the year 2020, around 1.8 million people will be affected and 893,000 people, 30 percent of which are children, will required human assistance, a third of them in acute need. The majority of those in need are in urban areas, primarily in the East and West Libya, though the less dense and rural south also remains highly vulnerable.

In the first quarter of 2020, indiscriminate attack on water structures, schools and medical facilities put around half a million children at risk while more than 300,000 people were internally displaced. With COVID-19 cases recorded in Libya, and the severe restrictions in movement, the humanitarian needs of the most vulnerable populations of migrants, refugees and internally displaced people (IDPs) increased drastically. In March, a humanitarian pause was called upon by the international community and supported by the UN to facilitate the response to COVID-19, which was welcomed by both Government National Accord (GNA) and Libyan National Army (LNA). However, within 24 hours on the truce, both parties resumed mutual shelling which resulted in further material damage and loss of civilian lives, that impacted the COVID-19 and overall humanitarian response. Libya is also at an additional risk due to the active migration lines that are continuing to pass through the country, with COVID cases reported in the migrants’ countries of origin.

Between January and March 2020, seven schools were partially damaged. Schools in areas close of the fighting were forced to interrupt education activities, some of them for up to several weeks, in Ain Zara, Souq al Jouma, Tripoli, Hai Andalous and Misrata. WASH infrastructure and services have also deteriorated significantly, with only 60 per cent of households connected to the public water network and 90 per cent of untreated wastewater being disposed directly into the sea—increasing the risk of waterborne illness. Children increasingly suffer from psychosocial distress due to the conflict and remain highly vulnerable to unexploded remnants of war.

Libya has remained both a destination for migrants and a major transit country for migrants and refugees attempting to cross the Mediterranean to Europe. In 2020, there were more than 636,000 migrants were identified in Libya, out of which 44,520 were children. Of the latter, nearly 10,684 were separated or unaccompanied and at high risk of exploitation and abuse. Migrants and refugees continue to be at risk of killings, torture, arbitrary detention and unlawful deprivation of liberty, rape and other forms of sexual and gender-based violence (SGBV), slavery and forced labour, extortion and exploitation. Approximately 3,200 migrants and refugees in detention centres face extreme protection risks.

and limited access to basic services. The Central Mediterranean Route from Libya to Europe remains the deadliest in the region, with 1,319 deaths/missing people recorded in 2019.

Summary Analysis of Programme Response

Health
During the first quarter of 2020, 135,925 children and women received primary healthcare in UNICEF supported government health facilities. The target was overachieved due to the emerging needs as a result of the ongoing conflict in the country, and later contributing in mitigating the impact of COVID-19. The support ensured continuity of maternal, new-born and child health care in focused Primary Health Care (PHC) facilities, thus, enhancing the access of vulnerable population to responsive services. UNICEF Libya support will contribute significantly in preventing diseases and death among targeted population, as the health services face huge gaps in service delivery due to the instability. The health facilities received essential medicines and equipment critical for training ailment and preventing death. The new-born care component of the health program reached 4,454 children (2,188 boys and 2,266 girls).

Nutrition
UNICEF Libya continued its focus on provision of nutritional services to the vulnerable population for prevention of nutrition associated malnutrition including micronutrient deficiencies. About 1,305 children (197 boys and 1,108 girls) aged 6 to 59 months received multiple micronutrients. Additionally, 4,662 pregnant and lactating women (PLW) received micro-nutrient supplements and emergency food ration. To ensure accelerating optimum infant and young child feeding (IYCF) practices, UNICEF Libya has finalized orientation material on IYCF to conduct IYCF counseling session in health facilities, Bayti Centers and for other vulnerable groups. Moreover, UNICEF has prepositioned extra nutrition supplies that include micronutrients, Ready to Use Therapeutic Food (RUTF), high energy biscuits and emergency food ration which will proactively contribute in preventing nutrition related morbidity and mortality especially during the COVID-19 pandemic.

Water, Sanitation and Hygiene
UNICEF Libya and its partners provided safe water and sanitation services to 24,695 people (water 2,350; sanitation 207 and hygiene 22,138) in conflict-affected areas through rehabilitation of water systems in collective centres and schools. 22,138 people (10,848 men and 11,290 women and 7,748 children) were provided with essential hygiene items and sensitised on key hygiene messages. Provision of hygiene items had been carried out in coordination/collaboration with Rapid Response Mechanism (RRM). Mostly these activities had been undertaken in Ubari (Alqurdabiya school, Al Hurriya school, Alamal school) and Tripoli (Tarik bin Ziad collective shelter, Al-Shamoukh school and Multaqana Bayti Centre).

Education
UNICEF continued to support non-formal education of the most vulnerable children through remedial classes for children at risk of dropping out of school, catch up classes for out of school children, and life skills education for children and youth. In the first quarter of 2020, 7,265 children (3,236 boys and 4,029 girls) were supported with non-formal education in Sabratha, Benghazi, Soloug, Suq al Jouma, Hai Andalus, Misrata, Zwara and Tripoli.

