Situation Overview and Humanitarian Needs

Nigeria has witnessed an increase of an average of above one-thousand COVID-19 cases per week, since the week of 18 April when testing across the country increased (see graph¹). As of 15 May there are 5,162 recorded cases of COVID-19 across the country. Lagos, Kano, Federal Capital Territory, Borno, Gombe, Katsina, Bauchi and Jigawa are responsible for 60 per cent of confirmed cases in the country². In addition 51 per cent of the confirmed cases are from 9 local government areas³. Of the total admitted, 1,180 cases have been discharged and 167 deaths have been recorded. 31,702 tests have been carried out across the country with 34 states and the Federal capital Territory (FCT) having reported at least one confirmed case.

In Yobe a report of about 471 deaths within five weeks led to an investigation with initial reports revealing that most deaths were of elderly people with pre-existing medical conditions such as hypertension and diabetes. Bauchi state, on Monday announced a 10-day lockdown on three areas that border Kano state in a bid to contain the increase in COVID-19 cases, curb rapid community transmission and allow for effective contact tracing and testing. In Sokoto state, the Executive Governor inaugurated a 3,000 volunteer response team made up health workers and commenced distribution of two million face masks to the public. Borno state lifted its lockdown on 13 May stating that the lockdown period was successful in testing and tracing. In addition, 160 Nigerians in United States were repatriated to Nigeria on 10 May. This is part of government’s efforts in aiding stranded Nigerians in other countries. Similar returns have been done from the United Arab Emirates and United Kingdom. Returnees are quarantined in designated isolation centers for 14 days upon their return.

SPOTLIGHT

Prior to the COVID-19 outbreak, UNICEF, in partnership with the Borno State Agency for Mass Education (SAME), supported an EU-funded technical and vocational education and training (TVET) programme. This programme’s aims were to equip 25,000 youths (15+) with skills and income opportunities through training on key skills including shoemaking, catering, sewing, painting and poultry farming. Target beneficiaries were heads of households, with an emphasis on female-headed households, across six conflict-affected LGAs - Hawal, Gwoza, MMC, Jere, Monguno and Mobbar. During the three-month training period, beneficiaries are provided with monthly stipends to cover their transportation costs. To date over 1,000 youths have been empowered through this programme.

Due to the COVID-19 outbreak and lockdown restrictions the commencement of the second phase of the project was delayed. However, recognizing the shortages in PPEs and other hygiene materials, the project begun production of 40,000 face masks and 12,000 bars of soaps in three TVET centres in Maiduguri. A total of 366 youth, 10 adolescent girls and 24 women head of households are involved in the production. Daily production capacity is 1,500 facemasks and 700 soaps. Safety is ensured at the centres with the provision of face masks, gloves, hand washing facilities as well as social distancing measures.

**UNICEF’s COVID-19 response**

**RCCE/C4D**
RCCE activities continue to intensify through the sensitization and capacity building of partners in all targeted states. A mobile messaging campaign was launched in communities; video skits on different key practices including hand washing, tips for staying at home and other key behaviours are actively disseminated through social media. A ‘COVID-19 Talk’ radio talk show has been initiated in Enugu by all nine radio stations and it will continue for eight weeks providing key information and call-in opportunities. UNICEF in Kaduna supported weekly scheduled talk shows with key resource persons on seven Radio/TV stations and FM Stations. In Kano, UNICEF supported the RCCE pillar to plan and implement engagement sessions with district heads on COVID-19 prevention and mitigate transmission and the use of public information vans to broadcast COVID-19 information in selected communities and neighbourhoods. COVID-19 jingles continue to be aired on selected radio stations in Kano, Katsina and Jigawa States.

In Sokoto and Bauchi, UNICEF worked with religious focal persons and traditional leaders as well as VCMs to sensitize people in communities and markets and other locations on effective handwashing, physical distancing, COVID-19 signs/symptoms, and referral practices. Planning for the Volunteer Ward Supervisor (VWS) and Voluntary Community Mobilizers (VCMs) continues across several states this week. This included the construction of locally sponsored handwashing facilities in Taraba in 201 settlements.

