What is Mental Health?
Mental health is about our emotional, mental, and social well-being.

Why should we be concerned about mental health?
It:
- affects how we think, feel, and act as we cope with life.
- helps determine how we handle stress, relate to others, and make choices.

Mental health is important at every stage of life, from childhood and adolescence through adulthood.*

Have you felt worried/sad or stressed more than usual during the pandemic?

Yes [ ] No [ ]

If yes, here are 4 tips that can help you to deal with stress:
- Identify what makes you feel stressed or worried and plan for it in advance.
- Avoid things that make you feel stressed. These can include news, screen time and social media or anything or anyone that makes you feel worried.
- Give yourself positive self-talks such as “Things will get better.” “I will get through this.”
- Engage in fun, creative activities that relax you, e.g.: play, music, art, dance, singing, exercise, etc.
