Ukraine Humanitarian Situation Report No. 54

Reporting period: 1 to 31 July 2025

Highlights

- The verified number of children killed or injured in Ukraine between 1 March and 31 May 2025 increased by more than 200 per cent compared to the previous quarter. 222 children were killed or injured between 1 March and 31 May 2025, compared to 73 between 1 December 2024 and 28 February 2025. UNICEF continues to call for immediate compliance with international humanitarian and human rights law and to end and prevent grave violations against children.
- UNICEF is making use of the school vacation to implement an intensive 1.5 month remedial programme for 9,920 children including 5,397 girls and 250 children with disabilities across 53 schools and digital learning centres. This approach uses the summer period to bridge learning losses and build students' learning competencies for the upcoming school year, along with embedded mental health and psychosocial support.
- UNICEF supported 11 water utilities in six regions (Dnipropetrovsk, Kharkiv, Kherson, Mykolaiv, Poltava and Zaporizhzhia), helping secure sustained access to safe water and sanitation for 91,964 people (40,901 women, 35,868 men, 7,374 girls and 7,821 boys). In Zaporizhzhia region, for example, the reconstruction of 8,470m of water networks was completed, improving the reliability of water for local communities.
- In July, UNICEF provided mental health and psychosocial support services to 14,522 children (8,149 girls) and 5,002 caregivers through multiple platforms, including the online platform PORUCH, the National Hotline, mobile teams, child-friendly spaces and Resilience Centres.

Situation in Numbers

1.9 million

(UNICEF HAC 2025)

UNICEF Appeal 2025 US\$400 million

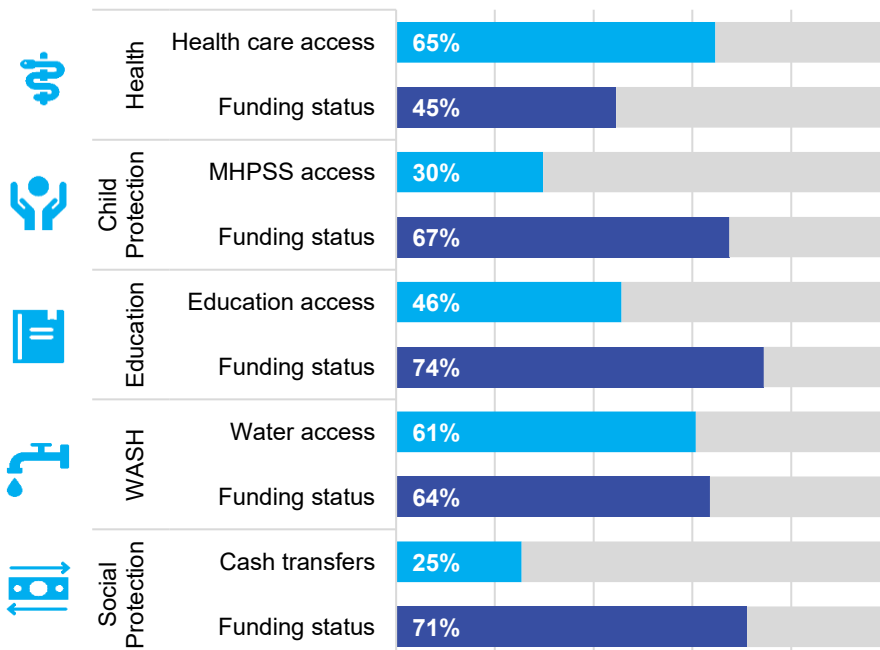

Funding status as of 31 July

The overall HAC funding gap status does not represent gaps by sector. For further details by sector, please refer to Annex B.

Figures reported to the FTS may differ for the same period due to in-process allocation of flexible funding. This reflects the requirements for Pillar 1 (inside Ukraine).