**North-east C4D response**
In Borno, 42 spots of jingles have been airing weekly in Hausa and Kanuri languages while mobile announcements are carried out twice a week in 10 LGAs reaching 6,344 community members. 3,439 Volunteer Community Mobilisers (VCMs) continued to sensitize small groups of people and reached 58,221 caregivers in the past week in Borno and Yobe. During the lockdown, VCMs continued to make wider use of the telephone tree in order to maintain contact with their community families for COVID-19 surveillance; and follow-ups with caregivers on routine immunisation. Religious leaders in Borno and Yobe are actively engaged in the COVID-19 response and 819 religious leaders were sensitized on COVID-19.

**Health**
UNICEF continues to provide technical support to the Presidential Task Force and the NCDC. Guidelines on ‘community case definitions’ developed by epidemiology and surveillance pillar with UNICEF’s support have been disseminated to states. This is addition to support for:

- The development of the ‘National Lab Scale up Strategy’ to optimize all molecular laboratories in the country, including Cobas machines in Abuja and Lagos, as well as optimizing one GeneXpert machine per state;
- The coordination and integration of lab reporting through modeling, forecasting, quantification and distribution;
- The procurement of test kits and nasopharyngeal swabs. 10,000 Cobas kits have been delivered to NCDC;
- Analysis of a need-based deployment of surge staff to states to strengthen human resources for Persons Of Interest monitoring and contact tracing;
- The development of an inventory of clinical care supplies on Google Drive, that is being updated weekly. This drive also captures weekly updates of health care worker trainings; and
- Developing an online self-reporting dashboard that will also capture alerts from call centres.

UNICEF is working with partners on data models for a mid-level detailed analysis of the outbreak. 68 isolation-treatment centers have been accredited in the country through UNICEF support to the case management pillar.

UNICEF is supporting the State level Training of Trainers on ‘COVID-19 Preparedness and Response at PHC and Community Levels’ organized by the NPHCDA. Virtual TOTs were conducted this week across the different states. These master trainers will thereafter conduct step down face-to-face training for PHC teams at LGA level. UNICEF continues to provide ongoing technical support to the state EOCs on COVID-19 response.

- In Ekiti State, UNICEF supported the training of 400 State and LGA health workers from Public and Private health facilities on Infection, Prevention and Control.
- UNICEF Akure is supporting active case search visits to health facilities and communities in Akure South and Owo LGAs noted to be high-risk LGAs.
- Kano FO is supporting Rapid Response Team activities in Kano, Katsina and Jigawa States. 88 LGA Facilitators have been engaged for active case search in Kano.
- UNICEF Lagos FO supported IPC assessment of two sites as the State Government attempts to expand isolation bed capacity.

**North-east Health response**
In the north-east, UNICEF continues to support and actively participate in coordination meetings at the State and LGA levels. UNICEF is also supporting IPC activities, including training of healthcare workers and community resource persons, in UNICEF supported health facilities and host communities in Borno and Yobe States. 33 VCMs were sensitized on COVID-19 signs and symptoms and IPC measures for strengthening community response approach.
Nutrition

Anambra, Bauchi, Ebonyi, Enugu Gombe Imo, Kaduna, Kebbi, Nasarawa, Niger Sokoto and Zamfara states have continued providing the community-based management of acute malnutrition (CMAM) for children 6-59 months with SAM, in all existing treatment sites per states with COVID-sensitive modifications as described last week. They continued to provide SAM children with two weekly supplies and have reached a total of 36,077 SAM children since January, including 9,195 from April to date. In Anambra, Ebonyi and Enugu the new SAM admissions was observed to be on the increase, potentially associated with the COVID-19 outbreak.

During lockdown in Kaduna, Nasarawa and Niger states, caregivers of SAM children used OTP/ration cards as a pass to avoid movement restrictions by security personnel to enable caregivers visit the health facilities (HF), including mothers with children who have been newly referred. 84,506 caregivers of children 0 - 23 months have been reached with Infant Young Child Feeding (IYCF) promotional messages since January, including 11,665 in April. Kaduna, Nasarawa and Niger states continued to provide key messages on optimum IYCF in context of COVID-19 alongside risk communication and community engagement. The COVID-19 health messages are now integrated in the IYCF sessions in the HFs. Mothers and caregivers are being equipped with knowledge on COVID-19 and how to prevent it, while respecting physical distancing in all the facilities.

