for every child

UNICEF is organizing this art exhibition to empower and showcase the talents of children who have benefited from the child protection programmes. Children are provided with different psychosocial support services offered through the UNICEF programme such as art-focused therapy, which has helped them express and process their grievances through art, producing extraordinary individualistic pieces that tell stories of resilience and hope.

This exhibition is organized in collaboration with UNICEF's long-standing partner, the Egyptian Association for Societal Consolidation (EASC), who work together with UNICEF to provide comprehensive protection, psychosocial support, and re-integration services for children.
