

Children and mothers evacuated from Mariupol receiving immediate integrated support in Zaporizhia.

Reporting Period: 03–10 May 2022

# Ukraine Humanitarian Situation Report No. 12

## Highlights

- More than 8 million people are now internally displaced in Ukraine - 63 per cent are women, with 52 per cent of displaced households reporting at least one child between the ages of 5 and 17, and 22 per cent reporting a child under the age of 5. Children continue to be killed and injured, with the Office of the UN High Commissioner for Human Rights recording 238 child deaths and 347 injured children between 24 February and 9 May.
- Since 24 February, 1,576,220 people in Ukraine were able to access health care as a result of supplies distributed, either directly by UNICEF or in partnership with implementing organizations.
- Since 24 February, UNICEF ensured access to safe water for over 1.3 million people, with 131,002 people benefitting from WASH supplies.
- Since 24 February, UNICEF and partner reached 334,099 children and caregivers with mental health and psychosocial support, provided case management and referral services to 45,817 children, and assisted 12,161 women and children with gender-based violence response services.
- During the reporting period, UNICEF supported around 1,500 people evacuated from Mariupol and frontline locations, including 50 people (11 children) evacuated from the Azovstal plant.

## Situation in Numbers

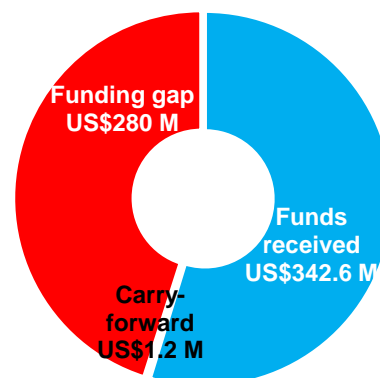

## UNICEF Response and Funding Status

## UNICEF Appeal 2022 US\$624 million\*\*\*

Funding status as of 6 May (US\$ million)

\*Overachievement reported on the case management indicator is mainly due to: (i) under-estimation of target at the planning stage, to be adjusted in a future revision; and (ii) the increase of the coverage of case management through hotlines, 50 multidisciplinary mobiles teams and social workers from NGO partners.

\*\*Children in need is UNICEF estimation out of PIN/OCHA, April.

\*\*\* Revised funding ask, against the revised HAC (April 2022).

The figures reported to the FTS may differ for the same period due to exchange rate fluctuations, recovery cost estimates, as well as in-process allocation of flexible funding.

## Funding Overview and Partnerships

UNICEF has received a total of US\$342.6 million for the response inside Ukraine out of the US\$624.2 million total funding requirement in its revised 2022 [Ukraine and Refugee Outflow Humanitarian Action for Children \(HAC\)](#) appeal (March–August 2022) to provide emergency assistance to 1.7 million war-affected children and their families within Ukraine.<sup>1</sup> Generous contributions have come from many donors including the Governments of Austria, Czech Republic, Denmark, Iceland, Italy, Ireland, Japan, the Republic of Korea, Liechtenstein, Norway, Poland, Sweden, Switzerland, the United States of America, USAID Bureau for Humanitarian Assistance (BHA), the European Commission (EC), and the United Nations Central Emergency Response Fund (CERF).

Ongoing fundraising campaigns by UNICEF National Committees and countries offices have generated timely and flexible support from the private sector, including from corporate partners, foundations, philanthropy partners and individual donors, with US\$326.6 already received for the entire response<sup>2</sup>. Private sector support has been unprecedented with donations received from over 500 businesses, 151 philanthropy partners, 83 foundations, and a large base of individual donors across over 24 countries. Some prominent private sector donors and partners who have made significant contributions include Epic Games, Akelius Foundation, Aeon, Apple, Google, LEGO Foundation, ING, HSBC, Binance Blockchain Charity Foundation, Capgemini and Ikea.

