Situation Overview and Humanitarian Needs

As of 05 July, there are 28,711 reported cases of COVID-19 in Nigeria. 152,952 people have been tested with all 36 states and the Federal capital Territory (FCT) having reported at least one confirmed case. Eight states including Lagos, Federal Capital Territory, Oyo, Edo, Delta, Kano, Rivers and Ogun are responsible for over 70 percent of the cases recorded in Nigeria.1 Of the total admitted, 11,665 cases have been discharged and 645 deaths have been recorded.

The Presidential Task Force (PTF) maintained the closure of all day-care and primary schools until further evaluation, except for pupils sitting for the common entrance into secondary schools. Secondary and tertiary schools are also to remain closed except for exiting junior secondary three (JS3) and senior secondary school three (SS3) students who are to resume as soon as possible for preparation for exams. All schools are to ensure adherence to the approved protocols for reopening of schools such as face masks and social distancing measures. They also announced that Abuja and Lagos airports will resume domestic operations on 08 July while Kano, Port Harcourt, Owerri and Maiduguri will resume as of 11 July. Remaining airports will resume 15 July while the date for the resumption of international flight operations is yet to be announced.

In Borno, Adamawa and Yobe states, 5,595 tests have so far been conducted (Borno 4,442, Adamawa 967 and Yobe 186 ). Yobe’s testing rates have been consistently low and coordination meetings have been sporadic over the past month, which could indicate that there is a much higher number of cases than the reported 61.

UNICEF’s COVID-19 response

RCCE/C4D

UNICEF continues to focus on RCCE by providing technical support and capacity building in the 17 focus states. UNICEF, through Volunteer Community Mobilizers (VCMs) in Kebbi, Sokoto and Zamfara continue to conduct house to house visits to create awareness on COVID-19 and measles and its prevention through demonstration of hand washing with soap and water. The wives of the Governors in all three states are engaged in mobilization and sensitization of the community and live interactive radio programs on COVID-19 and measles awareness. High risk settlements mapping is ongoing to improve targeting in non-VCM settlements and intensify sensitization activities. Worshippers in churches and mosques were sensitized on the use of face masks during services and sermons, while the Polio survivors’ group is engaged in the sensitization of the community at public markets, Majalisas, car parks and sports venues.

UNICEF conducted sensitization meetings in 11 Local government areas (LGAs) in Niger state with the support of frontline volunteers and consultants to increase awareness on COVID-19, additional targeting of temporary market sites in the metropolitan LGAs was included. Community engagement activities across 23 LGAs reached over 8,588 people including traditional leaders, men and women. 138,000 Information Education and Communication (IEC) materials on COVID-19 were produced and disseminated through the state government to reach an average of 690,000 persons. During Jumma prayers announcements were made in six central mosques in six LGAs reaching an estimated 2,100 people. An additional 2,150 people in seven churches in four LGAs were also sensitized. Pregnant women and caregivers during routine immunization and ante-natal care were targeted with messages on physical distancing, proper use of facemasks and handwashing with soap.

UNICEF Akure office sensitized 74 champion teachers in schools on prevention of the spread of COVID-19 in schools in three LGAs of Oyo state. Other activities targeted OKADA riders and Ondo Yaba market-goers emphasizing the use of face masks, maintaining physical distancing and proper handwashing with soap under running water.

In Enugu state, airing of jingles is ongoing on radio, television and through video skits. ‘COVID-19 Talks’, the joint radio magazine programme by radio stations in Enugu completed its eighth week on air and in the last two weeks, running for 540 minutes in total. The programme will continue for another 12 weeks. 54 people participated in the vox pop of the radio magazine programme, “COVID-19 TALK’ to express views and concerns on the issues of fear/stigma that has accompanied the outbreak of the COVID-19 pandemic.

UNICEF Lagos office, under RCCE Pillar distributed IEC materials across the 20 LGAs in Lagos State while public information vans broadcasted messages in 11 high burden LGAs of Lagos State. A programme on COVID-19 was aired on NTA, LTV, Channel 8 and Bond FM Lagos to provide information on COVID-19 and to combat misinformation and stigma.

