

A young mother practicing Kangaroo care thanks to UNICEF support, in the South-West region of Cameroon @UNICEF Cameroon/2021/Dejongh

August 2021

Highlights

- In the North-West/South-West regions the targeting of traditional leaders by Non State Armed Groups (NSAGs) marks a new turn in the form of violence taking place. In August, 8,500 people were displaced due to conflict in these two regions.
- In the Far-North region, inter-community clashes in Logone-Birni resulted in the internal displacement of 12,000 people and displacement of 11,000 Cameroonian refugees into Chad.
- Despite insecurity and access challenges in target regions, compounded by funding shortfalls, UNICEF in Cameroon in August:
 - Reached, 16,699 conflict-affected caregivers in the North-West/South-West (NW/SW) regions with Infant and Young Child Feeding counselling.
 - Provided WASH kits through the Rapid Response Mechanism, in the Far North to 1,000 newly displaced families affected by the Lake Chad Basin crisis.
 - Provided referral and access to 6,559 women and children in the East and Adamaoua regions, to GBV risk mitigation, prevention, or response interventions.

UNICEF's Response and Funding

Cameroon

Humanitarian Situation Report No. 8

Situation in Numbers

2,288,000 children in need of humanitarian assistance (HRP April 2021)

4,400,000 people in need (HRP April 2021)

410,933 IDPs in the NW/SW regions (UN OCHA, February 2021)

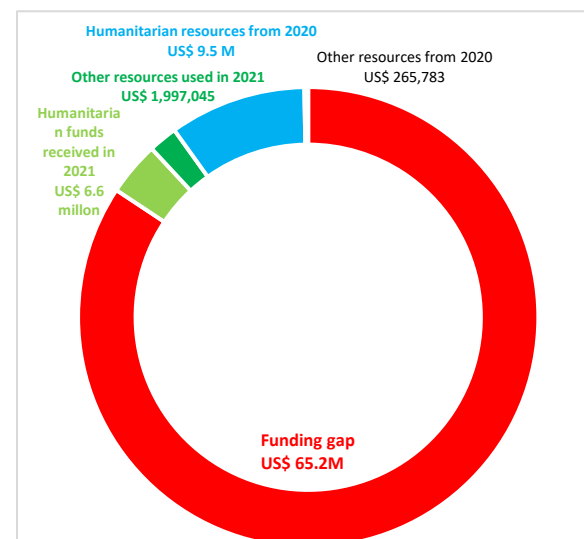

360,547 returnees in the NW/SW regions (UN OCHA August 2020)

341,535 IDPs in the Far-North (IOM, July 2021)

¹In complement, there are 302,000 IDPs in the Adamaoua, Littoral, West, and Centre regions (MSNA West, Littoral UNOCHA August 2020, MIRA Centre region September 2020) bringing the total of IDPs to 712,933 people.

UNICEF Appeal 2021

Funding Status (in US\$)

*Funding available includes funds received in the current year; carry-over from the previous year; and repurposed funds with agreement from donors

Funding Overview and Partnerships

In 2021, UNICEF Cameroon is appealing for US\$83,074,000 in support of a lifesaving and protection-based response for children and women affected by humanitarian crises in Cameroon. The COVID-19 emergency response has been incorporated into the UNICEF Cameroon HAC 2021 appeal. As of August 2021, UNICEF had received US\$6,661,512 from the Government of Japan, Swedish SIDA, Directorate-General for European Civil Protection and Humanitarian Aid Operations (DG-ECHO), and UNICEF's Global Thematic Funds. The office was also able to carry-over US\$9,471,837 from 2020. As we move into the second half of the year it is critical that we are able to respond to flood induced needs and prevent water borne diseases. UNICEF expresses its sincere gratitude to all public and private donors for their contributions.

Situation Overview and Humanitarian Needs

Overall, very little support has been pledged or provided to meet the significant humanitarian needs in Cameroon. A total of 4.4 million people in Cameroon need humanitarian assistance because of on-going and protracted crises rooted in conflict, displacement, and periodic disease outbreaks. Cameroon continues to report daily cases of COVID-19 infections. As of August 30, 2021, only 333,047 people had been vaccinated with a first AstraZeneca dose or Sinopharm while 95,208 are fully vaccinated (Johnson & Johnson included)¹.