UNICEF continues to work with the Government of Ukraine, United Nations agencies, civil society organizations/NGOs and other humanitarian partners. Close consultations are also being held with Presidential advisors, key ministries (Foreign Affairs; Social Policy; Education; Youth; and Health), mayors in several cities (including through 35 Child and Youth Friendly Cities) and the Ombudspersons Office. Through its long-standing presence in Ukraine, UNICEF has established partnerships in key *hromadas* (municipalities) and is continuing to expand these in all *oblasts* (regions). Overall, more than 80 partners are engaged in UNICEF's response, which despite the challenging conditions, has been able to ensure humanitarian support in some of the most war-affected and hard-to-access locations.

## Situation Overview & Humanitarian Needs

Attacks on civilian populated areas and civilian infrastructure continue endangering children's lives and access to services. Between 24 February and 9 May, the Office of the UN High Commissioner for Human Rights (OHCHR) recorded 238 child deaths and 347 injured children, with the actual number of victims expected to be much higher. Civilian infrastructure continues to be decimated, including a recent attack on a school in Luhansk that reportedly killed 60 civilians and missile attacks on Lviv, railway infrastructure in Kirovohrad, and industrial facilities in Kyiv, Zaporizhzhia and Dnipropetrovsk. The United Nations and the International Committee of the Red Cross (ICRC) continue to help evacuate civilians from cut-off locations and areas under intense fighting, including from the Azovstal industrial site and areas around Mariupol. With more than 8 million people currently internally displaced throughout Ukraine<sup>3</sup> and 5.9 million people seeking refuge in neighbouring countries and beyond,<sup>4</sup> the total number of people forced to flee their homes due to the war is now close to 14 million. The latest survey on the internally displaced population<sup>5</sup> has identified a growing complexity of internal mobility flows. In addition to new displacements and secondary displacement movements, returns to places of habitual residence have been observed. While the share of women displaced is increasing (currently at 63 per cent),<sup>6</sup> the number of displaced households with children remains stable – with 52 per cent of respondents indicating that at least one member of the family currently with them is a child between 5 and 17 years and 22 per cent reporting a child under 5. Internally displaced people report that access to cash, non-food items, medicines, health services, food and hygiene items are their main needs.

## Humanitarian Leadership, Coordination and Strategy

UNICEF is working closely with United Nations agencies, the government and humanitarian partners under the inter-agency framework. UNICEF leads/co-leads the Water, Sanitation and Hygiene (WASH), Child Protection, Nutrition and Education clusters and the Maternal Child Health Care sub-group under the WHO-led Health Cluster.

- [Child Protection sub-cluster](#) partners have reached 457,016 children and caregivers<sup>7</sup> with mental health and psychosocial support (MHPSS) since 24 February.
- [The WASH Cluster](#) launched a new interactive dashboard showing updates on WASH partners' operations in Ukraine <https://www.humanitarianresponse.info/en/operations/ukraine/water-sanitation-and-hygiene>. The Assessment Working Group started developing WASH needs indicators and a methodology.
- [The Education Cluster](#) launched a series of technical deep dives, with the first one dedicated to priorities and programming in newly accessible areas.
- [Nutrition Cluster](#): In March–April, the six organizations in Ukraine that provide nutrition activities in 17 regions

<sup>1</sup> The revised interagency appeal covers March–August 2022; the UNICEF HAC for Ukraine was revised accordingly to reflect UNICEF's proportion of the revised inter-agency Flash Appeal targets and requirements.

<sup>2</sup> This funding has been received for the entire Ukraine HAC appeal of US\$949 million for Pillar 1 (inside Ukraine) and Pillar 2 (Refugee Outflow).

<sup>3</sup> IOM, 'Ukraine — Internal Displacement Report — General Population Survey Round 4 (29 April – 3 May 2022)', 11 May 2022.

<sup>4</sup> UNHCR, 'Operational Data Portal – Ukraine Refugee Situation', accessed 11 May 2022.

<sup>5</sup> IOM, 'Ukraine — Internal Displacement Report — General Population Survey Round 4 (29 April – 3 May 2022)', 11 May 2022.

<sup>6</sup> From 60 per cent in April 2022 to 63 per cent in May 2022.

