\* The estimates for the number of babies born draws on the period indicators and the life tables of the UN's World Population Prospects (2017). Building on these datasets World Data Lab's (WDL) algorithm projects the number of births for each day by country and gender, and their corresponding life expectancy. WDL's demographic platform population.io provides these estimates for any person alive with a birthday going back until January 1, 1920 (for WPP 2015). WDL produced unique estimates for UNICEF using WPP 2017.

\*\* Based on life expectancy at birth figures produced by the United Nations Population Division, *World Population Prospects: The 2017 Revision*