In August 2021, a further 8,500 people were internally displaced in in the NW/SW regions while 530 returned to their places of origin. Most of the reported displacements are pendular. The population's safety continues to be threatened by the consequences of the armed clashes between Non-State-Armed Groups (NSAGs) and the military forces resulting in exposure to crossfire, and the detonation of improvised explosive devices (IEDs). This month in the NW/SW regions, three children caught in crossfires lost their lives and two were injured. In the Far-North, since the beginning of 2021, 24 children have been victims of IEDs. Civilians are also victims of targeted criminal acts and children's lives are severely disrupted in these insecure environments. Many children are also victims or vulnerable to gender-based violence. With one in five health centres non-operational, access to healthcare in the remaining functional facilities is challenged by attacks – health personnel are at risk of abduction for ransom, patients are at risk of being removed from ambulances and healthcare assets are occasionally seized. "Ghost" or lockdown days continue to hinder humanitarian access and the delivery of humanitarian aid in the NW/SW regions.

Inter-community tension in resource scarce environments, between herders and farmers is a real concern. Most recently, in Logone-Birni, herders, fishermen and farmers have clashed, resulting in hundreds of casualties. An estimated 47,000 individuals from both ethnic groups have been affected by the conflict. As a result, more than 11,000 Cameroonian refugees, mostly women and children fled to the South of Chad along the Logone River and 12,000 displaced within Cameroon².

UNICEF remains concerned by the lack of proper resources and funding to secure its emergency response and to ensure the consolidation of results to support our efforts to build more resilient communities.

Summary Analysis Program Response

Nutrition³

Non-State Armed Groups (NSAG's) violence – Lake Chad Basin

In August 2021, in the Far-North region, in Maroua 1, Goulfey, Kousseri and Moutourwa health districts (Logone-et-Chari and Mayo-Kani divisions), UNICEF worked collaboratively with the Regional Delegation of the Ministry of Public Health to ensure the availability and access to treatment for children with severe acute malnutrition (SAM), in 366 health centres through the provision of essential nutrition supplies (RUTF, therapeutic milk, essential drugs) and WASH kits. A total of 3,328 children (1,747 boys and 1,581 girls) aged 6 to 59 months including 57 Minawao camp refugees were admitted into these UNICEF-supported health centres for treatment. Through home visits along with community demonstration sessions, 8,616 caregivers (5,600 women and 3,016 men) were sensitised on good Infant Young Child Feeding Practices (IYCF) and COVID-19 prevention activities in Maroua I, Mokolo, Moutourwa and Goulfey health districts. A total of 80,600 children aged 6-59 months were screened for wasting by members of nutrition support groups or mothers that received training on the use of Mid-Upper Arm Circumference (MUAC) tapes to screen children at home. Among the total of children screened, 2,094 were detected with moderate acute malnutrition (MAM) and 498 (254 girls and 244 boys) with severe acute malnutrition (SAM). Only 1,414 children aged 6 to 23 months in Moutourwa health district (Mayo-Kani division) received micronutrient powders. Indeed, due to the inter-community clashes between Arab Choas and Musgum ethnic groups, community activities were suspended in the Kousseri health district, postponing the distribution of micronutrient powders for more than 26,000 children aged 6 to 23 months enrolled in the Home-Based Fortification programme.

¹ Ministry of Public Health in Cameroon

² UNHCR Chad Situation Report #2 on new arrivals, DG ECHO Flash update

³ Due to the reporting system of the Ministry of Public Health, the admission data of the concerned month for the Far North and East and Adamaoua regions is reported in the following month (i.e., March data is reported in April).

North-West/South-West Crisis

UNICEF provided supplies to the Regional Delegation of Public Health in NW/SW regions which allowed NGOs to conduct the screening of 14,146 children (8,933 boys and 5,213 girls) for SAM in very hard to reach and peri-urban areas. The children were reached either through health facilities or mobile teams and were all referred for treatment. In complement, 16,675 caregivers (11,919 women and 4,756 men) were sensitised on COVID-19 preventive practices and Infant and Young Child Feeding (IYCF) practices.

WASH

NSAGs' violence – Lake Chad Basin

With UNICEF support, one water tank of 1,000 litres was set up in each of the 27 health facilities in the municipality of Mokolo. The water tanks are expected to help to conserve safe drinking water and enable a more regular water supply to allow for improved Infection Prevention and Control measures. To respond to the needs of more than 1,000 newly displaced families in the Far-North region, UNICEF made WASH kits available to the NGO, Premiere Urgence International (PUI) who co-lead of the Rapid Response Mechanism (RRM) to distribute as needed. Each kit contains soaps, buckets, cups, squatting plates, roll of plastic tarpaulin, water purification tablets, face masks and posters.

North-West/South-West crisis

In August 2021, UNICEF's implementing partners Martin Luther King Jr. Memorial Foundation (LUKMEF) and the Cameroon Baptist Convention Health Service (CBCHS) through the Comprehensive Child Response project, reached 46,658 vulnerable people (24,023 women and girls and 22,635 men and boys) with life-saving messages on COVID-19 prevention measures and sensitization on good hygiene and sanitation practices in the NW/SW regions.

