A STATISTICAL PROFILE OF BIRTH REGISTRATION IN ASIA AND THE PACIFIC
ACKNOWLEDGEMENTS
This brochure was prepared by Claudia Cappa and Nicole Petrowski (Data and Analytics Section of UNICEF Headquarters), with inputs from Lucio Valerio Sarandrea (UNICEF Regional Office for East Asia and the Pacific) and Bhaskar Mishra (Child Protection Section of UNICEF Headquarters). It was edited by Tina Johnson and designed by Era Porth (independent consultants).

States first acknowledge a child’s existence and identity through birth registration. The right to be recognized as a person before the law is a critical step in ensuring lifelong protection and can facilitate access to all other rights.

A birth certificate is proof of that legal identity and is the basis on which children can establish a nationality, avoid the risk of statelessness and seek protection from violence and exploitation. For example, proof of age is needed to help prevent child labour, child marriage and underage recruitment into the armed forces. A birth certificate may also be required to access services in areas including health, education and justice.

The adoption of the Sustainable Development Goals (SDGs) by the United Nations General Assembly in September 2015 placed birth registration firmly on the international development agenda. They include a dedicated target (16.9) under Goal 16 – namely, to provide legal identity for all, including birth registration, by 2030. Complementing this is target 17.9, which calls for support in building the statistical capacity needed for strong national civil registration systems. Such systems produce vital statistics, which are foundational for achieving sustained human and economic development.

In accordance with the SDGs, UNICEF seeks to fulfil the promise of universal birth registration, ensuring a legal identity for every child by 2030.
“GET EVERY ONE IN THE PICTURE”
In November 2014, governments gathered in Bangkok, Thailand for the First Ministerial Conference on Civil Registration and Vital Statistics (CRVS) in Asia and the Pacific. They proclaimed the Asian and Pacific CRVS Decade (2015-2024) as a time frame for realizing the shared vision that all people in the region are able to benefit from universal and responsive CRVS systems. During the conference, governments also adopted the Ministerial Declaration to “Get every one in the picture”, in which they committed to strengthening national CRVS systems, and endorsed the Regional Action Framework for assessing progress and focusing efforts.

The Regional Action Framework includes three goals:

Goal 1. Universal registration of births, deaths and other vital events

Goal 2. All individuals are provided with legal documentation of civil registration of births, deaths and other vital events, as necessary

Goal 3. Accurate, complete and timely vital statistics (including on causes of death) are produced based on registration records and disseminated

Under Goal 1, there are four targets (to be set at national level) on birth registration:

1A. Increase the number of births registered within a year after their occurrence

2A. Increase the provision of birth certificates after registration

1B. Increase birth registration of children under five

1C. Increase birth registration among the total population

Registering a birth soon after its occurrence is important to ensure access to services, reduce misreporting and produce accurate and timely vital statistics. Many countries, especially those that had low rates at the beginning of the CRVS Decade, have implemented interventions to improve timely reporting of births. Although considerable progress has been made in the region, increased investment is needed and many countries must accelerate progress in order to achieve the targets by 2024.
OF THE 167 MILLION UNREGISTERED CHILDREN WORLDWIDE, SLIGHTLY MORE THAN 1 IN 3 (AROUND 65 MILLION) LIVE IN ASIA AND THE PACIFIC.

NEARLY 1 IN 5 CHILDREN IN THE REGION ARE UNREGISTERED, WITH LEVELS VARYING WIDELY AMONG COUNTRIES IN SOME SUBREGIONS.

SOUTH AND SOUTH-WEST ASIA IS HOME TO THE LARGEST NUMBER OF UNREGISTERED CHILDREN IN THE REGION.

OF ALL INFANTS (CHILDREN UNDER 1 YEAR OLD) IN THE REGION, 1 IN 4 (SOME 17 MILLION) HAVE NOT BEEN REGISTERED.

AMONG COUNTRIES IN THE REGION WITH AVAILABLE DATA, 4 OUT OF 10 ARE NOT ON TRACK TO ACHIEVE UNIVERSAL BIRTH REGISTRATION BY 2030.

ASIA AND THE PACIFIC WILL FALL SHORT OF ACHIEVING UNIVERSAL BIRTH REGISTRATION BY THE END OF THE CRVS DECADE, EVEN WITH ACCELERATED PROGRESS IN THE COMING YEARS.

WHILE GAPS REMAIN, ADVANCES IN BIRTH REGISTRATION HAVE REACHED SOME OF THE POOREST CHILDREN IN THE REGION.

MANY REGISTERED CHILDREN STILL LACK PROOF OF THEIR IDENTITY: 97 MILLION CHILDREN IN THE REGION (AROUND 1 IN 4) DO NOT HAVE A BIRTH CERTIFICATE.

ABOUT 23 MILLION INFANTS IN THE REGION DO NOT POSSESS A BIRTH CERTIFICATE; MORE THAN 8 IN 10 OF THEM LIVE IN THE SOUTH AND SOUTH-WEST SUBREGION.

