Situation Overview and Humanitarian Needs

As of 8 June, there are 12,801 reported cases of COVID-19 in Nigeria. Over 79,984 people have been tested with 35 states and the Federal capital Territory (FCT) having reported at least one confirmed case. Within the reporting week, states that reported the highest number of cases were Lagos, Kano, Federal Capital Territory, Katsina, Borno and Jigawa. Of the total admitted, 4,040 cases have been discharged and there have been 361 deaths recorded.¹

The Federal government of Nigeria commenced phase two of easing the lockdown with relaxing the nationwide curfew to 10:00 PM – 4:00 AM daily, however, healthcare workers and journalists are exempted from this curfew. Banks have resumed normal working hours, while government offices will be open 9:00 AM – 2:00 PM, Monday to Friday. The ban on interstate movement remains in effect except for agricultural produce, petroleum products, manufactured goods, and essential services. Face masks or coverings are mandatory in public settings and handwashing/sanitizing practices must continue to be followed, though observations have shown high levels of non-compliance.

All airports remain closed to domestic and international travel, except for emergency flights. The Presidential Task Force (PTF) is considering plans to reopen airports for domestic flights by 21 June if proper protocols are put in place by the aviation industry. The government have also banned gatherings of more than 20 people outside of a workplace. In addition, the relaxation of restrictions on places of worship was announced. This will be based on guidelines issued by the PTF and State governments.

UNICEF’s COVID-19 response

RCCE/C4D

UNICEF continues to focus on sensitization and the capacity building of partners in all targeted states. In addition, emphasis have also been placed on providing technical support.

Voluntary community mobilizers (VCMs) in all three states of Sokoto Field Office have been trained and equipped with face masks and soaps to sensitize communities on COVID-19 as well as creating awareness on measles. Training of the additional 1,000 community mobilizers is ongoing who will support in non-VCM covered areas reaching all households with messages on COVID-19 prevention. In Adamawa 1,808 town announcers were trained to support the dissemination of key messages on COVID-19.

UNICEF Kano Filed Office supported the State Ministry of Health in building the capacity of 300 Civil Society Organisations and media organizations on COVID-19 with support from DFID. An engagement between the Kano State RCCE pillar and the Kano State Directorate of the National Orientation Agency to promote joint planning and synergy was facilitated by UNICEF.

UNICEF Akure office worked with the Emergency Operations Centre (EOC) and risk communication pillar to conduct trainings for health educators and Community Mobilization Officers in Ondo and Ogun States. Additionally, media personnel were also trained on symptoms, prevention and objective reporting on COVID-19.

A ‘COVID-19 Talk’ radio talk show was aired for a reporting period with the stations providing 270 minutes of free airtime in Enugu State. The key issue covered by the programmes during the week is fear and stigma. In Akure, 21 radio stations aired jingles on COVID-19 free of cost.

Religious leaders are actively engaged in the COVID-19 response: The Emir in Zamfara state is helping to resolve rumours, stigma and non-compliance of risk mitigation measures for COVID-19. In Kebbi state, orientation of religious leaders, tracking and addressing of rumours and the sensitization of communities is ongoing. Mosque announcements during Friday prayers continued in six central mosques in six LGAs.

A group of 90 representatives in Enigu drawn from the community, representatives of traditional leaders, religious leaders and professional associations led by the Nigeria Medical Association in Ebonyi, Anambra and Imo states committed to provide COVID-19 awareness and prevention messages to the community. In Kaduna 22 Temporary

¹ COVID-19 SitRep 101 Monday, 8th June 2020
Outreaches in high burden areas. UNICEF supported with State EOCs to support health facilities to conduct community level reporting tools. While also working closely, UNICEF is supporting the development and dissemination of contact-tracing, isolation and reporting.  

Care workers across all LGAs on case-finding, investigation, community volunteers, community informants and health exercise. UNICEF is also supporting the training of (with 24 positives) picked up in Abia in one day of the case-finding has been rolled out across states with 240 samples for the roll out of GeneXpert training. Community case finding and sample collection; strengthening data based surveillance for COVID-19 to improve active case finding and sample collection; strengthening data management across all levels by implementing Data Quality Improvement Plan, and conducting routine data validation at state and LGA levels, to improve on quality.