<sup>7</sup> Out of 457,016 children and caregivers reached with MHPSS, 64,939 were reached by Child Protection AoR partners as reported to the 5W and the rest were reached by UNICEF.

distributed complementary foods for 39,442 children aged 6–23 months and nutrition items for 19,667 pregnant women, while a total of 347,430 people received media messages on infant and young child feeding (IYCF).

**Three-zone humanitarian response strategy:** UNICEF is using a zonal differentiated approach to its humanitarian response in Ukraine. In the east (Zone 1), where humanitarian corridors, intense and sustained conflict, and access constraints are present, UNICEF is using rapid response teams and inter-agency humanitarian convoys, and is engaging municipalities, regional and local administrations and civil society partners to implement its response. Supplies are also prepositioned therein to support children, women and other vulnerable people, including the displaced. In the central and western parts (Zones 2 and 3), which have security risks but little to no access challenges, UNICEF is using existing national systems and structures and is engaging local authorities (regional, municipal) and civil society partners to implement its humanitarian response. Since the war escalated, UNICEF Ukraine has also increased its response capacity with personnel in Lviv, Kyiv, Dnipro, Donetsk, Luhansk, Vinnytsia, and other areas within Ukraine.

### **Highlights of UNICEF's response in Zone 1 (eastern Ukraine), including through the Rapid Response Mechanism (RRM)**

- The RRM team dispatched WASH and shelter supplies for 5,000 internally displaced people in Kropyvnytskyi, where needs have been growing. Additional RRM supplies were distributed in hard-to-reach and contested areas in Lyman and Bahmut, reaching over 40,000 people.
- Ten metric tons (MT) of health supplies<sup>8</sup> were delivered to three key health facilities in Zaporizhzhia, Dnipro and Khariv, serving frontline municipalities and providing crossline medical evacuation. In addition, UNICEF delivered an ambulance to Zaporizhzhia city council to assist with referring critical cases emerging from humanitarian evacuations. The ambulance will also serve as a mobile unit dedicated for paediatric support and will be stationed at the Zaporizhzhia transit/ evacuation centre for internally displaced people.
- Shelters for the internally displaced in Dnipro continue to be served with supplies and protection services. Approximately 500 families arriving in Dnipro received family hygiene kits and recreational supplies and were registered in the multi-purpose cash assistance programme.
- In Zaporizhzhia, 80 shelters and centres for internally displaced people were reached with shelter, WASH, protection and nutrition supplies, cash registration, counselling and child protection activities, allowing capacity to serve over 30,000 internally displaced people.
- During the reporting period, UNICEF supported the 1,500 people evacuated from Mariupol and frontline locations, including 50 people (11 children) evacuated from the Azovstal plant.

## **Summary Analysis of Programme Response**

**Health and Nutrition:** Since 24 February, 1,576,220 people in Ukraine were able to access health care as a result of supplies distributed, either directly by UNICEF or in partnership with implementing organizations.

During the reporting period, critical midwifery, obstetrics, surgical, medical and first aid kits, and diagnostic and treatment equipment were delivered to hubs in Dnipro and Odessa. These supplies are being distributed to eight health care facilities and shelters. In addition, eleven maternity houses (perinatal centres) and three children's hospitals in Dnipro, Rivne, Mikolayiv, Vinnitsa and Kyiv received life-saving medical supplies.

To support families with newborns in the most affected locations, UNICEF developed a newborn kit (*Pakunok-Poriatunok*) consisting of all the necessary items a baby needs in the first month of life (diapers, clothes, hygiene supplies). During the reporting period, 1,680 newborn kits were distributed among maternity houses and perinatal centres. In total, over 15,000 kits will be distributed in the most affected regions in the coming weeks.

Additionally, based on a Ministry of Health (MoH) request, UNICEF has procured and delivered to Ukraine:

- 1,000,000 rapid antigen tests for COVID-19. The tests were handed over to MoH for distribution in health care facilities to support COVID-19 prevention and response.
- 10,000 pieces of the hemostatic drug CELOX RAPID Gauze, which rapidly stops severe bleeding. These life-saving medical items were given to MoH for future use in hospitals.
- 150,000 pediatric doses of Hepatitis B vaccine.