EVEN WITH ACCELERATED PROGRESS, THE TOTAL NUMBER OF UNREGISTERED CHILDREN IN THE REGION COULD STILL BE 18 MILLION BY 2024 AND 3 MILLION BY 2030.

OF THE 167 MILLION UNREGISTERED CHILDREN WORLDWIDE, SLIGHTLY MORE THAN 1 IN 3 (AROUND 65 MILLION) LIVE IN ASIA AND THE PACIFIC.

NEARLY 1 IN 5 CHILDREN IN THE REGION ARE UNREGISTERED, WITH LEVELS VARYING WIDELY AMONG COUNTRIES IN SOME SUBREGIONS.

SOUTH AND SOUTH-WEST ASIA IS HOME TO THE LARGEST NUMBER OF UNREGISTERED CHILDREN IN THE REGION.

OF ALL INFANTS (CHILDREN UNDER 1 YEAR OLD) IN THE REGION, 1 IN 4 (SOME 17 MILLION) HAVE NOT BEEN REGISTERED.

AMONG COUNTRIES IN THE REGION WITH AVAILABLE DATA, 4 OUT OF 10 ARE NOT ON TRACK TO ACHIEVE UNIVERSAL BIRTH REGISTRATION BY 2030.

ASIA AND THE PACIFIC WILL FALL SHORT OF ACHIEVING UNIVERSAL BIRTH REGISTRATION BY THE END OF THE CRVS DECADE, EVEN WITH ACCELERATED PROGRESS IN THE COMING YEARS.

WHILE GAPS REMAIN, ADVANCES IN BIRTH REGISTRATION HAVE REACHED SOME OF THE POOREST CHILDREN IN THE REGION.

MANY REGISTERED CHILDREN STILL LACK PROOF OF THEIR IDENTITY: 97 MILLION CHILDREN IN THE REGION (AROUND 1 IN 4) DO NOT HAVE A BIRTH CERTIFICATE.

ABOUT 23 MILLION INFANTS IN THE REGION DO NOT POSSESS A BIRTH CERTIFICATE; MORE THAN 8 IN 10 OF THEM LIVE IN THE SOUTH AND SOUTH-WEST SUBREGION.

EVEN WITH ACCELERATED PROGRESS, THE TOTAL NUMBER OF UNREGISTERED CHILDREN IN THE REGION COULD STILL BE 18 MILLION BY 2024 AND 3 MILLION BY 2030.
OF THE 167 MILLION UNREGISTERED CHILDREN WORLDWIDE, SLIGHTLY MORE THAN 1 IN 3 (AROUND 65 MILLION) LIVE IN ASIA AND THE PACIFIC

FIG. 1 Percentage distribution of children under age 5 whose births are not registered
SOUTH AND SOUTH-WEST ASIA IS HOME TO THE LARGEST NUMBER OF UNREGISTERED CHILDREN IN THE REGION

FIG. 2  Number of children under age 5 whose births are not registered, by subregion

Notes: Figures have been rounded. Estimates are based on a subset of 46 countries in Asia and the Pacific with available data between 2010 and 2020, covering 90 per cent of the population of children under age 5. Subregional estimates represent data from countries covering at least 50 per cent of the subregional population.
MANY REGISTERED CHILDREN STILL LACK PROOF OF THEIR IDENTITY: 97 MILLION CHILDREN IN THE REGION (AROUND 1 IN 4) DO NOT HAVE A BIRTH CERTIFICATE

FIG. 3  Number of children under age 5 without a birth certificate, by subregion

Notes: Figures have been rounded. Estimates are based on a subset of 32 countries in Asia and the Pacific with available data between 2010 and 2020, covering 76 per cent of the population of children under age 5. Subregional estimates represent data from countries covering at least 50 per cent of the subregional population. The population coverage for East and North-East Asia is below 50 per cent since there are no data for China.
THE PACIFIC SUBREGION HAS THE GREATEST VARIATION IN BIRTH REGISTRATION PREVALENCE AMONG COUNTRIES

FIG. 4 Percentage of children under age 5 whose births are registered, by subregion

Note: Subregional estimates represent data from countries covering at least 50 per cent of the subregional population.
SOME COUNTRIES IN THE REGION HAVE ACHIEVED HIGH LEVELS OF BIRTH REGISTRATION EVEN WITH LOW PER CAPITA INCOME

FIG. 5 Percentage of children under age 5 whose births are registered and 2020 gross national income (GNI) per capita in US$, based on the Atlas method, in countries in Asia and the Pacific with GNI per capita below $12,736

Notes: Low income countries had a GNI per capita in 2020 of $1,045 or less. GNI per capita was between $1,046 and $4,125 for lower middle-income countries and between $4,126 and $12,735 for upper middle-income countries.
MORE EFFORT IS NEEDED TO ENSURE TIMELY REGISTRATION OF BIRTHS IN THE REGION

FIG. 6  Percentage of children under age 5 whose births are registered in Asia and the Pacific, by age in months

