Humanitarian Overview

The situation in Juba remains quiet as of July 15, and internally displaced persons (IDPs), who numbered an estimated 42,000 at the height of the crisis, are making the most of the ceasefire and choosing to return to their homes. Currently, OCHA estimates that some 8,000 people remain displaced in Juba, including 4,300 in UNMISS sites.

The most immediate needs identified include the continued provision of water to displaced populations, family tracing and reunification for missing separated and unaccompanied children.

Humanitarian Response

UNICEF continues to support the response through two multi-sectoral teams doing direct implementation of the response, supporting partners, and conducting assessments in IDP sites. On July 15, for the third day, UNICEF teams were able to visit different IDP sites following the cessation of hostilities. The different clusters are actively facilitating coordination to avoid duplication of activities.

Highlights

- A total of 134 missing, separated, or unaccompanied children have been registered as part of family tracing and reunification efforts.
- The distribution of water, previously highlighted as a critical concern, continues unhindered to UN House and Tomping.
- UNICEF urgently requires US$ 5.3 million to provide immediate and life-saving interventions to the displaced and affected children, women and other vulnerable people in Juba.

Summary Analysis of Programme Response

**HEALTH AND NUTRITION:** The UNICEF-supported clinic in Tomping is treating close to 50 patients every day, with gunshot wounds continuing to account for a majority of cases. In addition, given the high-risk of malaria, UNICEF distributed a total of 100 mosquito nets.

As part of the nutrition response, UNICEF has so far provided 200 cartons of Emergency Food Rations (BP-5) for children age 6-59 months. Four day Emergency Food Rations have been distributed to 1,082 children under five with support from partners in a variety of locations, including the UNMISS site in Tomping, St. Joseph, All Saints, St. Theresa, and Al Sabah Hospital. UNICEF partners AFOD, World Vision, and Concern have also been provided with nutrition supplies on standby to facilitate sustained response.

Moving forward, security situation permitting, UNICEF plans to reach over a 1,000 under five with Emergency Food Rations in UN House.

**WATER, SANITATION, AND HYGIENE:** Water distribution was able to continue in both Tomping and UN House on 15 July. In Tomping, three trucks of water were delivered by UNICEF, with an additional 40,000 liters being provided by IOM. In the more congested UN House, 16 trucks of water were distributed. Additional measures are being taken to ensure the provision of safe water.

With five suspected cases of cholera identified in Juba, there is a strong need to ensure adequate sanitation in order to prevent disease outbreaks. Sanitation efforts are ongoing alongside the critical focus on water distribution. UNICEF delivered latrine slabs to Tomping, and garbage collection is ongoing in both Tomping and UN House.

**EDUCATION:** IDPs displaced by the recent violence continue to occupy the school in UN House’s POC1. However, in Tomping, education and psychosocial support activities resumed on 15 July under trees, following the distribution of school-in-a-box kits, and early childhood development kit. A total of 250 children (140 girls) are already enrolled, including 100 early childhood development learners. Girls account for 56% of total enrolled children, and 63% of those enrolled in early childhood development. Twenty-two primary teachers have been identified to facilitate education activities.

**CHILD PROTECTION:** A total of 134 missing, separated, or unaccompanied children have now been registered by UNICEF’s partners as part of family tracing and reunification efforts.

Psychosocial support activities are ongoing. On 15 July, UNICEF’s partner Nile Hope supported 128 boys and 98 girls between the ages of four and seventeen to participate in a variety of Child Friendly Space (CFS) activities in Tomping; a further 79 boys and 58 girls age five to seventeen participated in similar activities in St. Joseph with support from the partner MTT.
**FUNDING:** UNICEF requires US$ 5,372,568 to urgently scale up to respond to the ongoing crisis in Juba. This is in addition to UNICEF South Sudan’s Humanitarian Action for Children (HAC) appeal for US$ 154,464,955 and for the funds needed to support the ongoing response in Wau requiring US$ 2,931,000.