**Child Protection:** UNICEF continues strengthening the ongoing efforts to prevent violence against children and providing conflict-affected children and their families with protection services (including MHPSS) through acceleration of partnership agreements with national NGOs. To date, 334,099<sup>9</sup> children and caregivers have benefited from UNICEF-supported MHPSS interventions through face-to-face and online group and individual psychological counselling. Additionally, 45,817 children have benefited from case management and referral to support services, and 12,161 women and children have been reached by UNICEF-supported gender-based violence response services.

UNICEF and partners trained 383 professionals on MHPSS principles and 'do no harm' strategies (including

<sup>8</sup> The estimated population that can be covered by this volume of supplies, namely, interagency emergency health kits, is estimated at around 165,000 people as verified with partners and also by standard population estimates in the UNICEF supply catalogue.

<sup>9</sup> This includes 175,179 children and caregivers reached during the reporting period.

psychological first aid and orientation on IASC MHPSS guidelines). As a result, 7,000 children and parents benefited from MHPSS interventions. Furthermore, 124,900 parents and caregivers were reached with online information and guidelines on MHPSS and how to support children in psychosocial distress.

UNICEF continued its outreach support to conflict-affected children and families in western, central and eastern Ukraine through capacity building and deployment of the 56 Rapid Response Multidisciplinary Teams (mobile teams) that continue to operate in 11 regions. Over the reporting period, the mobile teams were able to assist 10,605 children and caregivers (including 704 children with disabilities) with gender-based violence (GBV) prevention and response services, psychosocial support (PSS), basic case management, legal support, and referrals to protection services.

Through UNICEF support, the national toll-free Child Helpline provided consultations to 1,995 children and youth (84 per cent girls). In addition, 3,106 social workers were supervised and coached through the dedicated Ministry of Social Policy (MoSP) helpline.

Initial monitoring of children in residential care was completed in all 25 *oblasts*. As of 5 May, 42,979 (out of a total of 51,462 children in 24-hour institutional care by late february) have been returned home. From the 8,483 children in institutions, 3,097 remain in the institutions where they were originally located, 2,074 were evacuated within Ukraine, and 3,312 have been relocated abroad. A total of 15,285 children in family-based alternative care were monitored and their basic needs assessed. A total of 18,677 Ukrainian families have applied to foster children through the Telegram chatbot, which has been actively used since early March.

**Education:** As of 4 May, according to the Ministry of Education and Science (MoE), distance learning continues in 18 regions in Ukraine, while schools in the other seven regions are operating either in distance modality or have suspended learning activities. More than 3.7 million students continue receiving distance education. There are approximately 92,000 displaced children enrolled in schools in host communities, an increase of around 4,000 children from 28 April.

Since 24 February, 277,610 children have benefited from learning interventions with supplies provided by UNICEF, and 186,112 children have been engaged in formal or non-formal education. UNICEF has launched a new partnership with a local NGO to provide technical support for National Multi-Subject Testing, administered by MoES in the framework of the E-Admission campaign 2022. This partnership works to ensure fair, transparent admission to tertiary educational institutions in Ukraine, benefitting over 300,000 students that will access National Multi-Subject Testing.

Within the All-Ukrainian Online Schedule, UNICEF and a local NGO conducted online classes for 22,136 children, including 2,128 children who attended online PSS activities. UNICEF and partners engaged 101 volunteer educators to conduct socio-emotional learning activities through creativity workshops for 318 displaced and local children in Kyiv, Kharkiv, Poltavaska, and Kirovohradska *oblasts*.

UNICEF has started a new partnership to improve young children's access to preschool education, and the capacities of parents and teachers to support children's learning. Some 45,000 children of preschool age will be reached with the planned activities. With partners, UNICEF trained 84 preschool teachers on learning through play and online learning in Vinnitsa *oblast*. At least 4,860 children benefited from early learning activities by the trained teachers.

UNICEF provided 228 early childhood development (ECD) kits, 171 recreation kits, and 67 school-in-a-box kits to schools, collective centres, hospitals, and *Spilno Spots* in western and central Ukraine, benefitting over 12,700 children. Furthermore, education materials and books were delivered to 115 preschools and collective centres, including 15 *Spilno Spots* in Lviv, Ternopil, and Ivano-Frankivsk *oblasts*.

