Progress achieved for children

- Mortality, <5 years (per 1,000 live births)
- Birth registration coverage, <5 years (%)
- Open defecation prevalence (%)

Context and key challenges

1. Limited **access to social services**, with wide disparities at the subnational level

2. Insufficient supply of **skilled human resources** to deliver services

3. Widespread **child poverty**: 52% <18 years experience at least 3 deprivations simultaneously, exacerbated by COVID-19

4. Limited **resilience** of communities and systems

5. Vulnerability to **climate variability**, rising sea levels and flooding
Vision and alignment to national, regional and global goals

“Girls and boys, including adolescents, have increased access to quality social services and to supportive and safe environments that enable them to survive, thrive, learn and develop to their full potential, for their own well-being and to contribute to positive social change.”
Results for children and targets by 2026

**CHILD SURVIVAL AND DEVELOPMENT**

- Children under 1 year old vaccinated with DTP3: 85% up from 74%
- Proportion of the population practicing open defecation: 5% down from 10%

**ACCESS TO LEARNING**

- Out-of-school rate, lower secondary school age: 18% down from 26% (girls)
- Children whose births are registered: 42% up from 36% (<1 year), 55% up from 46% (<5 years)

**SOCIAL INCLUSION**

- Number of children covered by social protection systems: 100,000 up from 8,000

**CHILD PROTECTION**

- 18% down from 20% (boys)

**Children's rights**

- Equity and Leaving no one behind

**Gender equality**

- Accountability to affected populations
Transformative strategies

- Systems strengthening at subnational and national levels for inclusive, timely, efficient and quality services
- Social and behaviour change, engaging and co-creating with adolescents and communities
- Linking humanitarian and development programming towards resilience
- Evidence generation and analysis for action
- Risk management