Education

North-West/South-West crisis

In the NW region (Mezam, Boyo, Ngo Ketunjia, Bui, and Momo areas), UNICEF's implementing partner Green Partners Association (GPA) distributed 120 solar radios to conflict-affected families with out of school children. In August 2021, all of the 1,280 children identified to participate in the radio learning program had registered and were attending lessons regularly. In addition to them, 232 children joined the listening groups and regularly attended lessons.

Child Protection

NSAGs' violence – Lake Chad Basin

In August 2021, UNICEF's implementing partners, Action Locale pour un Développement Participatif et Autogéré (ALDEPA) and Children's Life in Rural Areas (CLiRA) provided essential child protection services to 104 newly identified and 3,183 existing children (1,614 girls and 1,569 boys) affected by armed conflict. Among them, 1,508 children (818 girls and 690 boys) are internally displaced, 1,489 (735 girls and 754 boys) are from the host community, 104 (53 girls and 51 boys) are refugees and 299 (150 girls and 149 boys) returnee children. They were all sensitised to COVID-19 prevention measures.

ALDEPA and CLiRA conducted 15 positive parenting sessions to sensitize parents on back to school, the importance of birth certificates, COVID-19 prevention and positive parenting. A total of 2,385 caregivers (628 men, 665 women, 591 boys and 501 girls) in Logone-and-Chari, Mayo-Sava and Mayo-Tsanaga were reached. ALDEPA, through 178 inter-generational/inter-religious dialogues sensitised 5,486 people (1,210 girls, 1,182 boys, 1,269 women and 1,825 men). Also, 82 Koranic teachers were equipped as peer educators. They are encouraged and equipped to promote among their colleagues and community's peaceful cohabitation, the right of education for children, COVID-19 prevention, and the benefits of dual koranic and formal education.

North-West/South-West Crisis

In August 2021, UNICEF's implementing partners LUKMEF, and Cameroon Baptist Church Health Services (CBCHS) provided mental health and psychosocial support services (MHPSS) in child friendly and other safe spaces to 26,172 conflict-affected children (13,958 girls and 12,214 boys). Also, they identified, registered, and placed in alternative care 1,824 unaccompanied and separated children (951 girls and 873 boys). Among them, 120 children (52 girls and 68 boys) were reunited with their families.

Contrary to previous months, a high number of unaccompanied and separated children 21,493 children (10,744 girls and 10,749 boys) were identified by CP AoR members .

Communication for Development (C4D)

National

With UNICEF's support, the Government of Cameroon equipped 15 management staff supporting the 1510 national tollfree line with knowledge to respond to callers queries on COVID-19 vaccines ad COVID-19 more generally Focus Group discussions have been organized to raise awareness amongst health personnel in 100 health districts in all 10 regions, nationally.

North-West/South-West crisis

In August 2021, UNICEF supported 11 community radio stations, broadcasting COVID-19 prevention and response messages. The messages also promote the use of the toll-free number 1510 for additional information and community feedback. Call centres recorded 1,962 calls, mostly enquiring about the COVID-19 vaccine.

In the NW/SW regions, 8,888 people (3,521 men and 5,367 women) were reached with messages on the importance of child protection to protect internally displaced children against violence, exploitation and abuse. To ensure the continuity in the provision of an integrated package of basic maternal, new-born and child health care and services in the context of COVID-19, 176 people were sensitised on COVID-19 prevention, malaria and anaemia prevention, and immunization. In complement, 10,263 people were engaged on HIV/AIDS essential counselling, tested and provided with access to anti-retroviral treatment.

East and Adamaoua Regions (refugee and host community response)

Nutrition - In the North, Adamawa and East regions, UNICEF's implementing partner African Humanitarian Action (AHA), and the Regional Public Health Delegation provided direct nutrition support to 531 health centres in these regions. Nutrition supplies were provided (RUTF, therapeutic milk, essential drugs) for children with severe acute malnutrition (SAM) along with WASH kits to ensure a complementary approach to support SAM treatment.

Community-based prevention of malnutrition activities identified through screening, 3,344 severely acute malnourished (SAM) children aged 6 to 59 months including 204 Central African Republican (CAR), refugee children. They were admitted into UNICEF-supported health centres for treatment. UNICEF's partners sensitised 32,082 caregivers (20,853 women and 11,229 men) on Infant and Young Child Feeding (IYCF) practices integrating COVID-19 specific prevention messages in nine health districts in the East, Adamaoua and North regions. To boost early detection of wasting among children, mothers and community health workers were equipped with knowledge and skills to accurately use MUAC tapes. With their support, 27,415 children aged 6-59 months were screened for SAM. Of this total, 207 (106 girls and 101 boys) were moderately wasted and 89 (45 girls and 44 boys) severely wasted.

