b. Wheelchairs and cushions

Ongoing tender – can be sourced if urgent; All are available in adult and paediatric sizes.

**Transport wheelchair**: An assistant controlled indoor wheelchair for transferring patients. These chairs are designed for short-term use only and will break down quickly if used outdoors.

**Active urban and intermediate wheelchairs**: Primarily for people who self-propel, active urban chairs are suitable for indoor and outdoor environments in cities. People with advanced mobility skills may also use them for short distances on uneven terrain.

**Active rough terrain wheelchairs**: Primarily for people who self-propel, this chair is robust and durable, suitable for long-term use in outdoor environments in rough terrain.

**Postural support wheelchairs**: The most advanced category of wheelchair, these larger chairs provide support on the sides, back and neck of patients. They can be both assistant controlled and self-propelled.

**Wheelchair seat cushions**: Postural support, Pressure redistribution – moderate immersion/off-loading. Pressure redistribution – deep immersion/off-loading
c. Hand-powered tricycle:
