

Q1:

Most of the rates per hour and minute are difficult to estimate, as usually the filming crew we work with, and the equipment rental charge per hour.

Also, I saw in the description, that I can add missing key roles as a director or equipment but with no pricing referrals it should be added to the technical list.

Would you please let me know, how I can add these key assets?

A1:

Most of the rates in the price proposal are given per hour and if the filming crew and the technical equipment charge per hour, our understanding is that it would be easy for you to give price per hour. If you are charged per day, you can divide the sum by 8 (as the standard working day is 8 hours). Please estimate all costs for the task and calculate it according to the given unit as given in the template. Please do not include any price referrals in the technical proposal. You can add some clarifications in the price proposal list but without editing the template.
