Situation Overview and Humanitarian Needs

As of 21 June, there are 20,244 reported cases of COVID-19 in Nigeria. 115,760 people have been tested with 35 states and the Federal capital Territory (FCT) having reported at least one confirmed case. 20 local government areas are currently responsible for 60 percent of the COVID-19 cases in the country. They are concentrated in FCT, Lagos, Katsina, Jigawa, Ogun, Kano and Borno States. In addition, the Presidential Task Force stated that 80% of cases are not being treated in isolation centres out of fear of stigmatization and the remaining 20% present themselves quite late. The RCCE pillar is developing plans to address challenges to reduce stigma in the community. Of the total admitted cases, 6,879 have been discharged and 518 deaths have been officially recorded.

Findings from an investigation on the multiple mysterious deaths that occurred in Kano few weeks ago, undertaken by the Irrua Infectious Diseases centre, suggested that between 50-60 percent of the deaths may be due to COVID-19, with most of the affected being over 65 years of age. This further suggests that the death toll currently recorded might be much higher, as these numbers are not collated in the national figures. Also within the reporting period, the Federal government signed a bilateral agreement with the Democratic People’s Republic of Korea on cooperation in the area of public health and medical sciences including visit and information exchanges. In their 100 days review, the PTF highlighted the following achievements:

- Increase in the number of laboratories from 2 to 30 with at least one per State;
- Over 80,000 tests have been conducted in the country;
- Over 13,000 health workers have been trained;
- Increase in procurement of testing kits and Personal Protection Kits (PPE);
- Over 5000 beds number available for isolation and case management nationwide;
- Developed guidelines for homecare and general case management;
- Over 1000 Nigerians evacuated from different parts of the world; and
- Gradual reopening the economy while balancing between lives and livelihoods.

UNICEF’s COVID-19 response

RCCE/C4D

Based on a gap analysis on community engagement as identified by the Presidential task Force and joint UN team, UNICEF intensified technical support for the capacity building of state facilitators responsible for providing leadership at the local levels in 17 focus States.

In Sokoto, the LGA facilitators supported the state health workers training on COVID-19 organized by National Primary Health Care Development Agency (NPHCDA), while 20 journalist were orientated on COVID-19 at state level. Volunteer Community Mobilizer (VCMs) continued the routine house to house sensitisation and mobilization in all targeted states while promoting testing for COVID-19. Additionally, 1000 community mobilizers were trained on raising awareness in non-VCM areas on prevention. The community was sensitized on measles and COVID-19 prevention in markets, malls, car parks and sports venues as

In Sokoto, live interactive radio programs on COVID-19 were conducted by experts on Garkuwa FM and Rima FM. 40 stakeholders including religious and traditional leaders were sensitized on COVID-19 who in turn cascaded the messages to another key 40 religious stakeholders at the LGA level.

Bauchi office continues RCCE through mobile messages and radio discussion forum and addressing stigmatization, stereotyping and COVID-19 prevention awareness in Bauchi, Taraba, Gombe, Plateau and Adamawa states. The number of religious institutions providing key messages to their followers on COVID-19 awareness and prevention were increased to 1,101 Mosques and 1,000 churches in Bauchi, Adamawa, Gombe, Plateau and Taraba states.

In Kaduna, UNICEF trained 70 persons from Civil Society Organization (CSOs), Inter Faith First Aid Groups, new RCCE members from SMOH and other volunteers on COVID-19 including messaging on stigma and testing. LGA consultants supported the NPHCDA training for maintaining PHC services

3 COVID-19 SitRep June 21st
4 National Briefing, June 8, 2020 – Remarks by Minister of Health
in the context of COVID-19 for health personnel. 22 radio discussions, aired on four stations, were conducted with religious leaders engaged as resource persons. Announcements were made during Jumat prayers in six central mosques across six LGAs reaching 480 people, while 70 people were sensitized in two churches.

UNICEF engaged representatives of ulani Associations and 450 religious leaders from 12 emirates across Kano, Katsina and Jigawa States for the dissemination of COVID-19 messages. 1,938 religious leaders across 57 LGAs in Enugu, Abia and Cross River states integrated COVID-19 messages on prevention, reporting and testing in their congregation sessions. “COVID-19 Talks”, the joint radio magazine programme by radio stations in Enugu is in its sixth week of airing and during the reporting period, the programme aired for 540 minutes at 30 minutes per episode per station. “COVID-19 Talk’ expressed the views and concerns of the community on the issues of fear/stigma that are associated with the outbreak of the COVID-19 pandemic.