Polio VCMs in Borno and Yobe continue to disseminate information to small groups on COVID-19. VCMs continue to combine the use of the telephone tree and house to house for COVID-19 surveillance; and follow-ups with caregivers on routine immunization with RI intensification while observing physical distance. In six LGAs in Borno (Bayo, Biu, Kwaya Kusar, Askira/Uba, Gubio and Hawul), mobilizers continued sensitizing caregivers on COVID-19 who are further cascading the awareness in the community.

The public information vans broadcasting COVID-19 information in selected communities and neighbourhoods reached 98,000 community members (48,290 women and 49,710 men) respectively. 1,691 religious leaders were sensitized on COVID-19 and with easing of lockdown, 5,907 children were reached in 85 Tsangaya schools and announcements were made during prayers at 361 mosques and churches.

**Health**

UNICEF support to the COVID-19 health response continues under the different functional areas lead by the Presidential Task Force. In the Epidemiology and Surveillance pillar, UNICEF, along with partners, is supporting community-based surveillance for COVID-19 to improve active case finding and sample collection; strengthening data management across all levels by implementing Data Quality Improvement Plan, and conducting routine data validation at state and LGA levels, to improve on quality.

UNICEF continues to support the Testing and Laboratory pillar of the PTF. 29 molecular labs are currently operational in the country. A two-day training plan has been developed for the roll out of GeneXpert training. Community case finding has been rolled out across states with 240 samples (with 24 positives) picked up in Abia in one day of the exercise. UNICEF is also supporting the training of community volunteers, community informants and health care workers across all LGAs on case-finding, investigation, contact-tracing, isolation and reporting.

UNICEF is supporting the development and dissemination of community level reporting tools. While also working closely with State EOCs to support health facilities to conduct outreaches in high burden areas. UNICEF supported:

- an in-dept analysis of healthcare workers infection in Bauchi state.
- state/LGA level IPC training in Osun state – 290 trained (PHC OIC, medical personnel at tertiary, secondary, and private health facilities, ambulance drivers, burial teams and morticians) from 27-30 May 2020.

Ongoing technical support is being provided for the planning of LGA and ward level training of health care workers (WDCs, VCMs, CHIPS agents and CORPS) on PHC Preparedness and Response, commencing from June 08 across the states.

In Kano state, UNICEF is supporting the on-going pilot of community-based sample collection and testing process in Kano Municipal Council LGA. Technical support was provided for the quantification of IPC commodities in five high priority PHCs and development of a new patient flow chart and identification of triage station in Kano.

In Abia state, UNICEF supported the logistics pillar of the State EOC in capturing and tracking commodity transactions in the database, and review of State Incident Action Plan in line with the expected World Bank funding. In Benue state, UNICEF is supporting the planning process for the training of PHC workers and sensitization of community volunteers in Gboko LGA.

In Cross River state, UNICEF supported the training of 180 LGA and state PHC health care workers on vaccine security and infection prevention and control. In Enugu state, UNICEF supported the second batch of integrated training on case management, IPC and surveillance for 40 frontline health care workers, bringing the total number of trained health care workers to 100. In Kebbi state, UNICEF supported the training of 300 community volunteers on contact tracing and 312 Community Health Extension workers on infection prevention and control.

In Bauchi state, the reference laboratory was activated this week, with UNICEF actively supporting the preparatory activities, training and inspection of the facility by NCDC. In Ondo state, UNICEF supported the training of 40 DSNOs and 82 community volunteers on active surveillance, case definition, referral and contact tracing to support detection and referrals of COVID-19 cases in the State. In Lagos, UNICEF is working closely with the IPC pillar of the State EOC to support the private sector and airlines with IPC training as the Country restarts the economy gradually.

In Kaduna state, UNICEF is supporting in the identification of an alternative iso-treatment centre in Zaria and activating home based care approach for selective cases. UNICEF VCMs and their supervisors conducted a House to House active COVID-19 and AFP case search in 34 wards of nine LGAs with confirmed COVID-19 cases in the community. Six AFP cases were identified in 40,258 houses visited over a three-day period.