UNICEF Response and Funding Status

Funding Overview and Partnerships

UNICEF has US\$263.1 million available for its response inside Ukraine (Pillar 1) under its [Humanitarian Action for Children \(HAC\)](#) appeal of US\$400 million. This includes US\$186.6 million carried over from 2024 and US\$76.5 million received in 2025. The HAC was developed in line with the reprioritized Ukraine [Humanitarian Needs and Response Plan \(HNRP\) 2025](#), which was reprioritized to target 4.8 million people, compared to the initial target of 6 million of the 12.7 million people in need. The funding requirements have been similarly reprioritized to [US\\$1.75 billion compared to the original US\\$2.63 billion](#). Generous contributions have been received from the private sector, including individuals, corporations and foundations. Funding has also been received from the people and Governments of Austria, Bulgaria, Croatia, France, Germany, Ireland, Japan, the Republic of Korea, Latvia, Norway, Poland, Portugal, Spain, the United Kingdom, the United States, as well as from the European Union, Gavi, the Vaccine Alliance, and the Global Partnership for Education (GPE).

UNICEF works with the Government of Ukraine, United Nations agencies, civil society and non-governmental organizations (NGOs) and other humanitarian partners. Close cooperation is ensured with key stakeholders (Ministries of Foreign Affairs, Social Policy, Education and Science, Health, Youth and Sports, Ministry for Communities, Territories and Infrastructure Development, regional administration, city councils in several cities and the Ombudsperson's Office). UNICEF has established partnerships with the concerned municipalities and will continue to expand them. UNICEF engages with 110 government, civil society and service provider partners to respond to the critical needs of children and families across Ukraine.

Situation Overview & Humanitarian Needs

In July, 286 civilians (10 children) were killed and 1,388 injured (61 children), continuing a [trend of high civilian casualties this year](#). July 2025 had the highest number of civilian casualties in three years, with increasing numbers from frontline regions. For example, on 29 July, a missile struck a hospital in Kamianske, Dnipropetrovsk, killing two patients, including a pregnant woman, and injuring at least 22 others (16 women) including patients and staff. On the same day, in Novoplatonivka, Kharkiv region, 7 people (3 women) were killed as they waited in line for water distribution. Meanwhile, further from the frontline, a large-scale attack on Kyiv on 31 killed 31 people (14 men, 12 women, 3 boys and 2 girls) and injured 171 others (79 men, 75 women, 10 girls and 7 boys). In one residential building hit by a missile, 9 families lost at least 2 family members.

OCHA Humanitarian Situation Overview, August 2025

Mandatory evacuations expanded to [Dobropilska](#), [Druzhkivska](#), and [Lymanska](#) municipalities. Transit centres in Dnipro city and Pavlohrad face overcrowding, while preparations have accelerated for expanding transit capacity within the Dnipropetrovsk region. From March to May 2025, [42,000 people were displaced](#) with the majority from Donetsk (18,000) and Sumy (16,000).

Humanitarian Leadership, Coordination and Strategy

UNICEF is working closely with United Nations agencies, the government and humanitarian partners under the inter-agency framework. UNICEF leads/co-leads the Water, Sanitation and Hygiene (WASH) and Education Clusters, Child Protection Area of Responsibility, the Social Protection Sub-Group under the Cash Working Group and the Nutrition Technical Working Group and Maternal Child Health Care Sub-Group under the Health Cluster. Along the frontlines, where intense and sustained fighting and access constraints remain, UNICEF participates in inter-agency humanitarian convoys and engages with municipal, regional and local administrations and civil society partners to implement its urgent humanitarian response. In the central and western parts of the country, UNICEF uses existing national systems and engages local authorities and civil society. Flagship priorities include Better Start to Life (Early childhood development – ECD), Better Learning and Skills (Maximizing the potential of children and youth) and Better Care (A family for every child).

Summary Analysis of Programme Response

Health and Nutrition: In July, UNICEF continued to ensure that children and caregivers in conflict-affected and hard-to-reach areas had access to health and nutrition services. **Mobile medical teams** in frontline Dnipropetrovsk, Donetsk and Zaporizhzhia regions provided primary health care to 186 people (144 women and 42 men). Meanwhile, through the **Preventive Child Health Examination programme**,¹ 1,349 children and caregivers (314 girls, 316 boys, 516 women and 203 men) received home visits supporting newborn care, maternal health and ECD. Each nurse is equipped with a home visiting kit to provide quality care in household settings, ensuring that even the most vulnerable children receive timely health interventions.

