Output statement 1.b: Countries have sustained immunization programmes at national and district level, including introduction of new vaccines, towards the realization of universal health coverage						

¹⁰ UNICEF has included in the results framework all the key impact and outcome indicators necessary for defining its contribution to Sustainable Development Goals. For those Sustainable Development Goal indicators and related impact- and outcome-level measures that do not have readily available data sources, UNICEF is working with other United Nations entities, Governments and other partners to establish systems for consistent monitoring. These will be reported in the annual report of the Executive Director and its annexes, when available.

¹² WHO recommends that all food-grade salt used in household and food processing should be fortified with iodine as a safe and effective strategy for the prevention and control of iodine deficiency disorders. Given that globally a high proportion of household salt globally is already iodized, a key programmatic challenge is to ensure sustainability. The salt iodine content should be determined based on national contexts.

E5.a. UNICEF personnel feel highly motivated, engaged and safe to raise issues related to workplace issues.	E5.a.1. Employee-engagement index	68% (2018)	>70%	>74%	Headquarters
	E5.a.2. Percentage of offices that meet organizational benchmarks on the temperature-check indicator related to reporting potential misconduct or inappropriate behaviour	..⁵⁶	75%	>80%	Headquarters
E5.b. UNICEF systems for responding to inappropriate behaviour and misconduct work effectively.	E.5.b.1. Percentage of issues reported to OIAI that are interpersonal in nature⁵⁷	53%	50%	50%	Headquarters
	E5.b.2. Percentage of cases that are substantiated	29%	33%	33%	Headquarters

⁵⁶ The temperature check indicator is expected to be operational by mid-2020.

⁵⁷ The categories included here are: harassment and abuse of authority; inappropriate staff conduct; personnel disputes; retaliation; sexual exploitation and abuse, and sexual harassment. We would anticipate that the proportion of these allegations in the total number of allegations received by OIAI would stabilize at around 50 per cent, and then start to trend downwards. This is an estimate, and the composition of the allegations may vary across the six areas included in “interpersonal issues.” Details are the available in the OIAI annual reports to the Executive Board.