Enugu have begun mass communication of IYCF messages using jingles, video skits, picture cards and posters developed with the support of C4D last week. The messages are being disseminated via Coal City FM and they will run 50 spots of jingles. Jigawa, Katsina and Kano will commence weekly interactive radio and TV program and daily airing of jingles on recommended IYCF practices in COVID-19 context including IPC measures by next week.

In Adamawa, Bauchi and Gombe, Health and C4D consultants were also trained on IYCF messages using Zoom and there will be a series of continuous weekly training’s for CMAM and MNP in collaboration with health and C4D team. Nutrition teams been integrated into all the health COVID-19 Training of Trainers (ToT) training’s in these states.

Katsina and Jigawa States kick-started deworming tablets distribution to children 12-59 and school-age children through routine health services. Katsina has commenced the integration of vitamin A supplementation to routine health services for children 6-23 months.

North-east Nutrition response

In April, integrated nutrition services were provided in 278 health facilities and 30,738 SAM children were admitted in out-patient therapeutic programs (OTP) between March and April. 22,338 in Borno (male 3,735, female 18,603) caregivers were sensitized on COVID-19 infection, prevention and control at OTP sites and communities. To minimize contact, a two-weeks’ ration of RUTF to all beneficiaries was maintained and in support of this, 8444 cartons of RUTF were distributed in Borno (3,624 to UNICEF-supported sites, 4,141 to partners) and 679 to UNICEF-supported sites in Yobe. 56,569 caregivers received IYCF counselling since March. Mother to mother support group meetings of caregivers and sensitization on COVID-19 measures prevention were held in Yobe involving a total of 264 (male 12, female 252).

WASH

Hygiene Promotion and Distribution of IEC materials

An additional 27,300 COVID-19 prevention posters were distributed across several LGAs in Plateau, Niger, Nasarawa, and Kwara states and were used to complement hygiene promotion campaigns and placed in critical places such as hospitals, markets, public offices and other public places. The distribution and placement were carried out through the respective state Rural Water Supply and Sanitation Agencies (RUWASSAs), LGAs WASH units and rapid response teams.

In Plateau, Bauchi, Kaduna, Benue, Anambra, Ebonyi, Kano, Katsina, and Jigawa states, handwashing sensitization campaigns were carried out through small group discussions in indigenous languages (through the use of community and religious leaders), house to house visits and the use of town announcers with motorized public address units while observing appropriate safe distances and other COVID-19 prevention recommended best practices, reaching at least 352,900 persons.

Jingles on COVID-19 awareness and prevention developed in collaboration with C4D continue to be aired on a daily basis in English, Pidgin, Hausa, Igbo, Kanuri and Yoruba languages by various radio stations across 17 states continuously reaching an estimated number of 8.5 M people.4

In Ogun state, 108 frontline health workers from PHCs in nine LGAs were trained on hygiene promotion and handwashing for prevention of COVID-19. 100 RUWASSA, WASH unit staff and WASHCOM federations were trained on hygiene promotion, handwashing strategies and other COVID-19 IPC WASH measures in Benue and Anambra state.

4 Edo, Ekiti, Ogun, Ondo, Osun, Oyo, Plateau, Bauchi, Kebbi, Sokoto, Zamfara, Ebonyi, Anambra, Benue, Cross River, Borno, Yobe (approx. 500,000 per state)
**Distribution of WASH NFIs, Provision of WASH services**

Soaps and liquid bleach were distributed to 400 households (about 2,000 persons) in three LGAs in Plateau state. In Plateau and Bauchi state, 18,425 persons were provided access to safe water through 34 water facilities in communities. In collaboration with RUWASSA, 60 handwashing stations with soap were provided in markets, motor parks, PHCs and public places in Kaduna state to enable at least 600 people to practice proper hand hygiene.

**North-east WASH response**

At the Borno State isolation centre for COVID-19, UNICEF, through RUWASSA, installed eight handwashing stations and a solar powered water pump to support COVID-19 IPC measures. In three camps, UNICEF supported the installation of an additional 11 hand washing facilities to increase access to 1,100 vulnerable people.

