UNICEF response with partners

UNICEF was part of the National Humanitarian Network mission that conducted a rapid assessment of the situation from August 18 to 22, 2016. Preliminary results of this assessment were presented at the end of the mission to the National Head of INDECI and the Regional Government of Arequipa. This report included issues related to the effects of this situation on Education, Protection, Health, Food and Nutrition, Shelters, Water, Sanitation and Early Recovery, taking into account its direct impact on children.

UNICEF intervention was focused on supporting coordination and providing technical assistance in terms of Education and Protection. The following results were obtained:

Education:
- Development of the Ministry of Education Plan to Respond and Reinstate education services in all affected areas: school classes were suspended on August 15 and were fully resumed on August 23, with adequate spaces and services available.
- Thematic Round Tables on Education were formed in the Caylloma district and the Arequipa Region.
- The capacities of the technical teams from the Ministry of Education and the Caylloma UGEL were strengthened in terms of the reinstatement of the education services in emergency situations.
- The Ministry of Education has installed 16 prefabricated classrooms to meet 100% of the needs identified, 117 play kits were delivered to teachers from 56 schools to be used to resume classes. School supplies kits were provided to 100% of children affected by the earthquake.

Protection:
- The Coordination Workgroup on socio-emotional recovery of children and adolescents was established with the participation of the Ministry of Education, the Ministry of Women and Vulnerable Populations, INDECI, the Municipalities concerned and Non-Governmental Organizations.
- UNICEF supported the organization of a workshop to share the intervention models of the Ministry of Education, the Ministry of Women and Vulnerable Populations and INDECI, with the participation of representatives from schools and the local governments.
- The Ministry of Women and Vulnerable Populations installed 2 modules of the “Juguemos SonRie” (Let’s Play and Smile) Programme as safe spaces, for socio-emotional support and recovery for children.
- The Ministry of Education delivered 117 socio-emotional recovery kits to 56 schools and conducted interventions with 2,624 children, boys and girls. It also provided capacity building to 573 teachers from the 11 districts affected.
- The Ministry of Education and the regional government mobilized emergency response technical teams from the national and regional levels to support the response and recovery activities.
UNICEF’s engagement in the recovery strategy and the priorities for its interventions

In coordination with the regional and provincial governments and with the Ministries of Women and Vulnerable Populations (MIMP), Health (MINSA), Social Inclusion and Development (MIDIS, CUNAMAS) and Education (MoE), UNICEF prepared supportive actions in four areas:

**MONITORING AND COORDINATION** UNICEF provided technical assistance to the Regional Government of Arequipa and to the Provincial Government of Caylloma with the aim of developing and monitoring an integrated action plan for children and adolescents with emphasis on education, child protection and health.

**PSYCHO SOCIAL SUPPORT** UNICEF provided support to the MIMP to develop training workshops related to child protection in emergency situations, emotional recovery methodologies and working with families. Moreover, through different actors (health sector, CUNAMAS, community organizations), capacities for families on parenting children under the age of three during an emergency situation have been strengthened. Volunteers training has been complementary provided.

**WATER AND SANITATION** UNICEF provided support to health and local government technicians to strengthen their capacities on water quality monitoring; promoted collaborative working practices between local government and the health sector; established, as part of the C4D strategy, an agreement with local media, institutions and actors to disseminate educational messages for the good use of water sources and proper sanitation practices, and; provided technical assistance to local governments in order to prepare Public Investment Projects (PIPs) in emergency contexts.

**HEALTH AND NUTRITION** UNICEF provided technical assistance to the Regional Directorate of Health (DIRESA Arequipa) to strengthen prevention, promotion, attention and monitoring actions to protect the health and nutrition of children under the age of 5 in families affected by the earthquake. Three lines of action have been carried out: 1) prevention and disease management on most common diseases, as respiratory and diarrhoeal; 2) promotion of healthy practices on nutrition; and, 3) epidemiology surveillance, including the early diagnosis of chronic malnutrition on children.

**COMMUNICATIONS FOR DEVELOPMENT (C4D)** UNICEF provided C4D messages developed specifically for hygiene and sanitation.
Funding

During the emergency, the office did not receive the resources needed to implement activities. Nevertheless, with the support of management and experts of UNICEF Peru CO, it was possible to provide the needed technical assistance.

Situation overview and humanitarian needs

The affected population is being taken care of through INDECI with the provision of tents, warm clothing, utensils, tools and food; the Ministry of Housing, Construction and Sanitation with tents, housing modules, beds, mattresses, blankets, water containers and tools; the Ministry of Women and Vulnerable Populations with blankets; the Ministry of Education with social-emotional recovery kits, play kits and school supplies kits as well as temporary classrooms (tents and prefabricated classrooms), the Regional Government is providing blankets, fuel, the local governments are taking care of the demolition of public buildings and housing, and the Non-Governmental Organizations and private enterprises are contributing with various materials, food products and machinery.

The most urgent needs have been met with the support received, basic services have been reinstated and the reconstruction process has been started lead by the commission created for such end.
Humanitarian leadership and coordination

The Caylloma provincial Civil Defence maintains constant coordination platform with representatives from the different sectors from both, national and affected municipalities, in collaboration with NGOs operating in this region.
