For every child

Whoever she is.
Wherever he lives.
Every child deserves a childhood.
A future.
A fair chance.
That’s why UNICEF is there.
For each and every child.
Working day in and day out.
In more than 190 countries and territories.
Reaching the hardest to reach.
The furthest from help.
The most excluded.
It’s why we stay to the end.
And never give up.

WHO WE ARE
UNICEF works in over 190 countries and territories to save children’s lives, to defend their rights, and to help them fulfil their potential, from early childhood through adolescence. And we never give up.

WASH
Growing up in a clean and safe environment is every child’s right. WASH program is designed to improve and implement, through the dissemination of knowledge, information management and investment in development, to ensure the equitable and sustainable use of safe drinking water, basic sanitation and the promotion of improved hygiene.

THE CATALOG
This catalog lists and summarizes the main purposes of the reports and publications carried out by UNICEF between January and December 2023.

STAY CONNECTED

Message

Continuing the tradition of past years, we are delighted to present the Fourth Edition of our UNICEF Annual WASH Publication Catalogue 2023. This catalogue serves as a compilation of essential knowledge products UNICEF developed or contributed to for the Water, Sanitation, and Hygiene (WASH) Sector.

This catalogue is a comprehensive overview of UNICEF’s knowledge work throughout 2023. It highlights our commitment to capturing, documenting and sharing knowledge and evidence, recognizing them as pivotal in fostering learning, driving change, and shaping development policies and programs in support of children and the most vulnerable communities. We deeply appreciate your contributions and collaboration as we continue to strive together towards global thought leadership in the sector.

The 2023 edition of the catalogue is spread across two parts and features central publications, study reports and WASH publications involving themes such as systems strengthening, water security, menstrual health and hygiene. UNICEF have collaborated with several partners including UN agencies, Universities and NGOs and jointly published several of these reports and publications.

I would like to extend my sincere gratitude to our WASH colleagues and partners for their invaluable contributions to this catalogue. It represents our collective effort to document the important work and insights from UNICEF and partners work in regions and countries to advance the right to water and sanitation for children and communities.

We hope you enjoy exploring the content featured in both parts of the catalogue and welcome your feedback to further improve the coverage and quality of our knowledge products, we hope benefiting both current and future WASH practitioners.

Cecilia Scharp