UNICEF in Lagos developed and disseminated short messages on home-based care, existence of COVID-19, stigmatisation, proper use of face masks and proper hand-washing with soap. Market and community sensitisation activities continue to feature as part of RCCE pillar initiatives. The sensitization exercise conducted in Amu plank market addressed physical distancing, use of face masks and hand washing with soap.

UNICEF in Akure developed 40 standing banners on prevention and fight against the spread of COVID-19 which were displayed in public places. Oyo state used social media (WhatsApp and Facebook) to create awareness on COVID-19 prevention. The office continued to work with town announcers to sensitize communities in 18 LGAs and in collaboration with National Orientation Agencies (NOA).

North-east RCCE/C4D response
796 religious leaders were sensitized resulting in 189 mosques/church announcements and 111 Tsangaya schools with 5,373 children taught measures to prevent COVID-19.

Health
UNICEF continues to support the COVID-19 health response under the different functional areas led by the Presidential Task Force. In the Epidemiology and Surveillance pillar, UNICEF, is supporting the DQIP (Data driven quality improvement in primary care) process. UNICEF continues to support the Testing and Laboratory pillar of the PTF with testing capacity increasing with arrival of supplies (18,333 Cobas tests, 42000 Thermo fisher tests, and 15000 VTMs). Specimen collection and submission to labs continues to increase as more states continue to roll out community case finding activities.

UNICEF supported the NPHCDA led COVID-19 response LGA level step down training for an estimated 20,000 health care workers in PHCs and community volunteers across 35 states from 11-15 June 2020. The IPC pillar is reviewing and enhancing IPC practices in communities and health facilities to prepare for treatment of patients with COVID-19 and prevent transmission to staff, patients and visitors. UNICEF is supporting focused IPC interventions in high burden LGAs in four states (Kano, Jigawa, Oyo and Edo).

The case management pillar is being supported to review home-based care guidelines, and community testing scale up plan is also being reviewed. Support is being provided in piloting community sample collection and testing in 2 high burden LGAs (KMC and Gwale) in Kano state.

Bauchi FO supported the ward level training of 1200 ICCM CORPs, 483 VCMs and 48 VWSs on COVID-19 response and preparedness and the Sokoto FO supported the training of over 9,000 PHC workers and community volunteers across Zamfara, Kebbi and Sokoto states. In Ondo state, UNICEF supported the training of 61 health care workers from isolation-treatment centres and 657 health care workers from secondary and tertiary health facilities on Infection Prevention and Control.

UNICEF supported Enugu state to review the expected deliverables, terms of reference and scheduling the movement of ad-hoc technical team consisting of skilled health workers to track Persons of Interest in 11 points of entry at the interstate borders. UNICEF provided logistics support to the COVID-19 TWG/RRT to carry out supportive supervision activities in 17 LGAs of the state.

Kaduna State has expanded its COVID-19 testing capacity following the roll out of the mobile Wellness on Wheels mobile testing equipment. Selected wards of the active LGAs are targeted for community level COVID-19 case search and testing. UNICEF is fully involved in the mobilization and risk communication component of the community testing, with the deployment of VCMs and other supported community platforms. UNICEF is supporting the training of 3200 PHC health care workers on IPC, risk communication, stigma and discrimination, triaging, case identification, Notification and referral. UNICEF is also supporting the activation of the 4th COVID-19 diagnostic laboratory in Yusuf Dantsoko Memorial Hospital, with capacity to conduct both PCR and molecular test using GeneXpert.

In Lagos state, UNICEF supported the development of the IAP for the state to cover the next three months. On case management, training of doctors and Nurses on ICU care for COVID-19 patients was conducted at General Hospital Lagos.

North-east Health response
In the North-east, 49 health care workers in UNICEF supported health facilities and communities in Borno and Yobe States were provided with essential PPEs. 73 health facility staff and community health workers were trained on Infection Prevention and Control, of which 51 were also trained on COVID-19 surveillance protocols.

The provision of essential primary healthcare services continued with a new practice of starting every clinic session with sensitization on COVID-19 issues. An estimated 1046 clients/patients at OPD consultation clinics were sensitized on COVID-19 symptoms and prevention, including the need for physical distancing, use of facemask, personal and environmental hygiene practices.
**WASH**

**Hygiene Promotion and Distribution of IEC materials**

An additional 6,593 COVID-19 prevention posters were distributed across several LGAs in Plateau (6,550), Bauchi (28), Adamawa (15), and were used to complement hygiene promotion campaigns in critical locations. The distribution and placement were carried out through the respective state Rural Water Supply and Sanitation Agencies (RUWASSAs), LGAs WASH units, COVID-19 coordination teams and VHPs.