In addition, the UNICEF backed vucational centers are sensitizing caregivers on COVID-19 who are further cascading the awareness in the community.
North-east health response

In the north-east, UNICEF trained 392 frontline health workers and 1001 community resource persons from the three states on case identification, referral and Infection Prevention and Control including standard precautionary measures such as environmental cleanliness & disinfection, donning and doffing of PPEs, etc. UNICEF also distributed 100 pieces of disposable aprons, 30 packs (3,000 pcs) of hand gloves and 756 pieces of facemasks to UNICEF supported health facilities in Borno and Yobe States.

WASH

Hygiene Promotion and Distribution of IEC materials

During the reporting week, awareness on COVID-19 prevention emphasizing on hand washing, and IPC protocols was carried out through ward officers, volunteer hygiene promoters, town announcers with motorized public address units at community level with at least 45,800 people reached during the week in different LGAs and in Benue (including nine IDP camps), Jigawa, Kano and Katsina states.

In Ogbadibo LGA of Benue state, UNICEF WASH Facilitators, in collaboration with LGA WASH units trained 102 persons drawn from PHCs personnel and households in 13 council wards on the modalities COVID-19 prevention and basic hygiene.

Coordination and Technical Support to Government

UNICEF continues to provide coordination and technical support to state and LGAs’ COVID-19 EOCs, Task Force and Prevention Campaign committees in identifying WASH gaps and implementing appropriate WASH interventions across all WASH project states. Government partners (RUWASSAs) in Ekiti, Ondo, Osun were supported to update the functionality status of water facilities in health care facilities (HCF), communities and public places, in preparation for government interventions to rehabilitate non-functional facilities in those states which will ensure safe IPC in HCFs and access to WASH services in communities and public places.

North-east WASH response

During the reporting week, 180 COVID-19 awareness and prevention posters were distributed by LPD and CIDAR in Rann and Pulka LGAs, while 8,897 persons were reached with key messages on COVID-19 prevention and control in Pulka and Rann LGAs of Borno. UNICEF WASH partners continue to conduct water chlorination at 113 water points across seven LGAs. An estimated 4,554,328 litres of water were chlorinated at the 113 sources. Two community clean-up campaigns were conducted in Rann LGA to support hygiene promotion practices.

Education

UNICEF Nigeria is providing technical assistance to Federal Ministry of Education (FME) and state governments to mitigate the immediate impact of school closures particularly for more vulnerable and disadvantaged communities. Support is provided to facilitate the continuity of education through alternate home-based learning platforms; implementing safe school operations and enhancing systemic capacity to address children’s safety, wellbeing and resilience for future shocks.

With continued technical assistance from UNICEF, Federal Ministry of Education and State Governments of Education are engaging children in with learning through alternate home-based platforms such as radio, television, online/internet based and take-home learning resources. Thus far, an estimated over 20 million children are accessing learning and other academic opportunities through these alternate home-based modalities across 36 states and the Federal Capital Territory. Continued support is also provided in mapping, contextualising and development of scripts for radio and TV programmes.

UNICEF is providing technical support to Kano, Kaduna, Niger, Katsina, Bauchi, Enugu and Akure states in operationalization of monitoring mechanism to understand the coverage and the effectiveness of alternate learning programme. Further, support was provided to FME for the development of SOPs and guidelines on school safety and the preparation for the re-opening of schools.

North-east Education response

The formation of radio reading clubs is in progress with an estimated 30 clubs formed across the LGAs in Borno state with more anticipated.

Child Protection

UNICEF continued to strengthen interventions to protect Almajiri children and support their family reunification in the northern states as well as enhancing community engagement to address violence against children, FGM and other protection concerns affecting during the COVID-19 pandemic.

Relocated Almajiri children continue to be registered using the CPIMS mobile registration system to facilitate effective service provision through integrated child protection case management system. To date, 1,830 Almajiri children (1,790 boys, 40 girls) have been registered across northern states of Adamawa, Borno, Kaduna and Yobe. At least 1,496 (82 percent) of the cases registered in Kaduna (1,456 boys, 40 girls) followed by 14 percent in Yobe (225 boys), 4 percent in Adamawa (71 boys) and less than 1 percent in Borno (10

---

2 Gwoza LGA (13), Dikwa LGA (5), Jere LGA (18), Konduga LGA (1), Pulka LGA (13), MMC LGA (9) and Rann LGA (54)
boys). Of the total, 7 percent tested positive for COVID-19, 53 percent (977) were between 13-17 years old, 36 percent (664) were between 6-12 years old.