In Borno state, An additional 65 Community Based Hygiene Promotion Volunteers were trained on COVID-19 risk communication in Rann and 885 COVID-19 IEC materials were distributed in Rann, Dikwa, Jere, Konduga and MMC LGAs during hygiene promotion campaigns where 10,345 individuals were reached.

In Adamawa state, 2,000 COVID-19 prevention posters were distributed to private health facilities, while 180 soap tablets were provided to a COVID-19 isolation center with an average of 20 person capacity in Adamawa state to support IPC measures.

**Education**

With continued technical assistance from UNICEF, the Federal and State Ministries of Education provided opportunities to children to engage in learning through alternate home-based learning such as radio, television, online and take-home learning resources. Thus far, over 10 million children are accessing learning and other academic opportunities through alternate home based facilities in 22 states.5

Continued support is also being provided in mapping, contextualising and development of educational scripts for radio and TV programmes. Support was provided in the development of communication and educative materials such as leaflets, audio and visual materials, kids books which were disseminated to over 13 million children across 36 states and FCT. Small-scale assessment tools are being developed to measure the progress in learning to ensure continuity and knowledge acquisition of children. Currently, remote monitoring tools such as U reports, WhatsApp’s groups, google forms are operational to monitor and measure progress against the COVID-19 education response plan.

**North-east Education response**

In Borno state, school radio programming successfully began through Dandalkura FM Radio (98.9) Maiduguri. The implementation started with airing lessons in three subjects; English, mathematics, and basic science. It is estimated that approximately 120,000 (47% females) children tuned in for the lessons. Partnering with Street Child International, UNICEF supported the distribution of hygiene kits to 330 children and 684 parents to promote good hygiene practices.

With technical support from UNICEF, states of Borno, Yobe, Adamawa, Bauchi, Jigawa developed Education sector COVID-19 contingency plan. In coherence with the education sector contingency plan, radio learning programme is operationalised to reach over two million children including children from IDP and host communities to engage them in learning and academic activities.

**Child Protection**

UNICEF continued providing support to Almajiri children separated from their parents and affected by COVID-19. In Kaduna, 12 out of the 55 children who tested positive to were discharged having recovered from the disease, while 210 out of a total 631 Almajiri children placed at the temporary shelter were reunited with their families. Another 115 Almajiri children are receiving psychological support at a temporary shelter in Gombe while waiting to be reunited with their families, while an additional 331 children are expected to arrive from Adamawa. In Borno and Yobe, 64 children (32 girls, 32 boys) and 59 (31 girls, 28 boys) new arrivals were provided with appropriate alternative care arrangements. 18 out of 28 children (all boys) deprived of their liberty were released from the remand home in Katsina State as part of the ongoing decongestion programme in the face of the COVID-19 response.

In accordance with COVID-19 safety protocols, UNICEF supported a step-down training of 35 community volunteers in Ebonyi state as part of ongoing community sensitization of COVID-proofed integrated child protection messaging. Inter-generational house to house community mobilization sessions on ‘End FGM’ with integrated prevention of COVID-19 messages was conducted in three communities in Osun state with 484 persons reached in 39 households (287 girls, 109 women and 88 men). 12 radio stations aired the End FGM jingles and prevention of COVID-19 messages while #endcuttingirls messages were uploaded on six media platforms (Twitter, Instagram, Facebook, You Tube, Web site.

---

5 Kano, Katsina, Jigawa, Borno, Yobe, Kaduna, Niger, Nasarawa, Adamawa, Bauchi, Gombe, Taraba, Zamfara, Sokoto, Ogun, Oyo, Osun, Ekiti, Ondo, Edo, Enugu and Bayelsa.
and WhatsApp). The potential reach of the messages on Twitter between 8-13 May 2020 was 43,801 persons.

UNICEF also supported birth registrars to reach out to their communities and at the health centers to register births during the immunization process across the country. Between 1-30 April 2020, at least 651,095 under-5 children (330,874 girls, 320,221 boys) were registered and out of the 651,095 under-5 registered during the COVID-19 lockdown, at least 55 % or 360,868 (181,122 girls, 179,746 boys) newborn were registered.