Awareness on COVID-19 prevention emphasizing on hand washing, and COVID-19 preventive protocols was carried out through ward officers, volunteer hygiene promoters, town announcers with motorized public address units at community level with at least 93,873 people (46,519 female) reached during the week in different LGAs in Bauchi (22,945) and Plateau (70,956). The UNICEF-trained VHPs and WASHCOMs, traditional and religious leaders and COVID 19 Action Committees have continued to sensitize community members on preventive measures, signs and symptoms of COVID-19, WASH and NTDs in all eight UNICEF-supported LGAs in Benue and in the nine IDP camps.

**Provision of Soap and Hand washing Facilities**

Through contributions from DFID/UNILEVER, UNICEF distributed 441,350 soap tablets to approximately 63,050 households (220,675 beneficiaries – 127,991 female) in communities, health care facilities, prisons and public places in Sokoto North and Sokoto South LGAs. Concurrently, 250 handwashing stations were provided in markets, hospitals, motor parks and other public spaces in Sokoto’s main town, serving an estimated 12,500 beneficiaries (7,500 female) beneficiaries.

**Provision of WASH Facilities**

60 latrines were desludged in health care facilities in Kebbi state to provide renewed access to sanitation for 300 patients, staff and visitors. In Ekiti and Osun state, trained Local Area Mechanics (LAMs) were engaged to assess and rehabilitate broken-down water points across seven LGAs.

A total of 16 hand pump boreholes have being rehabilitated (seven in Ekiti State and nine in Osun) in health care facilities, schools, markets and within communities. A population of 5,663 persons are (1,502 females and 2,178 children U18) benefitting from these facilities.

**Coordination and Technical Support to Government**

With UNICEF’s support, Sokoto state WASH Coordination platform was reactivated. The platform will enhance coordination of COVID-19 WASH response in the state, and meetings will hold every two weeks under the leadership of the state commissioner for water resources and was attended by relevant MDAs.

**North-east WASH response**

During the reporting week, 180 COVID-19 awareness and prevention posters were distributed and 8,897 persons were reached with key messages on COVID-19 prevention and control in Pulka and Rann LGAs of Borno. UNICEF WASH partners continue to conduct water chlorination in conflict affected LGAs with an estimated 4,554,328 litres of water chlorinated during the reporting period.

In Borno state, 436 hygiene promoters were trained in MMC LGA (155) Konduga LGA (40) Dikwa LGA (18) and Jere LGA (223). Up to 26,472 individuals were reached with key messages on COVID-19 prevention and control. 15 hand pump boreholes were repaired in MMC (4), Konduga (4), Dikwa (2) and Jere (5) LGAs, benefitting 7,500 beneficiaries. Meanwhile, UNICEF WASH partners continued to conduct at source water chlorination at 116 water points in Dikwa LGA (8), Jere LGA (25), Konduga LGA (12), Pulka LGA (13),MMC LGA (6) and Rann LGA (54). An estimated 22,928,617 liters of water were chlorinated at the 116 sources.

24 community clean up campaigns were conducted across six LGAs while 16 Hand washing facilities established in four LGAs serving an estimated 1,600 beneficiaries. To support hygiene practices to curb the spread of COVID-19 infection, 11,110 soaps were distributed in Munara Garage El Badawi Camp in Jere LGA and MMC LGA to benefit at least 300 households (1,851 affected persons). Meanwhile, 29 hygiene kits were distributed reaching 174 beneficiaries. In Adamawa state, 96 persons in an IDP camp and COVID-19 treatment centre in Yola South (58 female) were reached with 576 pieces of soaps to aid in promoting hand hygiene measures to prevent the spread of COVID-19.

**Nutrition**

308 health facilities in 16 states continued to provide treatment for children with sever acute malnutrition (SAM) in line with the community-based management of acute malnutrition (CMAM) guidelines. In total 103,017 children aged 6 to 59 months with SAM were admitted since March 2020, including 42,946 in the last three weeks. All states have adapted the implementation of treatment programme to the context of COVID-19 including the provision 2 weeks instead of one-week ration of therapeutic food.

On the prevention front, a total of 1,358,519 caregivers of children aged 0-23 months have been reached with messages on Infant and young child feeding (IYCF) since March 2020, including 457,185 caregivers reached in the last three weeks. These messages were delivered at health facility and community levels through interpersonal communication and aim to protect breastfeeding in the context of COVID-19. In Katsina, weekly interactive radio and TV programme on IYCF in COVID-19 context commenced since the last week in May and will continue for 10 weeks.