---

1 COVID-19 Situation Report 128 Sunday July 5th
https://ncdc.gov.ng/diseases/sitreps/?cat=14&name=Am%20update%20of%20COVID-19%20outbreak%20in%20Nigeria
North-east RCCE/C4D response
UNICEF Borno office continues to engage communities through VCMs and other caregivers by disseminating information on prevention on COVID-19. 863 religious leaders were sensitized who in turn disseminated COVID-19 messages in 362 mosques and churches while Tsangaya schools with 6,268 children were also sensitized on measures to prevent COVID-19.

Health
UNICEF is providing continued support to the COVID-19 health response under the different functional areas lead by the Presidential Task Force (PTF). In the Epidemiology and Surveillance pillar, UNICEF, along with partners, is supporting the DQIP (Data driven quality improvement in primary care) process to allow for a more effective and efficient response. Hotspot identification criteria were agreed upon and on this basis, 11 LGAs from four states were identified. As next steps, UNICEF is supporting the development of an LGA-specific implementation plan aimed at mitigating further transmission in these hotspot locations.

UNICEF continues to support the Testing and Laboratory pillar of the PTF. During the reporting period, testing has increased 40% which can be attributed to the continuous support and mentoring the states received to improve sample collection and active case finding. Optimization of labs is ongoing, with training and activation completed in Benue and Anambra States, while Bauchi, Nasarawa, Niger, Abia and Rivers are in progress for optimization.

Under Infection Prevention and Control (IPC), a waste management committee has been constituted to conduct a quick assessment of treatment centres. UNICEF is working closely with the IPC pillar of the PTF for the development of training modules on waste management and an e-learning platform for IPC.

For case management, UNICEF is working closely with the Federal Ministry of Health for the training of 2,120 Health Care Workers (HCWs) from Federal Tertiary Hospitals and Institutions across 36+FCT states. These trainings are scheduled in July and will be implemented in two phases – a national training of trainers and cascade trainings at the state level.

At the state level, UNICEF Field Offices continue to provide ongoing technical support to the state Emergency Operation Centres (EOCs) on COVID-19 response, participating in coordination team meetings and providing technical and operational support to the different pillars. UNICEF continues to support intensified active case finding contact tracing and follow up in all affected settlements and communities across the states.

- In Kaduna state, UNICEF supported the training of 35 HCWs from private health facilities on IPC and activation of Yusuf Dantsah Memorial Hospital COVID-19 testing laboratory, bringing the number of testing facilities in Kaduna state to four. UNICEF also led the health partners group in packaging and presenting a consolidated COVID-19 Kaduna state health partners response report to the Ministry of Planning and Budget Commission.
- In Lagos state, UNICEF supported the training of 250 HCWs on prevention and care of COVID-19 cases.
- In Abia, Ebonyi and Benue states, UNICEF continues to contribute to the zonal pandemic response by helping update the supplies and capacity building database. In Benue state, UNICEF supported the State Action Committee on Covid-19 for resource mobilization from private sector and NGOs to augment COVID-19 response.
- In Anambra state, 42 laboratory technicians were trained on readiness for deployment to LGAs for COVID-19 sample collection. In Ebonyi state, 1400 HCWs were trained on COVID-19 preparedness and response.
- In Enugu state, testing has commenced at the UNTH laboratory. Technical support was provided for orientation of independent monitors for UNICEF-supported supportive supervision by the TWG/RRT. UNICEF also provided supported to Technical Adhoc Team on Covid-19 response and integrated supportive supervision by the State/LGA on cold chain activities. An additional 20 vehicles were hired and provided to the state EOC to boost contact tracing in the state.
- In Ondo state, UNICEF is supporting the capacity building of 40 laboratory scientists and technicians from Secondary and Tertiary health facilities to increase sample collection sites for COVID-19.
- In Ondo state, UNICEF is supporting the training of 584 HCWs from all the Primary Health Facilities on Infection Prevention and Control.