¹ In line with the Ministry of Health decree, the Universal Progressive Home Visiting model has formally been titled Preventive Child Health Examinations

To address nutrition and safe **infant feeding and young child feeding (IYCF) in emergencies**, 1,961 caregivers (1,770 women and 191 men) received IYCF counselling through health facilities, mobile teams, home visits and virtual peer support groups. Caregivers benefited from practical guidance on breastfeeding, complementary feeding and stress management, helping mitigate the risks of malnutrition in children under 2.

Child Protection: In July, 3,560 children (1,693 girls) were reached with child protection **case management** to ensure their range of specific needs and vulnerabilities are addressed holistically with individualized support. This includes supporting children and families affected by airstrikes with case management and emergency protection cash assistance (USD 400 per eligible household) to support protection outcomes for those affected.

UNICEF supported 17,762 women and children (4,126 girls, 3,199 boys, 223 with disabilities) with **gender-based violence (GBV)** prevention, mitigation and response interventions in July. Four new Safe Spaces for girls and women were launched in Sumy region reaching 1,758 people (1,009 women, 490 girls and 230 boys). UNICEF and its partners now operate six such centres. Additionally, information sessions to raise awareness on GBV, promote help seeking behaviours and facilitate access to lifesaving services were conducted in frontline areas by mobile teams.

A summer safety communication campaign was launched targeting adolescents and their families focused on **mine safety, fire safety and water safety**. To design the campaign, a series of group discussions was conducted with adolescents from small towns, villages and semi-urban areas [identified by a UNICEF assessment as the most vulnerable](#) to injury by explosive ordnance. Summer safety digital content has reached 39,203 adolescents, parents and caregivers to date. Mobile Safety Classes, including mine safety training, reached 7,126 children in 10 regions in July while UNICEF implementing partners engaged a further 3,435 people. The educational series '[How to Act in Emergency Situations](#)' on Diia.Education has reached 1,130 people this month for a total of 168,339 people this year. The series was promoted on social media to 947,724 people and to expand the access further, it is now available on Kyivstar TV.

A UNICEF mobile team visits a family affected by strikes ©UNICEF/2025

As of July, **Child Protection Area of Responsibility (CP AOR)** partners have reached 597,977 people, including 466,720 children (257,489 girls) and 17,158 people with disabilities. This accounts for 21 per cent of the overall HNRP target and 29 per cent of the prioritized target. This includes 135,352 children and 39,371 caregivers reached through case management, mental health and psychosocial support (MHPSS) and referrals in frontline communities and 959 children and 667 caregivers provided with evacuation-linked protection support, including psychological first aid, legal information and service referrals. In response to air strikes, 649 children and 358 caregivers received psychosocial assistance, interim care and material support. Finally, 93,031 displaced children and 23,554 caregivers were assisted with mobile outreach, structured MHPSS and linkages to essential services.

The CP AOR published a [Second Quarter Response Snapshot](#) with a midyear overview of progress, gaps and service delivery capacities. [Child Protection Service Mapping](#) efforts continued, covering 68 implementing partners, 545 child protection focal points and 240 mobile teams. Additionally, the CP AOR launched a [LinkedIn page](#) to share updates, results and tools with a network of humanitarian and development actors. During July, five trainers previously trained by the CP AOR cascaded the online training to 52 caseworkers and supervisors. The trainings focused on quality child protection case management, ethical decision-making and the use of national referral pathways.

Education: UNICEF continued the provision of **early childhood education (ECE)** in July, leveraging the summer period to ensure additional learning support for young children. The '2x2' initiative operated in 37 preschools and community centres reaching 3,357 young children, including 1,600 girls. The programme is implemented in Dnipropetrovsk, Kherson, Mykolaiv, Odesa, Poltava, Sumy and Zaporizhzhia delivering ECE services for two hours a day two days a week in a safe community space to ensure sustained cognitive, emotional and social development for children.

A new addition was introduced to the NUMO ECD platform: The [NUMO Play & Travel](#) board game fosters children's speech, logical thinking, emotional expression and social skills. UNICEF installed [interactive stands](#) in nine parks including in Dnipro, Kharkiv and Odesa to promote the game. So far, 1,157 parents, 459 boys and 698 girls have been engaged. Overall, 85,116 users including parents, caregivers, educators and children interacted with NUMO digital ECD tools in July (website, mobile app, chatbot and Viber channel).