Over 190,000 publications for parents and teachers were distributed in Lviv, Ternopil and Ivano-Frankivsk *oblasts*. The publications provided recommendations on how to help children during conflict; how to understand the signs of distress; how to support a child; a set of games and relaxing exercises; and audiobooks.

As part of UNICEF and partners' efforts to engage adolescents and young people, female hygiene supplies and information on menstrual hygiene were delivered to 620 adolescent girls in Kyiv suburbs and Poltava *oblast*.

UNICEF and a partner rolled out the global socio-emotional programme for adolescents, 'Adolescent Kit for Expression and Innovation', involving 40 facilitators and 172 adolescents. In addition, with UNICEF support, volunteers from a grassroots NGO working in rural areas in Ivano-Frankivsk *oblast*, engaged 165 children and adolescents in socio-emotional learning, and 400 children received WASH and educational supplies. A total of 110,320 volunteers (80,275 girls, 30,045 boys) are now engaged through the UNICEF and Ukrainian Volunteer Service network and have provided learning opportunities to 292 children and PSS to 122 children, among different areas of humanitarian support.

**Water Sanitation and Hygiene (WASH):** Since 24 February, UNICEF has ensured access to safe water for 1,349,182 people in affected areas, including through water trucking, bottled water distribution and supporting water availability in collective centres and other critical infrastructure. In addition, 131,002 people have been reached with WASH supplies.

UNICEF continues strengthening the capacity of the State Emergency Services of Ukraine to provide safe water, handing over 40 collapsible water tanks, 180 boxes of purification tabs (16,000 tabs/box) and 340 rolls of plastic tarpaulin during the reporting period. This donation will help to minimize the impact of water shortages and improve daily access to safe WASH for over 7,500 people.

UNICEF implementing partners and local authorities received life-saving supplies (WASH, dignity, family, baby, and hygiene kits and personal hygiene items such as soap, sanitary pads, toothpaste and toilet paper) for further

distribution to families with children and people with disabilities in Odessa, Lviv, Zaporizhzhia, Poltava, Dnipropetrovsk, Kyiv, Luhansk and Zakarpattia *oblasts*. Around 20,429 people will benefit from these critical hygiene supplies.

In addition, 3,000 water bottles (0.5 litres) were provided to internally displaced people in Zaporizhzhia. In Mykolaiv, where the population is facing water shortages, centres for the internally displaced received six water tanks and tarpaulin. UNICEF also provided a generator to Mykolaiv *vodokanal* (water utility company), which will help to restore water supply in the city. UNICEF continued to truck water in Avdiivka (12,000 litres during the reporting period) and in Kharkiv (21,580 litres during the reporting period), ensuring availability of safe drinking water for over 3,000 people.

**Social Protection:** Since the launch of the programme, 1,246 households have received multi-purpose cash assistance, including 6,026 adults and 3,782 children. During the current reporting period, 712 households (over 3,300 people) were reached. Consultations continued for establishing new agreements with banking entities, to serve as alternative financial service providers. In addition, implementing partners are being trained on de-duplication and grievance management.

**Influencing Social Behaviour:** During the reporting period, UNICEF's social and behaviour change (SBC) content reached over 5 million social media users in Ukraine with key messages on protection, health, education and social services.

The Facebook series on Explosive Ordnance Risk Education (EORE) reached 3,479,378 users and included new animated public service announcements. A new EORE campaign, focused on edutainment videos for children, reached 6.5 million unique users on YouTube.

To promote the importance of breastfeeding, UNICEF helped to produce user-generated content by six bloggers. Content on breastfeeding was also disseminated through regional media and groups, with a total audience of 1.5 million people. The series of physical education lessons for school children has continued, with school children engaged from 12 different regions. Five sessions have been live streamed and featured national celebrities.

Three live streams and two content pieces about health and parenting have been released by influencers and experts as part of the digital engagement campaign *#важливоякніколу*. TV host Lilya Rebryk, with 780,000 Instagram followers, has joined the project to publicly promote SBC messages.