North-east Health response
In the North-east, UNICEF supported pre-referral treatment in Yobe state through provision of drugs and other medical consumables for management of respiratory tract infections. 283 health facility staff and community health workers were trained on Infection Prevention and Control, 133 healthcare providers trained on detection, referral and appropriate management of COVID-19 cases, and 141 healthcare providers were trained on COVID-19 surveillance.

WASH
Hygiene Promotion and Distribution of IEC materials
Awareness on COVID-19 prevention emphasizing hand washing, and COVID-19 preventive protocols was carried out through ward officers, volunteer hygiene promoters, town announcers with motorized public address units at community level with at least 164,044 people (46,519 female) reached during the reporting period in different LGAs in Bauchi, Jigawa, Kano and Katsina states. The UNICEF-trained hygiene promoters and WASH Community networks, traditional and religious leaders and COVID 19 Action Committees have continued to sensitize community members on preventive measures, signs and symptoms of COVID-19 in all eight UNICEF-focused LGAs in Benue and in the nine internally displaced person (IDP) camps. Jingles on COVID-19 awareness and prevention continue to be aired on a daily basis in English, Pidgin, Hausa, Igbo, Kanuri and Yoruba languages by various radio stations across 17 states.
Provision of Soaps and Handwashing Facilities

Through contributions from DFID/UNILEVER, UNICEF distributed 569,850 soap bars to about 64,042 households (284,925 beneficiaries – 142,462 female) and 916 healthcare facilities in Sokoto North and Sokoto South LGAs in Sokoto. Meanwhile, 35 handwashing stations with soap were provided in hospitals and other public spaces in Sokoto main town, serving an estimated 20,000 beneficiaries (10,000 female) beneficiaries.

Provision of WASH Facilities

In Ekiti and Osun state, 44,140 people (11,449 female; 21,691 U18 children) regained access to improved water sources in four HCFs, 17 schools, one market and 137 communities in Osun and Ekiti States through the rehabilitation of 160 handpump boreholes in communities, schools, primary health centres (PHCs) and marketplaces.

Coordination and Technical Support to Government

The WASH team in the field office is finalizing plans to support Ondo and Edo government counterparts to carry out rapid assessment and rehabilitation of water facilities in LGAs with high caseloads of COVID-19. Through this assessment, broken-down water facilities in health care facilities, schools, public places and communities will be identified and rehabilitated.

North-east WASH response

During the reporting week, 375 hygiene promoters were trained (146 Female) in four LGAs while 41,958 individuals (22,822 female) were reached with key messages on COVID-19 prevention and control in six LGAs. Up to 76,222 bars of soap were distributed across four conflict-affected LGAs reaching a total 19,055 beneficiaries (9,908 female).

In Adamawa state, 50 posters were distributed to two HCFs in Yola South and Girei LGA to support COVID-19 awareness and prevention. 85 persons in one IDP host community reached with 408 pieces of soaps to promote hand hygiene measures to prevent the spread of COVID-19.

Nutrition

257 health facilities (HF) continued to provide community-based management of acute malnutrition (CMAM) services and have treated a total of 124,516 children 6 – 59 months with severe acute malnutrition (SAM) since March 2020, including 21,499 in the last two weeks. SAM children have continued to receive two weeks worth of supplies of RUTF and observe COVID-19 prevention measures. UNICEF continues to support remote monitoring of planning, supply distributions, quality nutrition services delivery, data management and reporting through daily telephone calls, SMS and virtual review meetings.

A total of 85,464 caregivers of children aged 0-23 months have been reached with messages on infant and young child feeding (IYCF) aiming to protect breastfeeding and popper complementary feeding in the context of COVID-19 through interpersonal communication by health workers (HW) during the contact mothers had with the health system. HWs continued to use the Pico Projectors to carry out Food demonstrations and IYCF messages.