UNICEF is also making use of the school vacation to implement an **intensive 1.5 month remedial programme** for 9,920 children including 5,397 girls and 250 children with disabilities, across 53 schools and digital learning centres. This approach uses the summer period to bridge learning losses and build students' learning competencies for the upcoming school year, along with embedded MHPSS. In southern and eastern regions such as Kharkiv, Odesa and Poltava attendance has been consistently high during the summer intensive courses, with 70 per cent of children attending on a regular basis. Learning assessments reveal improvements in student performance, particularly in foundational subjects where, for example, the average improvement across all catch-up summer schools in Poltava was 27 per cent.

In July, rehabilitation was completed on three **school shelters** in Zaporizhzhia city to support in-person learning for 1,762 students. Rehabilitation is also underway at an underground metro school in Kharkiv and for 17 schools impacted by airstrikes. During the reporting period, a third-party monitoring report covering shelter rehabilitation efforts from 2022 to 2024 was finalized. The report found that 92 per cent of rehabilitations were completed on time, with most institutions expressing satisfaction with the quality and responsiveness of UNICEF support. While initial satisfaction among staff and school management was high (97 per cent), longer-term feedback highlighted emerging concerns: 30 per cent of institutions reported complaints from children or parents, and 43 per cent of staff suggested improvements related to overcrowding, inadequate ventilation and limited accessibility. Findings from the report will be used to inform and strengthen ongoing shelter rehabilitation activities.

Specialized rehabilitation services were provided for 2,196 **children with disabilities** (1,120 girls) including physiotherapy, occupational and speech therapy as well as MHPSS to enhance their functional abilities and learning. 2,196 children (1,120 girls) with disabilities and special education needs also received correctional and developmental support, while 345 specialized rehabilitation sessions were conducted for 62 children across nine municipalities of Kharkiv.

UNICEF provided **professional development** for 295 teachers (292 women) this month, equipping them with practical skills in learning recovery, MHPSS, positive classroom management and [Universal Design for Learning](#). In post-training assessments, teachers highlighted that this capacity building initiative not only enhanced their ability to address diverse learning needs and the emotional wellbeing of students but also promoted inclusive, engaging and adaptive teaching practices that contribute to improved learning outcomes and safer classroom environments for all children.

As of July, **Education Cluster** partners have facilitated learning for 352,229 children (179,637 girls) and 10,563 teachers (9,858 women) or 53 per cent of the reprioritized HNRP target. The Cluster has established a Children Advisory Group to ensure accountability to affected children and to constructively incorporate the participation of children in decision-making about the education response. The group is managed by school-aged children representing various regions including Cherkasy, Ivano-Frankivsk, Kharkiv, Kyiv, Sumy, Zaporizhzhia and Zhytomyr.

The Cluster conducted a survey of 294 parents and teachers from Kherson, Mykolaiv and Odesa to improve the evidence-based response to the educational needs of displaced children in the south. The survey revealed that 45 per cent of displaced children face educational setbacks, mainly due to psychological stress and challenges related integrating into host schools. The greatest needs include tutoring, MHPSS and group learning activities.

In terms of the transition of the Education Cluster to a Sector Working Group (SWG), the timeframe has been extended from December 2025 to December 2026. This will allow the Education Cluster to participate in the HNRP for 2026. The Education in Emergencies Working Group within the SWG is taking the transitional leadership role from the start of the new academic year in September 2025 with representation from civil society.

Education Cluster Child Advisory Group ©UNICEF/2025

Mental Health and Psychosocial Support: In July, UNICEF provided **mental health and psychosocial support** services to 14,522 children (8,149 girls, 6,373 boys) and 5,002 caregivers through multiple platforms, including the online platform PORUCH, the National Hotline, mobile teams, child-friendly spaces and Resilience Centres. This month UNICEF focused on strengthening the capacity of child protection partners to deliver standardized, evidence-based interventions. In total, 1,708 professionals (1,604 women) were trained. The standardized interventions include: 'Children and War: Teaching Recovery Techniques' aimed at professionals working with children and parents showing symptoms of post-traumatic stress disorder; 'I Support My Friends' allowing for psychological first aid through peer-to-peer support; 'Building a Positive Life Perspective' which helps adolescents and young people develop goal-setting skills and build a positive outlook; and 'Stress-Free Parenting' to support parents to build healthy relationships with their children.