The online preschool project NUMO has released five new episodes, reaching 732,200 Facebook users, and held a knowledge exchange session for preschool educators. UNICEF continued to distribute information, education and communication materials through Spilno Child Spots<sup>10</sup> and other channels, reaching caregivers across the country with 108,970 materials of 13 different types during the reporting period. A total of 71 frontline mobile workers who were trained how to use the SBC and edutainment materials, received weekly information sessions.

In the framework of Accountability to Affected Populations (AAP), 17,241 people were consulted on the cash assistance programme through the hotline. Social listening mechanisms have been strengthened with the roll-out of KoBo, a tool for Spilno Child Spots personnel to report misinformation and caregivers' needs for information and services.

## Supply & Logistics

Over US\$69 million worth of purchase orders have been placed by the UNICEF Supply Division in Copenhagen, and the Turkey and Ukraine country offices have placed sales orders for Ukraine for US\$109 million. The sales order value reduction is due to changes in quantities considering availability and lead-time. US\$15 million worth of supplies have arrived in Ukraine's warehouses, while supplies valued at US\$11.6 million have been dispatched to implementing partners and repositioned in Dnipro warehouses for rapid response distribution.

## External Media

UNICEF continues to highlight the situation of children and their families in Ukraine and advocate for their safety through external and internal media outlets. The following are a selection of communication materials produced in the reporting period:

### Human interest stories

[Online learning helps Ukraine's children stay in school](#)

[Children bear psychological scars of war in Ukraine](#)

[In Ukraine, specialists unite to help families far from home](#)

### Press releases

[Statement by UNICEF Executive Director Catherine Russell on latest school attack in Luhansk, Ukraine](#)

# people sharing their concerns and asking questions/clarifications to address their needs through established feedback mechanisms	Total		530,000	117,165**	17,241 ▲

\* This result is calculated based on the delivery of supplies from UNICEF to implementing partners.

\*\*Unique numbers that contacted the hotline (one number could call 1-3 times per period)

## Annex B: Funding Status as of 6 May<sup>14</sup>

With humanitarian needs multiplying in Ukraine, the revised UNICEF HAC appeal reflects additional resource requirements to reach vulnerable children and families with essential services and life-saving supplies. Continued, flexible contributions mean UNICEF and partners can act quickly and respond strategically where needs are greatest.

Sector	Requirements	Humanitarian resources received in 2022	Funds available	Funding gap	%
			Resources available from 2021 (Carry-over)	US\$	
Health and Nutrition	83,900,000	76,484,205	8,396	7,407,399	9%
WASH	94,500,000	76,331,697	358,670	17,809,633	19%
Child Protection , GBViE & PSEA	59,300,000	41,068,229	687,566	17,544,205	30%
Education	31,400,000	21,253,164	121,659	10,025,177	32%
Social Protection	355,149,430	127,496,229	0	227,653,201	64%
<b>Total</b>	<b>624,249,430</b>	<b>342,633,524</b>	<b>1,176,291</b>	<b>280,439,615</b>	<b>45%</b>

<sup>11</sup> Indicators for nutrition will need to be revised; most of what UNICEF is doing is technical support to partners on IYCF and key messaging to caregivers; and also commodities like LNS, infant formula (RUIF, powdered BMS), baby food etc. to support prevention of malnutrition which are not clinical services as per the indicator measure. For iron supplementation for pregnant women, while UNICEF has provided iron supplement to health counterparts; as per national protocols in Ukraine, iron supplementation is only given to pregnant and lactating women who are diagnosed with anemia for treatment; not as a prevention

<sup>12</sup> The counting of numbers of children and caregivers accessing MHPSS is being reviewed by UNICEF as per IASC guidance on community-based MHPSS in emergency settings (2019) which has a broader view on access to MHPSS services, including online, social channels, as well access to messages on MHPSS.

<sup>13</sup> 3.6 million is the overall education sector need, including 3.3 million children.

<sup>14</sup> Figures reported to FTS may differ for same period due to exchange rate fluctuation, recovery cost estimates, and in-process allocation of flexible funding.