North-east Nutrition response

Caregivers were sensitized community nutrition mobilizers (CNM) on COVID-19 prevention using IEC materials (posters) covering a total of 48,878 males and 114,959 females. 278 UNICEF-supported health facilities provided integrated nutrition services and admitted a total of 40,152 boys and girls aged 6-59 months with SAM for treatment in the IDAs in Adamawa, Borno and Yobe states since March. Hygiene promotion and community orientation on IYCF care practices in the context of COVID-19 were conducted through the mother to mother support group meetings in five LGAs in Yobe state reaching a total of 643 males and 4,107 females.

Education

Continued technical support is being provided to Federal Ministry of Education (FME) and state governments to mitigate the immediate impact of COVID-19 pandemic on education in Nigeria. This support ensures:

- Children continue learning through home based diverse remote learning platforms such as radio, television, online programs and as appropriate for each context;
- The education system recovers well from school closure, and is ready to support children who have lost learning, and to implement safe school operations; and
- The education system has enhanced capacity and preparedness to protect children’s safety, wellbeing a learning from future shocks.

With technical assistance from UNICEF, the Federal Ministry of Education and State Governments of Education are engaging an estimated 20 million children in learning through alternate home-based platforms such as radio, television, online/internet based and take-home learning resources. Support is also being extended to mapping, contextualising and development of scripts for radio and TV programmes.

UNICEF is providing technical support to FME and states in development and dissemination of standard operating procedures and school safety guidelines for the safe reopening of schools. State governments are being supported in back to school campaigns, designing of remedial learning and catch-up programs when schools reopen. UNICEF field offices of Kano, Kaduna, Sokoto, Bauchi, Akure and Enugu were provided with critical support in the operationalization of a monitoring mechanism to understand the coverage and the effectiveness of the alternate learning programme.

---

2 Edos, Ekitis, Ongos, Osons, Oys, Plateaus, Bauchis, Kebbis, Sokotos, Zamfaras, Ebonis, Anambras, Benues, Cross Rivers, Boros, Yobes. Approximately 500,000 per state

3 In Anambra, Bauchi, Bayelsa, Delta, Ebonyi, Enugu, Gombe, Imo, Nasarawa, Niger, Kaduna, Kano & Jigawa
Furthermore, radio and TV platforms are being used to provide psycho-social support to students and teachers to boost emotional capacities to cope with various effects of COVID-19. The messaging also addresses fears of both learners and teachers regarding their safety upon school reopening, by providing information on precautionary measures both households and schools will put in place.

**North-east Education response**
With support from UNICEF, the broadcasting of home-based learning programmes through radio and TV in Bauchi, Borno, Yobe and Adamawa states is reaching over three million children. Additionally, 1,500 radio sets have been distributed to reading and radio clubs formed across LGAs of NE Nigeria to promote radio-based learning.

Teaching at the Right Level (TaRL) courses are positioned to be included in radio learning as UNICEF aims to support in targeting all out-of-school children (OOSC), including Tsangaya and Islamiya centres. This approach has the potential to have a longer-term impact in increasing access to education. A specific monitoring and evaluation tool designed to capture and analyse the impact of radio-based distance-learning is currently being finalized.

**Child Protection**
During the reporting period, 90 children (63 boys and 27 girls) between 13 and 18 years old have been released from two Correctional Homes in Lagos state. In Gombe, seven children (all males between 7-16 years) were released from the Jimeta Remand Home and reunited with their families. The offences for which they had been remanded were mainly theft, attempted theft and trespassing. UNICEF has facilitated the discussion regarding children in detention, which has been amplified during the COVID-19 pandemic. In parallel, the diversion programme supported by UNICEF in Lagos (Grace Springs Rehabilitation Home) has resumed its activities and has received 25 children (all boys between 13 and 17) who are being provided with psycho-social support and family reunification.