<tr>
<td>36–47 months</td>
<td>77%</td>
</tr>
<tr>
<td>48–59 months</td>
<td>78%</td>
</tr>
</tbody>
</table>

Notes: Estimates are based on a subset of 31 countries with available data between 2010 and 2020, covering 69 per cent of the population in each age group. Estimates presented here are not directly comparable with those in Figures 4, 9 and 11 since this chart is based only on the subset of countries with data disaggregated by age.
OF ALL INFANTS IN THE REGION, 1 IN 4 (SOME 17 MILLION) HAVE NOT BEEN REGISTERED

FIG. 7  Number of children under age 1 whose births are not registered, by subregion

Notes: Figures have been rounded. Estimates are based on a subset of 38 countries in Asia and the Pacific with available data between 2010 and 2020, covering 88 per cent of the population of children under age 1. Subregional estimates represent data from countries covering at least 50 per cent of the subregional population.
ABOUT 23 MILLION INFANTS IN THE REGION DO NOT POSSESS A BIRTH CERTIFICATE; MORE THAN 8 IN 10 OF THEM LIVE IN THE SOUTH AND SOUTH-WEST SUBREGION

FIG. 8  Number of children under age 1 without a birth certificate, by subregion

<tr>
<td>Asia and the Pacific</td>
<td>23 million</td>
</tr>
</tbody>
</table>

Notes: Figures have been rounded. Estimates are based on a subset of 28 countries in Asia and the Pacific with available data between 2010 and 2020, covering 78 per cent of the population of children under age 1. Regional estimates represent data from countries covering at least 50 per cent of the regional population. The population coverage for East and North-East Asia is below 50 per cent since there are no data for China.
THERE IS WIDE VARIATION IN BIRTH REGISTRATION LEVELS OF INFANTS AMONG COUNTRIES IN THE SAME SUBREGION

FIG. 9 Percentage of children under age 1 whose births are registered, by subregion

Note: Subregional estimates represent data from countries covering at least 50 per cent of the subregional population.
ASSESSING PROGRESS AND LOOKING AHEAD TO 2030
WHILE GAPS REMAIN, ADVANCES IN BIRTH REGISTRATION HAVE REACHED SOME OF THE POOREST CHILDREN IN THE REGION

FIG. 10  Percentage of children under age 5 whose births are registered, by household wealth quintile and by subregion

Note: Population coverage was insufficient to calculate estimates for East and North-East Asia, North and Central Asia and the Pacific.
ASIA AND THE PACIFIC WILL FALL SHORT OF ACHIEVING UNIVERSAL
BIRTH REGISTRATION BY THE END OF THE CRVS DECADE, EVEN WITH
ACCELERATED PROGRESS IN THE COMING YEARS

FIG. 11 Percentage of children under age 5 whose births are registered in Asia and the Pacific, observed and projected

Notes: The projection scenarios build on existing trends. The scenario depicting ‘observed trends continue’ shows expected values if each country were to continue on its observed (or assumed) path of progress. The ‘progress is accelerated’ scenario shows expected values if: (1) those countries that are projected to be on track to achieve universal birth registration by 2030 continue on their observed path of progress; (2) those countries that have a positive average annual rate of change catch up to countries in the region that are on track; and (3) those countries that have either a negative average annual rate of change or have not made any progress catch up to countries in the region that have made at least some progress but are not on track. This represents the more ambitious of the two scenarios. Both scenarios account for slowing effects that are to be expected as birth registration levels approach 100 per cent.
AMONG COUNTRIES IN THE REGION WITH AVAILABLE DATA, 4 OUT OF 10 ARE NOT ON TRACK TO ACHIEVE UNIVERSAL BIRTH REGISTRATION BY 2030

FIG. 12 Percentage of children under age 5 whose births are registered and average annual rate of change in countries in Asia and the Pacific on track and not on track towards the SDG target

Note: This chart does not include countries that have already met the target of universal birth registration and those for which there were insufficient data to assess trends.
EVEN WITH ACCELERATED PROGRESS, THE TOTAL NUMBER OF UNREGISTERED CHILDREN IN ASIA AND THE PACIFIC COULD STILL BE 18 MILLION BY 2024 AND 3 MILLION BY 2030

FIG. 13 Number of children under age 5 whose births are not registered, observed and projected, by region

Prevalence remains at today’s levels

Observed trends continue

Progress is accelerated
SUBREGIONAL CLASSIFICATION

East and North-East Asia
China, Democratic People’s Republic of Korea, Japan, Mongolia and Republic of Korea

North and Central Asia
Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Russian Federation, Tajikistan, Turkmenistan and Uzbekistan

Pacific
Australia, Cook Islands, Fiji, Kiribati, Marshall Islands, Federated States of Micronesia, Nauru, Niue, New Zealand, Palau, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu

South-East Asia
Brunei Darussalam, Cambodia, Indonesia, Lao People’s Democratic Republic, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste and Viet Nam

South and South-West Asia
Afghanistan, Bangladesh, Bhutan, India, Islamic Republic of Iran, Maldives, Nepal, Pakistan, Sri Lanka and Turkey