Most of the children 552 (30 percent) could not recall how many years they have been in the Almajiri system, while 28 percent had spent between 2-3 years, 26 percent for more than four years, 17 percent less or equal to 1 year.

Among the 29 Almajiri children relocated to Sokoto from Kaduna this week, one child was found to be COVID-19 positive and has been taken to the isolation centre. Of 143 Almajiri children relocated from Adamawa states to Borno (8) and Yobe (135) states, eight children tested negative for COVID-19 in Borno while 135 children tested and waiting for their test results. Preparations are underway to support the Sokoto and Gombe state ministries conduct family reunification and community reintegration of these children, including 28 Almajiri girls from within Kaduna state. Also, in Kaduna state, trained members of the multi-sectoral team are conducting regular family visits for reunified children. There are no active cases of COVID-19 among any of the children visited, while all 55 Almajiri children and two social workers who had previously tested positive for COVID-19 have now all been discharged and have recovered.

Following the increasing number of gender-based violence cases reported throughout Nigeria during the COVID-19 pandemic, the Federal Minister of Women Affairs announced the need to convene a National Virtual Town Hall Meeting on Gender-Based Violence to enhance coherence and complementarity with all sectors, while national protection and rights activities have declared a ‘GBV State of Emergency’.

**North-east Child Protection response**
UNICEF continued to provide support to children without parental care in conflict affected north-east Nigeria: 19 children (11 boys, 8 girls) were placed in alternative care arrangements after arriving at IDP camp in Bama, while children protection partners carried out 13 placement monitoring visits for children already in foster care during the reporting period and reached four standby foster parents with awareness on foster arrangement and parenting.

UNICEF and partners reached 1,937 children (985 boys, 952 girls) and 601 community members (350 women, 251 men) through community-based MHSS mostly using house-to-house campaign in IDP camps and host communities. The activities aimed at encouraging families and children to access centre-based PSS facilities once COVID-19 guidelines on physical distancing and restrictions in movements have been lifted.

A total of 5,643 persons (1,000 boys, 1,129 girls, 1,392 women, 1,728 men, and 394 who indicated neither their age nor gender) in Nigeria were reached with protection against sexual exploitation and abuse (PSEA) messages through the U-Report platform and PSEA posters on how to access safe and secure reporting channels for allegations of sexual exploitation and abuse. Out of these, 14 percent (815) were from the conflict affected Borno, Adamawa and Yobe states. This brings to total 150,562 persons (30 percent of the overall target of 498,067 persons) who have access to safe and secure channel for reporting allegations of sexual exploitation and abuse.

The programme distributed 9,756 posters in English (2,354), Kanuri (2,754), Hausa (3,678), Bura (605) and Margi (365) that increased outreach on awareness raising on the prevention of SEA and the reporting channels. The PSEA reporting channels received 35 calls and 18 messages from the dedicated phone lines from six States of Adamawa, Borno, Kaduna, River, Abuja and Ogun. Most of the callers sought for more information about PSEA, a few reported cases of VAC and GBV and were referred to GBV and child protection service providers for professional survivor assistance, while others called regarding accessing humanitarian aid.

**Adaptations to ongoing UNICEF programmes**

Virtual coordination, planning and implementation meetings with government partners and other stakeholders continues to take place across all thematic areas to support continuity of services in the context of COVID-19. Routine immunization and MNCH services are ongoing across PHCs facilities in Kano, Katsina and Jigawa States. Follow-up planning meeting was conducted with partners for stepdown virtual training on RMNCH Scorecard across the 44 LGAs of Kano State. In Ebonyi state, UNICEF is supporting the ongoing monitoring of vaccine commodity security at state and LGA levels, despite the lockdown, helping maintain vaccine potency. In Imo state, UNICEF is supporting the ongoing State Cold Store monitoring and setting up of Supply Management Training (SMT) depot for vaccine distribution and management to ensure immunization services are not overtly affected by the COVID-19 pandemic. Knowledge and skills of State Cold Chain Officers were updated on SMT.