Education – UNICEF equipped 200 teachers with the knowledge and skills to deliver psychosocial support and to identify and prepare them to respond to risks, conflict, and disasters in schools, including COVID-19. Among them were 90 women. The teachers trained will supervise 41,490 students directly in Garoua Boulai, Mandjou and Ouli. Among them, 11,695 are refugee and 373 are internally displaced children.

Child Protection – In August 2021, UNICEF's implementing partners International Medical Corp (IMC) and Main Solidaire provided psychosocial support to 341 children (262 girls and 79 boys) through listening and counselling sessions, recreational activities, painting, and educational talks. Among them, seven gender-based violence cases were registered and documented according to survivor's consent. Two thousand, nine hundred fifty (2,959) people that included (450 girls, 1,056 women, 542 boys and 911 men) were reached in Garoua Boulai, Ketté, Meiganga, Batouri, Ngaoui and Bertoua with key information on recognising, mitigating, and addressing gender-based violence. The sessions were also used to share information on sexual exploitation and COVID-19 prevention strategies.

In Garoua Boulai and Betare Oya, through community-based child protection mechanisms (CBCPMs) 23 children at risk or victims of violence, abuse, and exploitation were identified. Among them, 14 (six boys and eight girls) were involved in child labour and eight were victims of violence and neglect (three girls and five boys).

Also, five denunciations, five referrals and 11 mediations were carried out. One hundred birth certificates, of the 244 birth declarations deposited (in August) were collected through birth registration community-based mechanisms in Garoua Boulai, Mandjou and Bétaré Oya districts.

A total of 27 participants (20 women and seven men) from three national Civil Society Organisations (CSOs) and seven Community based Organisations (CBOs) were equipped with knowledge to better understand gender-based violence (GBV) and skills to deliver psychological first aid through a two-day training hosted in Meiganga. This training aimed to strengthen the local and community actors' capacities on GBV prevention and response. On-going support will be provided by the CSO through coaching sessions on case management.

Communication for Development – In August 2021, in Betare-Oya and Abong Mbang municipalities, UNICEF supported the training of ten community radios for the development of sensitization messages on COVID-19 prevention, immunization. Also, 50 community health workers were trained on community HIV/AIDS awareness and screening in Djohong and Meiganga municipalities.

Humanitarian Leadership, Coordination, Strategy and Partnerships

The Humanitarian / Resident Coordinator in-country leads humanitarian coordination efforts, supported by UN OCHA. At the national level, UNICEF and the Government are co-leading the Nutrition, WASH and Education sectors, as well as the Area of Responsibility for Child Protection. In the Far-North region, UN OCHA leads inter-sector coordination for

out-of-camp refugees, IDPs and host communities, while UNHCR oversees coordination for the refugee response in the East, Adamawa, North and Far-North regions. In the NW/SW regions, clusters are activated to support the humanitarian response. UNICEF leads for the WASH, Nutrition and Education clusters and the Child Protection Area of Responsibility.

In response to the COVID-19 outbreak, UNICEF co-leads with the government the joint pillar on Risk Communication and Community Engagement. The Strategic Council presided by the Ministry of Public Health leads the strategic coordination of the COVID-19 response. Its decisions are guided by a Scientific Committee. The Incident Management System informs the national and decentralised response. The COVID-19 National Plan for 2021 revolves around three strategic objectives: reduction of coronavirus transmissions, curve associated morbidity and mortality, and mitigate the health and socio-economic impact of COVID-19 on the population. The national COVID-19 response planning for 2021 has shifted to a more integrated approach, rather than one led by pillars. The response plan has also included the roll out of a COVAX vaccination campaign.

To respond to the complex and increasing humanitarian needs of children and women in Cameroon, UNICEF's 2021 HAC prioritises: 1) mainstreaming of COVID-19 barrier measures and a response through all its interventions; 2) emphasize needs-based assessment and needs-based resource mobilization with support from data investments for evidence, targeting and advocacy, including the documentation of conflict on children; 3) strengthening gender transformative programming; 4) supporting predictable partnerships with national and international non-governmental organizations that includes capacities for compliance, technical training and quality monitoring, including third-party monitoring; and 5) stronger articulation between humanitarian and development interventions.

Communication

From January to August 2021, communication and advocacy products focused on COVID-19, alternative learning, inclusive education, psychosocial and disaster risk reduction training of community members and teachers.