Almajiri children continue to be relocated to their states of origin, with 57 children (all boys, between 13 and 17) relocated from Niger and Kaduna States to Sokoto State during the reporting period. UNICEF supported the Ministry of Women Affairs with the provision of housing and medical support – four children tested COVID-19-positive and are currently being cared for in the isolation centre. All the children were profiled, and their parents identified in preparation for family reunification. In the meantime, the previous 86 children from Kebbe and Gada LGAs of Sokoto State were provided with birth certificates and are being continuing with their reintegration. UNICEF, through growing collaboration with the Governor of Kano and the Ministry of Education, now has access to the actual numbers of children moved in and out of the state since the beginning of the pandemic: 1,505 Almajiri children were moved out of Kano State while 5,436 children were received from other states.

Advocacy on COVID 19 and Child Protection concerns has continued this week with four media houses airing UNICEF radio jingles on Child Protection (Birth Registration, Child Abuse, and Family Time under COVID-19) in Cross River and Ebonyi States: 1,100 spots have been aired so far.

**North-east Child Protection response**
UNICEF supported the Yobe State Ministry of Youth, Sports, Social and Community Development to reunify two male Almajiri children repatriated from Nasarawa state to Yobe state. Both children tested negative for COVID-19 and were provided with face masks, hand sanitizers and soap in line with COVID-19 prevention and mitigation guidelines.

Awareness messages on COVID-19 preventive measures were provided to four foster parents and caregivers (two women, two men) and five children (three boys and two girls) that arrived in Jakana town in Konduga LGA. Additionally, 34 Child Protection Committee members (14 men, 20 women) were also reached with child protection awareness messages including on gender-based violence (GBV) risk mitigation and the prevention of violence, exploitation and abuse of children. The children and caregivers were provided with hygiene materials and face masks to help mitigate the spread of the COVID-19 virus.

A total of 8,853 people (2,059 boys, 2,417 girls, 3,244 women and 1,133 men) in the North-east states of Borno, Adamawa and Yobe were reached with Protection against Sexual Exploitation and Abuse (PSEA) messages through the posters on how to access safe and secure reporting channels for allegation of SEA. The PSEA reporting channel received 45 calls and 15 messages from the dedicated phone lines from 4 states (Borno, Adamawa, Kano and Yobe). Most of the callers asked for more information on PSEA; a handful of callers reported cases of GBV and violence against children (VAC) which were referred to GBV and Child Protection service providers for survivor assistance; while other calls were related to access to humanitarian aid.

**Adaptations to ongoing UNICEF programmes**
UNICEF continues to support provision of essential services in the context of COVID-19 through virtual coordination. UNICEF supported and facilitated the Kaduna State 2020 health sector Annual Operational Plan Mid-Year Review and the development of a draft plan (July to Dec 2020). UNICEF also facilitated the development of the Kaduna state RMNCHA+N conceptual framework for continuity in service delivery which was presented to the state executive council.

In Oyo, Edo and Ekiti states, UNICEF leveraged on measles social mobilization campaigns to sensitize communities on the need for routine immunization, other PHC services and to improve awareness on COVID-19. UNICEF continues to ensure appropriate monitoring of vaccine potency in the State cold stores and conducted an effective vaccine management assessment in the states and LGA cold stores in Benue, Ekiti, Osun and Edo states. In Kebbi State, a four-day training was conducted on the roll out of the
Basic Health Care Provision fund. The training was held in three zones comprising of 13 LGAs (136 wards), and 544 persons were trained. The training will be concluded this week for the remaining eight LGAs (89 Wards). UNICEF Sokoto FO participated in the Health Financing Technical working group meeting to discuss the launch and rollout of the Sokoto state contributory Health Maintenance Agency (SOCHHEMA).

In the North-east, antenatal and postnatal care services are being delivered house to house for registered pregnant women to ensure delivery of essential services and prevent defaulting and drop-outs. In the absence of government staff due to lockdown, state health facilitators were deployed to LGAs and wards to provide essential health services.