**North-east Nutrition response**

Community sensitization on Mother MUAC screening of children 6-59 months in the context of COVID-19 was conducted in Yobe covering a total of 95,847 males and 116,436 females. Caregivers were sensitized on IYCF messages and COVID-19 prevention using IEC materials (posters) in IDP camps and UNICEF-supported health/nutrition facilities in the communities by CNMs.

---

Anambra, Bauchi, Bayelsa, Delta, Ebonyi, Edo, Enugu, Gombe, Imo, Nasarawa, Niger, Kaduna, Kano, Jigawa, Ondo and Osun
**Education**

UNICEF is supporting the inclusion of psycho-social support in Radio and TV platforms to bring hope and boost emotional capacities of children to cope with various effect of COVID-19. The messaging also addresses fears of both learners and teachers with regards their safety after school re-opens by providing information on precautionary measures each family is expected to put in place.

Support was also provided to ensure continuing learning for the children from Almajiri communities. A high-level inter-sectoral meeting with four Kano State Commissioners (Education, Women Affairs, Religious Affairs, and Health) was conducted to strengthen coordination on the repatriation of the Almajiris and the abolishment of the Almajiri system of education in the State.

**North-east Education response**

With support from UNICEF and the respective states governments, the broadcasting of home-based learning programmes for Basic Education level through Radio and TV in Bauchi, Borno and Adamawa States is reaching over 3 million of children. Additionally, 500 radio sets were distributed to promote radio-based learning leading to the formation of radio reading clubs with an estimated 500 clubs to be formed across the LGAs in NE Nigerian states.

**Child Protection**

Since the start of the COVID-19 pandemic in Nigeria, state government social workers in Adamawa, Borno, Kaduna and Yobe registered 2,858 Almajiri children (including 205 girls) using the CPIMS mobile application. Of this total, 84% are children registered in Kaduna State and 4% tested positive for COVID-19. 51% were between 13-17 years old, 40% were between 6-12 years old, 2% between 0-5 years old and, 7% were above 18 years. 31% had spent more than four years in the system, 31% between 2-3 years, 19% less or equal to one year. While 19% could not recall how many years they have been in the Almajiri system.

House-to-house sensitization efforts by community volunteers in Ekiti, Osun and Oyo States reached 14,189 persons (7,254 girls, 3,277 men and 3,658 women) with integrated interpersonal communication (IPC) messages on ending violence against women and children, ending FGM, increasing birth registration and preventing the transmission of COVID-19.

The nationwide PSEA hotline received 32 calls and 12 messages from Adamawa, Borno, Kano, Yobe, Abuja and Ogun States. Most of the callers sought for more information about PSEA, a few reported cases of GBV and were referred to GBV for professional survivor assistance, while others called regarding accessing humanitarian aid.

**North-east Child Protection response**

479 children and adults (62 girls, 61 boy, 192 women and 164 men) were reached with COVID-19 awareness and sensitization messaging through community-based engagement. The activity included, sensitization and awareness creation on hygiene promotion sessions including practical demonstrations of hand washing and social distancing in line with WHO and NCDC guidelines on COVID–19.

Child protection and COVID-19 related messages were incorporated in four children’s radio programmes as well as discussions on socio-economic reintegration for vulnerable and at-risk children were aired through Peace FM in both Hausa and Kanuri languages. More than 10,000 persons were reached by these messages which focused on emphasizing the importance of using the masks and observing strict hand hygiene as well as physical distancing.

A total of 1,846 persons (453 boys, 517 girls, 578 women, and 298 men) in north-east Nigeria were reached with PSEA messages through the prevention of sexual exploitation and abuse (PSEA) posters on how to access safe and secure reporting channels for allegations of sexual exploitation and abuse. At least 4,408 posters (1,160 in English, 1,392 in Kanuri and 1,856 in Hausa) were distributed in Bama and Gwoza LGAs.

**Adaptations to ongoing UNICEF programmes**

UNICEF successfully mobilized and engaged an estimated 150 HIV prevention national stakeholders to develop an AGYW HIV prevention operational framework. Ongoing support is being provided to national and state TWGs for coordination of HIV response and implementation of UNICEF supported work plans. UNICEF in Akure is working with field office State Primary Health Care Development Agencies/Boards to develop state specific strategies to improve routine immunization coverage in the states. In Kaduna state, UNICEF is supporting implementation of all routine services through the PHC MOU implementation.