In Kebbi state, UNICEF organized a virtual coordination meeting for health development partners with the Commissioner of Health, Sokoto and his team to discuss the impact of COVID-19 on essential health services. It was agreed to intensify active case search and restore essential health care services in all health facilities. An ICCM services review meeting was conducted across the five
zonal areas in Kebbi State, and the opportunity was utilized to train health care workers on IPC. In Bauchi state, UNICEF provided technical support for LGA level PHC data validation and review meeting. Financial and technical support was provided to nine HTR mobile teams for delivery of integrated health services in 144 HTR settlements across nine LGAs in Bauchi. Work is ongoing for data visualization with a data validation visit to Toro LGA in Bauchi. UNICEF provided technical support to ICCM taskforce meeting in Adamawa state. In Bayelsa state, SERICC meetings commenced to proffer solutions to the declining routine immunization coverage in the State. Bilateral meetings were held with the Executive Secretary of the Bayelsa State Primary Health Care Board and SERICC to advocate for continued distribution of vaccines to the last mile as well as supervision and retrieval of data from health facilities and LGAs.

UNICEF Akure is supporting the Oyo State Ministry of Health to conduct deep dives to assess State and LGA supply side determinants responsible for poor maternal and neonatal health indicators in the State. This will guide planning and implementation of targeted context specific strategies to improve maternal and neonatal care within the state. UNICEF continues to work with Oyo and Osun states to improve the development and further strengthen the institutionalization of the regular use, interpretation of RMNCAH score cards at state and LGA level to guide decision makers in acting on the score cards to improve State programmes.

In Lagos, UNICEF continues to support various TWGs remotely. Preventative actions such as social distancing have been implemented by health care workers in all primary health care sites, with a reduction of people inside facilities during immunization and other PHC service delivery and a suspension of outreach services. Refill of lifesaving ARVs for PLHIVs are being provided for 3-4 months by care providers to reduce the risk of exposure at facilities. As part of UNICEF support to elimination of Mother to Child transmission of HIV in Kaduna State, 23 PMTCT FP were financially supported to participate in the training, aimed at COVID proofing the PMTCT response at facility and LGA levels. UNICEF supported review and bottle neck analysis of the PMTCT/MCH service delivery using the Q1 2020 scorecard findings. UNICEF will also support the conduct of a deeper dive and development of a decentralised COVID proof PMTCT/MCH service uptake improvement action plan for the state. In the NE, despite the outbreak, integrated PHC services are being delivered in the region with 219,061 individuals reached, of which 105,155 children are under 5 years.

In Sokoto state, UNICEF is supporting community engagement and dialogues with key opinion leaders has been organised through the EU Spotlight Initiative, leading to the establishment of community surveillance teams, with over 120 champions to end violence against children and other harmful practices. UNICEF also supported the training of 39 volunteers trained in Ebonyi state on interpersonal communication on EndFGM, EndVAC, EndVAWG, accessing birth registration services as well as COVID-19 prevention and risk management. Trained volunteers conducted house-to-house visits in seven communities, in addition to the 130 households and 771 household members across seven communities reached the previous week, while in Ekiti, Osun and Oyo states, 30,745 persons in 4,433 households comprising of 12,659 girls, 10,021 women and 8,065 men were reached. Radio and television broadcast of EndFGM jingles translated into English, Pidgin and Yoruba languages reached an estimated 485,089 people as at 3 June 2020.

**Funding Overview and Partnerships**

The Nigeria CO has developed an updated response plan outlining gaps and needs, COVID-19 proofing measures and response activities across all sections. USD 65 million is requested to support the government to respond to COVID-19 and reach an estimated 20 million Nigerians. ECHO Nigeria has provided UNICEF with 1.2 million Euros to support in risk communication and life-saving health and WASH supplies.

**External Communication**

UNICEF has aligned with global campaigns on COVID-19 and has been disseminating information through its social media network ([Twitter](https://twitter.com), [Facebook](https://www.facebook.com), [Instagram](https://www.instagram.com)).