UNICEF supported the Federal Ministry of Women Affairs in convening the 10th Technical Working Group meeting on Ending Violence against Children (TWG EVAC). The virtual meeting deliberated on the process, structures, timeframe for the National Plan of Action on Ending Violence against Children in Nigeria. The TWG deliberated on the ongoing response to COVID-19 pandemic as it affects violence against children including validation of child protection messages targeting children, parents and the general public. Members further considered ongoing response to release children deprived of their liberty across the states, the prevailing challenges and proffered way forward in accelerating actions to hasten their release.

North-east Child Protection response
A total of 2,265 children (1,703 girls, 562 boys) and adolescents; 512 community members (362 women, 150 men) and three GBV survivors (all girls) received MHPSS and awareness on COVID-19 preventive measures including handwashing demonstrations across CFS and communities in over ten LGAs in Borno State. In Maiduguri, Bama and Biu LGAs, the MHPSS services were provided via telephone.

UNICEF also reached 359 parents (151 women, 208 men) and 58 children (33 girls, 25 boys) through community-based sensitization on hygiene promotion. The participants, including members of child protection committees, were taken through practical demonstration of hand handwashing, and social distancing in all UNICEF supported CFS centers located within MMC/Jere and Konduga.

42 personnel (21 women, 21 men) from UNICEF partners and child protection community volunteers were trained on GBV prevention, risk mitigation and case management, clear guidelines and referral mechanisms for survivors. In Bama, 31 survivors (17 girls, three boys and 11 women) who had experienced violence were reached with support services including referrals for health, counselling, family mediation integrated with COVID-19 preventive measures.

A total of 60,324 persons (3,898 boys, 3,556 girls, 19,215 women, 31,088 men, and 2,570 who indicated neither their age nor gender) in Nigeria were reached with protection against sexual exploitation and abuse (PSEA) messages through the U-Report platform and PSEA posters on how to access safe and secure reporting channels for allegations of sexual exploitation and abuse. Of this total, 19,765 persons (26%) were from conflict affected Borno, Adamawa and Yobe states, while the remaining were reached across the nation. In addition, the PSEA reporting channels received 71 calls and 25 messages from the dedicated phone line and 14 email communications from the dedicated email account from 19 states.

Most of the callers sought for more information about PSEA, while a few reported cases of VAC and GBV and were referred to relevant services, while others called regarding accessing humanitarian aid.

Supply
UNICEF provided 29,000 (60ml) hand sanitizers to the National Center for Disease Control (NCDC) as part of its contribution to the COVID-19 response.

Adaptations to ongoing UNICEF programmes
UNICEF continues to support the federal and state governments in the delivery of essential services. Quantification of PPEs for community health workers under the CARAMAL project was done in Adamawa state. Discussions are ongoing at national and state level to explore ways to engage young people and youth in COVID-19 response involving generation unlimited (Gen-U), Innovation unit and NGOs. UNICEF in Akure adapted its programming to support state governments to continue provision of MNCH services and effectively monitor service delivery in the health facilities. In Ogun state, immunization sessions were conducted as planned. Furthermore, UNICEF Akure FO supported community sensitization in the state, which contributed to improved clients’ patronage for routine immunization during the month of April. In Ogun state, UNICEF supported the COVID-19 Command Center, which was launched to strengthen routine immunization (RI) services during lockdown so as to prevent post-pandemic outbreak of vaccine preventable diseases. The teams used an applied checklist to monitor coverage, vaccine availability, ante natal care (ANC) services, use of PPE and IPC compliance of Health workers.

7 Adamawa, Abuja, Lagos, Nasarawa, Ibadan, Borno, Delta, Benue, Kaduna, Akwa Ibom, Cross River, Yobe, Gombe, Ondo, Taraba, Kano, Ebonyi and Imo
The emergency procurement process for WASH projects reprogrammed for COVID-19 response has progressed rapidly with the opening of bids for facilities in eight states (Kano, Yobe, Jigawa, Bauchi, Benue, Katsina, Kaduna and Zamfara states). State and LGA supervisors have been mobilized to ensure quality supervision of works and contract management. In four UNICEF supported LGAs in Benue state, WASH units reviewed strategies and plans for community approaches to total sanitation to adjust tools to respond to COVID-19 prevention protocols.