In order to enhance the quality of formal and non-formal education provided to children, individual learning materials were distributed among 60,647 children (29,882 boys and 30,765 girls). Most of the children were reached through the Ministry of Education (MoE), while UNICEF and non-governmental partners distributed education supplies to children in non-formal education system.

Teacher trainings focusing on child-centred pedagogy and improved teaching methods were also conducted in the first quarter of 2020, with 127 teachers (53 males and 74 females) trained. To complement education activities, UNICEF together with its partners also supported children’s well-being through recreational activities and psycho-social support.

---

9 2020 Libya Humanitarian Needs Overview
11 Geographical areas where water was supplied: Swani Bin Adam, Abuslim and Hai Andalus. Hygiene services were provided in Benghazi; Hai Andulus, Tripoli, Ubari, Al Bayda, Aljufras, Ejdabia, Gamienis, Misrata, Sebha, Shahat, Suq Aljumma, Tubruk, Swani Bin Adam, Tarhouna, Abusalim. UNICEF and partners provided sanitation services in Hai Andulus, only.
13,919 children (50 per cent girls) participated in recreational activities in schools and learning spaces in Sabratha, Azzawiya, Murzuq, Sebha, Tripoli and Benghazi.

**Child Protection**

UNICEF along with its child protection partners continued to support vulnerable and conflict-affected children and caregivers cope with distress and adversity and reduce their direct exposure to violence. 3,107 children (1,134 boys, 1,973 girls), benefited from child protection services including mental health and psychosocial support (MHPSS) activities and case management through schools, ten Bayti centres, IDP’s shelters and other urban settings across Libya. Moreover, UNICEF and partners provided gender-based violence (GBV) response services to 2,548 individuals (1,938 women and girls and 610 boys and men) in friendly spaces as well as prevention and risk mitigation.

On non-clinical focused services, UNICEF and its partners provided age and gender sensitive child protection case management services to 86 children (70 girls, 16 boys) and continued to provide specialized mental health and psychosocial support such as individual counselling and psychological first aid to 1,298 children (703 boys, 595 girls) in Greater Tripoli, Benghazi, Misrata and Sebha. 6,545 individuals including children parents and community members (3,421 male and 3,124 girls) were reached with messages about child protection and positive parenting.

To decrease the risk of exposure to mines, unexploded ordnance and explosive remnants of war incidents, UNICEF and partner delivered child, adolescent and adult centred explosive ordnance risk education (EORE) to 18,903 individuals including children and caregivers (9,689 female and 9,214 male) in Sebha, Ghiryan, Tawergha, Mizdah, Tripoli, Hai Al Andalus, Ainzara, Tajoura, Suq Aljumaa, Janzour. UNICEF and partners produced and broadcasted an additional explosive ordnance risk education radio spot in two local radio stations in eastern Libya with the aim to disseminate key safety messages and encourage citizens to report explosive hazards, reaching out an estimated 500,000 indirect beneficiaries. During the reporting period, UNICEF and partner finalized the design of the adolescent specific EORE IEC materials, currently under pre-testing.

UNICEF and partners trained 172 child protection actors (103 females and 69 males) on child protection response including one accredited training of trainers (ToT) on explosive ordnance risk education for community mobilizers in Sebha, three training on promoting legal environment and monitoring and reporting mechanisms as well as MHPSS for social workers in Misrata and Tawergha.

UNICEF and partners distributed winter clothes to six detention centres and one shelter targeting 317 children from various nationalities such as Somalia, Eritrea, Sudan, Nigeria, Ethiopia, Chad, Sierra Leone, Cameroon, Mali, Egypt, Congo, Liberia, Bangladesh and Morocco.

**Humanitarian Leadership, Coordination and Strategy**

UNICEF actively participates in the United Nations Country Team, the Humanitarian Country Team which provides strategic leadership and policy guidance for engagement with the Government. To strengthen the linkages between humanitarian action and development programming in Libya, UNICEF will prioritize its coordination role and support capacity building for all partners, including local authorities and municipalities.

UNICEF co-leads the inter-agency Rapid Response Mechanism, which scales up responses by pre-positioning supplies; providing direct cash assistance in response to sudden-onset emergencies; and delivering life-saving assistance in hard-to-reach areas. UNICEF also leads the WASH and education sectors and the child protection and nutrition subsectors. To maximize its impact, UNICEF will continue to build partnerships with line ministries, municipalities and nongovernmental organizations and invest in national capacity development, focusing on humanitarian principles and emergency preparedness and response. Multi-sectoral humanitarian assistance will be prioritized, as will community mobilization and awareness-raising as strategies for reaching the most vulnerable children (including children on the move). UNICEF will provide life-saving assistance by ensuring access to safe water and sanitation facilities, providing primary health clinics with maternal and neonatal health and nutrition packages, and strengthening communicable disease prevention and national immunization. Support for formal and non-formal education and child protection services will be expanded in schools and community centres, emphasizing efforts to address gender-based violence.
