Part II - Knowledge Products and Resources
For every child
Whoever she is.  
Wherever he lives.  
Every child deserves a childhood.  
A future.  
A fair chance.  
That’s why UNICEF is there.  
For each and every child.  
Working day in and day out.  
In more than 190 countries and territories.  
Reaching the hardest to reach.  
The furthest from help.  
The most excluded.  
It’s why we stay to the end.  
And never give up.
WHO WE ARE

UNICEF works in over 190 countries and territories to save children’s lives, to defend their rights, and to help them fulfil their potential, from early childhood through adolescence. And we never give up.

WASH

Growing up in a clean and safe environment is every child’s right. WASH program is designed to improve and implement, through the dissemination of knowledge, information management and investment in development, to ensure the equitable and sustainable use of safe drinking water, basic sanitation and the promotion of improved hygiene.

THE CATALOG

This catalog lists and summarizes the main purposes of the reports and publications carried out by UNICEF between January and December 2022.

STAY CONNECTED

Message

As in previous years, I am happy to bring to our readers, friends, and partners the Third Edition of our UNICEF Annual WASH Publication Catalogue 2022, as a compendium of key knowledge products for the Water, Sanitation and Hygiene (WASH) Sector. This catalogue provides a comprehensive collection of UNICEF’s knowledge and evidence central to learning. Further, it is essential in informing change and influencing development policies and programmes in favour of children and the most vulnerable communities. We recognize your contributions and the collective efforts in jointly continuing to document and build thought leadership in the sector.

The 2022 edition of the catalogue is divided in two parts and features 144 reports and studies including flagship publications related to WASH and COVID-19, as well as 265 publications from learning and knowledge sharing events. I take pride and honour in being able to share rich knowledge and learnings across the regions and countries to advance water and sanitation rights to children and communities.

I truly hope you enjoy reading and accessing the products from this version of the catalogue. We are happy to receive your feedback for continuously improving the coverage and quality of our knowledge products – for this generation of WASH practitioners and those to come!

Putting “Safely Managed” in Sanitation! What you need to know

This course and the Game Plan to Reach Safely Managed Sanitation has been formulated in response to evidence that progress towards universal sanitation is alarmingly off track, unevenly distributed between countries, and inadequate to eliminate inequalities and ensure the most vulnerable are reached. In 2020, the WHO-UNICEF Joint Monitoring Program (JMP) estimated that the rate at which sanitation coverage was increasing would need to quadruple to achieve universal access to safely managed services by 2030. A major escalation of effort is needed.

UNICEF-World Bank Joint Workshop on CWIS

The UNICEF-World Bank Joint Workshop took place for the second time to tackle the topic of urban sanitation/Citywide Inclusive Sanitation (CWIS) on February 16, 2022; 08:00-10:00 EST.

Building on the last year event, the main objective of this workshop was to explore how the two institutions can collaborate more broadly and increase our engagements at country level. The workshop provided the opportunities of sharing the latest information on the UNICEF’s new sanitation gameplan and World Bank’s Scaling up CWIS initiative.

Dushanbe Water Process

The Dushanbe Conferences on the implementation of the Water Action Decade provided a unique platform for highlighting and consolidating the necessary information on water and focusing on how national governments, the UN and its agencies, other international and regional organizations, international financial institutions, the private sector, civil society, scientific communities, local communities and authorities, and other stakeholders can stimulate actions and partnerships in the field of water resources to contribute at all levels to the implementation of goals and objectives, related to water resources, including the 2030 Agenda for Sustainable Development.

Systems strengthening in fragile contexts: lessons learned through practice

Strengthening specific building blocks of a WASH system is possible in fragile settings. During the All Systems Go Africa symposium 19-21 October 2022 a session brought together a range of examples from Mali, Malawi, Burkina Faso and Ghana to demonstrate what works and provides the audience with practical examples as various kinds of fragility are on the rise across many contexts deemed stable and strong.

WASH and CEED Essentials of the new SP

This global Learning Session on WASH and Climate, Energy, Environment and Disaster Risk Reduction (CEED) has been launched to bring all staff up to speed with the understanding and implementation of our new UNICEF Strategic Plan covering the period of 2022-2025 and beyond.

This Learning Course is structured around 9 modules that covers the global strategic context, our results in the new SP followed by our accountability on results and reporting. As WASH in cross-cutting across many other sectors, we will also bring on our cross-cutting global leads to share with us how WASH is positioned within their delivery framework.

MH Day Preparatory Webinar 2022!

As you all know, every 28th of May UNICEF joins the world as it celebrates Menstrual Hygiene Day, a moment to let our voices be heard and advocate for the importance of addressing equitable and dignified menstrual health and hygiene.

To help you prepare, we have partnered again with WASH United for a global webinar to introduce the year’s theme and to share the campaign materials: the theme for 2022 Menstrual Hygiene Day is #WeAreCommitted.

During this webinar you will be hearing about events last year and plans for next year including a new “Action Cycle” to help capture what we are doing. Additionally, experiences will be shared from two regional offices (ROSA & LACRO) and two country offices (India & Brazil).

South Asia Regional WASH and Environment Network Meeting 2022

The 2022 WASH and Environment Network Meeting was organized from 31 May to 3 June 2022 in Kathmandu, Nepal. The meeting provided an opportunity for staff across the region to meet in person to focus on the ambition of Goal Area 4 and also provided an opportunity to share country experiences and identify new climate-related workstreams. The meeting was carried out in a hybrid format; face-to-face as well as virtually (with few exceptions), which allowed interested CO staff to join as well. WASHENET was attended by twenty-eight participants.