**Funding Overview and Partnerships**

The Nigeria CO has developed an updated response plan outlining gaps and needs, COVID-19 proofing measures and response activities across all sections. USD 65 million is requested to support the government to respond to COVID-19 and reach an estimated 20 million Nigerians. ECHO Nigeria has provided UNICEF with 1.2 million Euros to support in risk communication and life-saving health and WASH supplies.

**External Communication**

UNICEF has aligned with global campaigns on COVID-19 and has been disseminating information through its social media network ([Twitter](https://twitter.com), [Facebook](https://facebook.com), [Instagram](https://instagram.com)).

- A story highlighting the lifesaving work of health workers in saving newborns in hard-to-reach areas was published for International Day of the Midwife. The story was featured on UNICEF global channels as part of the “Every Child Alive” campaign.
- Social media posts this week focused on eliminating stigma for COVID-19, the importance of children continuing education and how parents can help to create a sense of normalcy for children.
- A press release highlighting the risks faced by displaced children in the COVID-19 crisis was issued to media and received widespread media coverage, including a television interview by the UNICEF Nigeria Rep on TVC.
- A social media pack was created for the NCDC to assist in NCDC amplification of child rights messaging in its communications.

### Annex A

#### Summary of Programme Results

<table>
<thead>
<tr>
<th>Sector</th>
<th>UNICEF and IPs Response</th>
</tr>
</thead>
</table>
|                                             | 2020 target | Total results

#### Risk Communication and Community Engagement

- **Number of people reached on COVID-19 through messaging on prevention and access to services**: 22,000,000
- **Total results**: 17,595,190
- **Number of people engaged on COVID-19 through RCCE actions**: 22,000
- **Total results**: 18,855
- **Number of people sharing their concerns and asking questions/clarifications for available support services to address their needs through established feedback mechanisms**: 2,020,000
- **Total results**: 601,586

#### WASH and IPC

- **Number of people reached with critical WASH supplies (including hygiene items) and services**: 1,340,782
- **Total results**: 248,889

#### Health

- **Number of children and women receiving essential healthcare, including prenatal, delivery and postnatal care, essential new-born care, immunization, treatment of childhood illnesses and HIV care in UNICEF supported facilities**: 6,061,266
- **Total results**: 1,543,758
- **Number of healthcare workers within health facilities and communities provided with Personal Protective Equipment (PPE)**: 780,586
- **Total results**: 27,184
- **Number of healthcare facility staff and community health workers trained in Infection Prevention and Control (IPC)**: 20,000
- **Total results**: 24,718
- **Number of healthcare providers trained in detecting, referral and appropriate management of COVID-19 cases**: 8,548
- **Total results**: 18,712

#### Nutrition

- **Number of children 6-59 months admitted for treatment of severe acute malnutrition (SAM)**: 558,189
- **Total results**: 66,330
- **Number of caregivers of children aged 0-23 months reached with messages aiming to protect breastfeeding in the context of COVID through national communication campaigns**: 656,000
- **Total results**: 180,676

#### Education

- **Number of children supported with distance/homebased learning**: 17,500,000
- **Total results**: 10,014,940

#### Child Protection and GBV

- **Number of children without parental or family care provided with appropriate alternative care arrangements**: 29,500
- **Total results**: 1,573
- **Number of children, parents and primary caregivers provided with community based mental health and psychosocial support**: 2,605,000
- **Total results**: 102,219
- **Number of children and adults that have access to a safe and accessible channel to report sexual exploitation and abuse**: 498,067
- **Total results**: 121,439
- **Number of UNICEF personnel and partners that have completed training on VAC/HP/GBV risk mitigation and referrals for survivors**: 1,121
- **Total results**: 473

#### Social Protection

- **Number of households (affected by COVID-19) receiving humanitarian multi-sector cash grant for basic needs**: 120,000

---

8 Results are cumulative from March 2020

9 Target is calculated as all children with SAM from March 2020 to December 2020 including HRP, HRP addendum and estimated caseloads

10 Indicator broken down to 5,000 CP and 2,000,000 Education and 100,000 CP and 500,000 Education (NE)

11 Indicator broken down to 250 CP and 500 Education and 221 CP and 150 Education (NE)
