

Meaningful consent in research, evaluation, and other evidence activities involving children and their communities

Prof Monica Ruiz-Casares

Professor, School of Child & Youth Care,
Toronto Metropolitan University & Adjunct
Professor of Psychiatry, McGill University

Dr Anthony Ajayi

Research Scientist at African Population
and Health Research Center

Karen Carter

Senior Adviser – Ethics in Evidence
Generation at UNICEF Office of
Strategy and Evidence

Moderator

Ramya Subrahmanian

Chief of Research at UNICEF Office
of Strategy and Evidence

Meaningful consent is a core foundation of ethical practice in evidence activities – such as research, evaluation, surveys and polls. However, it remains one of the most frequently cited concerns raised by teams designing and implementing evidence activities. Join UNICEF Office of Strategy and Evidence and a panel of international experts as we discuss:

- why meaningful consent and assent is at the heart of ethical practice
- why consent is an ongoing process
- meaningful consent and agency in the context of children's evolving capacities
- when consent is not appropriate
- challenges in obtaining and understanding meaningful consent and how we can work through these
- examples of innovative good practices

The webinar will be moderated by Ramya Subrahmanian – Chief of Research at UNICEF Office of Strategy and Evidence, who recently oversaw the development of the updated report Growing with Rights - Understanding and supporting the evolving capacities of the child.

Tuesday, 20 October
14:30 CET / 08:30 EDT