In Kano state, IYCF, growth monitoring and recipe/food demonstration, were cascaded to the community volunteers, facilitators of support groups and assistants as part of the Dietary Diversity (DD) comprehensive model in two pilot LGAs. This led to the establishment of functional IYCF, growth monitoring and recipe demonstration corners in 72 health care centers in the two LGAs.

Advocacy efforts to fund nutrition programme through domestic resources has yielded positive results. Akwa-Ibom state approved the sum of NGN 384,750 to support nutrition interventions through 10 state government ministries, departments and agencies in line with the state strategic plan of action for nutrition, In Delta State NGN 1,900,000 was approved to scale up CMAM services and N63,000,000 was released to roll out multisectoral plan on nutrition and support coordination efforts of state committee of food and nutrition.

A two-day Spotlight Initiative Media Dialogue on Ending Violence Against Children, Women and Girls was organized with 12 journalists from Cross River (6) and Ebonyi (6) states. The aim was to increase advocacy on the implementation of relevant protection laws and guide Child Rights Reporting and Ethical Response from the Media. In FCT, 36 child protection social workers and case managers were trained on integrated case management and the CP information management system to improve case management services to children. This was the first of its kind in FCT; it was coordinated through the Spotlight Initiative. The SGBV response team in Kano received seven cases of domestic violence and three cases of child abduction, while 30 Social Welfare workers from four Focus LGAs of Plateau State were trained this week on Child Protection case management and mobile data reporting (COVID-19 had delayed this activity).

Activities on FGM were sustained: virtual coordination meetings took place under the leadership of the Ministry of Health and the Ministry of Women Affairs in Osun (24 participants) and Oyo (27 participants); weekly social media messages on EndFGM and prevention of COVID-19 were disseminated; 150 law enforcement agents were made Community Surveillance Committee members and trained to monitor and report FGM activities in Ekiti state; 30 community members were trained as EndFGM champions in Osun; 60 people were trained for the establishment of a Community Based Child Protection Committee to monitor and report compliance with public declarations on the abandonment of FGM in Ekiti and Osun States; and inter-generational community dialogue meetings were held in two LGAs of Oyo and Ekiti with a total of 100 participants.

124 VCMs (62 for each of Taraba and Gombe States) acquired skills in Birth Registration (BR) via training BR processes. 108 health facility workers from 36 PHCs in each of Gombe, Plateau and Taraba States also completed BR training and will be able to contribute to data collection for the rapid SMS dashboard. In the north-east, A total of 2,743 children and adolescents (1,347 boys, 1,396 girls) and 639 community members (332 women, 307 men) were reached through community-based mental health and psychosocial support mostly using house-to-house campaign and mobile phones, in IDP camps and host communities. Out of them, 167 children (79 girls, 88 boys) had newly arrived in Bama LGA from hard-to-reach areas. 11 girls, six women and one boy who had experienced violence were reached with support services including referrals for health, counselling and family mediation, as well as COVID-19 preventive measures.

Funding Overview and Partnerships

The Nigeria CO has developed an updated response plan outlining gaps and needs, COVID-19 proofing measures and response activities across all sections. USD 65 million is requested to support the government to respond to COVID-19 and reach an estimated 20 million Nigerians.

External Communication

UNICEF Nigeria has aligned with global campaigns on COVID-19 and has been disseminating press releases, human interest stories, graphics, videos and photos through its website and social media platforms (UNICEF Nigeria, Twitter, Facebook, Instagram, YouTube).

<sup>4</sup> Results are cumulative from March 2020

<sup>5</sup> 68,200 persons reached through UNICEF advocacy/technical/mobilization support, using government funds

<sup>6</sup> Target is calculated as all children with SAM from March 2020 to December 2020 including HRP, HRP addendum and estimated caseloads

<sup>7</sup> Indicator broken down to 5,000 CP and 2,000,000 Education and 100,000 CP and 500,000 Education (NE)

<sup>8</sup> Result was reduced to remove the inclusion of FGM numbers

<sup>9</sup> Indicator broken down to 250 CP and 500 Education and 221 CP and 150 Education (NE)