Sustained advocacy to state governments has resulted in release of 125 million naira (80 million Naira from Jigawa state, 25 million from Gombe state and 20 million from Bauchi) for the procurement of ready to use therapeutic food (RUTF) required for the treatment of children with SAM. Routine Vitamin A Supplementation have started in 2,040 Primary health facilities across seven states as an alternative to campaigns, which were suspended due to the pandemic. Data reported through DHIS2 indicate that a total of 272,888 children 6-11months and 636,598 children aged 12-59 months were reached with vitamin A and 402,798 children 12-59 months old received de-worming tablets from January to May 2020.

---

6 Akure, Ekiti, ogun, Ondo, Osun, Oyo states and Kwara state
UNICEF continues to support remote monitoring of planning, supply distributions, quality nutrition services delivery, data management and reporting through daily telephone calls, SMS, use of social media platforms, and virtual review meetings. In Jigawa State a cascade training of community mobilisers on screening, diagnosis and management of severe wasting took place in their respective communities.

During the reporting period, UNICEF, in collaboration with the Federal Ministry of Women Affairs commemorated the 2020 Day of the African Child (DAC) themed ‘access to child-friendly justice system’. Over 10,000 persons attended the high-level webinar with policymakers, child parliamentarians, Speaker of the House of Representatives, Attorney General of the Federation, Minister of Women Affairs, Executive Secretary of National Human Rights Commission and Nigeria Police Force. As an immediate follow up to the 2020 DAC, the Inspector General of Police signed the Standard Operational Procedure as a Force Order and approved the training manual on handling cases of children for in-service training of police officers.

UNICEF further leveraged the momentum of this event by holding a virtual meeting with the Presidential Committee on Correctional Service Reform and Decongestion immediately after the 2020 DAC and secured commitments by the Presidential Committee to collect relevant data from the Nigerian Correctional Service and the states government and conduct onsite hearing and release of the affected children. During the reporting period, nine children (all boys) were diverted to Grace Springs Rehabilitation Centre in Lagos State by other referral bodies including the police, social welfare and courts in the state, while in Cross River State, another six children were released from correctional service facilities, bringing the total number of children released from Cross River State Correctional Service facilities to 32 (including two girls).

In Lagos State, 60 survivors of sexual violence accessed free services at the Mirabel Centre, a one-stop facility for victims of sexual violence. In addition, UNICEF supported the convening of a Survivors Forum with 50 survivors of sexual violence and their caregivers so they can receive psychosocial services and engage in peer-support activities. As part of efforts to raise awareness, mobilize and promote positive behavioural change, UNICEF supported the development and airing of radio jingles, reaching over 2,000 adults and 1,500 secondary school children in targeted LGAs; facilitated community dialogues on the importance of reporting of violence against women and children with at least 880 community members in Sokoto State. Also, in Sokoto State, as part of a joint Spotlight Initiative, UNICEF, UN Women and UNFPA conducted a training of 37 members of the Gender-Based Violence and Child Protection Response Team. The training focused on basic principles of child protection, case management and child protection information management system (CPIMS) to strengthen their capacity to provide prevention and response services for children and women. In addition, radio and television partners (Media Pim Pim Pim) focused on different aspects of ending FGM messages in English, Pidgin and Yoruba reaching estimated at least 405,897 persons in Ekiti (123,000), Osun (168,897) and Oyo (114,000) States.

In collaboration with the Borno State Ministry of Women Affairs and Social Development (BSWASD), UNICEF supported the family tracing and reunification of 65 children (all boys) formerly associated with non-state armed groups (NSAGs). The children were released from Giwa military barracks and had been staying at the Bulumkutu Interim-Care Centre where they received child protection services including PSS and skills training as well as basic hygiene promotion activities to prepare their social and economic community reintegration. A total of 2,226 children (1,099 girls, 1,127 boys) and 685 community members (337 women, 348 men) received community-based MHPSS through house-to-house visitation in IDP camps and host communities. The activities aimed at maintaining PSS services to the most vulnerable and at-risk children in north-east conflict-affected Nigeria as well as to get consult caregivers and children on accessing access centre-based PSS using the COVID-19 standard operating procedures and guidelines on social distancing and remote programming.

### Funding Overview and Partnerships

The Nigeria CO has developed an updated response plan outlining gaps and needs, COVID-19 proofing measures and response activities across all sections. USD 65 million is requested to support the government to respond to COVID-19 and reach an estimated 20 million Nigerians.

### External Communication

UNICEF has aligned with global campaigns on COVID-19 and has been disseminating information through its social media network [(Twitter: Facebook, Instagram)](https://twitter.com).