This month also saw 1,015 youth (695 females) engaged through **peer support groups** in Odesa as well as through structured psychosocial services at youth centres in Kharkiv helping adolescents manage trauma and build coping strategies. These efforts ensured young people in high-risk areas were not only supported but empowered as active contributors to their communities' recovery and resilience.

Water, Sanitation and Hygiene: UNICEF supported 11 water utilities in six regions (Dnipropetrovsk, Kharkiv, Kherson, Mykolaiv, Poltava and Zaporizhzhia), helping secure sustained **access to safe water and sanitation** for 91,964 people (40,901 women, 35,868 men, 7,374 girls and 7,821 boys). In Zaporizhzhia region, the reconstruction of 8,470m of water networks was completed, improving the reliability of water for local communities. The new pipelines have already reduced water losses by 8.5 per cent, increasing efficiency, lowering energy consumption and reducing the need for treatment chemicals. In Dnipropetrovsk region, Auly water utility received water quality testing equipment to monitor heavy metals, radiation and other pollutants. Additional repairs to electrical systems along with the provision of pipes, fittings and valves have strengthened the

utility's capacity to provide safe water to residents of Auly and Dnipro City.

To diversify water sources in Kharkiv city, 29 **emergency water kiosks** (byuvets) are now providing safe drinking water to an estimated 70,000 people. These autonomous water supply points connect to the central system, use multi-level purification, are equipped with backup power and wells, and are designed for wartime conditions.

In collaboration with local partners, UNICEF distributed **WASH supplies** to 110,670 people (49,221 women, 43,164 men, 8,874 girls and 9,412 boys) in July including hygiene kits tailored for children, people on the move and individuals with disabilities as well as water filters, bottled water and hygiene vouchers. This included deliveries of hygiene supplies to 736 families through interagency convoys in hard-to-reach frontline settlements of Stanislavska (Kherson region) and Korovyi Yar (Donetsk region).

Water distribution point (kiosk) in Kharkiv. ©UNICEF/2025/Tetiana Oliinyk

The UNICEF **hygiene voucher** pilot in Kherson reached 14,449 people in July for a total of 18,821 people reached this year. Each voucher is valued at 2,500 UAH and can be redeemed for hygiene and cleaning products. UNICEF has partnered with local businesses, six out of seven of which are women-led or owned. Third-party monitoring showed 98.8 per cent of recipients were satisfied or very satisfied with the pilot. All respondents found the process smooth, with clear instructions and no issues accessing goods. A minority of respondents (22 per cent) perceived some price differences between participating stores and larger retail chains, which will be important to consider as the pilot continues as smaller local businesses may have higher operating costs or less favorable supplier terms. All partner stores reported revenue growth, with five noting a 'significant' increase.

Water trucking operations continued to fill critical gaps in July in:

- Donetsk region: Water was delivered for 6,000 people in Sviatohirska and Druzhkivska municipalities
- Kherson city: Drinking water was trucked to reach 5,000 residents in underserved districts
- Novovorontsovka village in Kherson region: Water was delivered for 5,000 people still affected by the destruction of the Kakhovka dam

WASH facilities were rehabilitated in the Children's Polyclinic No. 1 of the Kherson City Clinical Hospital, benefiting 3,469 children (1,696 girls) with inclusive and gender-sensitive services. Additionally, 100 educational, health care and social institutions received kits of cleaning supplies, ensuring a clean and safe environment for 45,000 people.

As of mid-2025, 79 reporting **WASH Cluster** partners have reached 3 million people. While this is 60 per cent of the 2025 HNRP target, it is a one-third decrease in the number of people reached by mid-year 2024, including a 28 per cent reduction in those reached through the repair of water systems and a 56 per cent reduction in those reached with hygiene kits. This is due in large part to funding reductions in 2025, with the WASH Cluster currently 7.7 per cent funded.

The situation in Donetsk is rapidly worsening. In Kostiantynivka, water, gas and electricity are only partially functional, and there is a significant need for hygiene items and drinking water. In Pokrovsk, Rodynske and Hryshyne where 2,700 people are still living, limited assistance was organized via UN agencies in armoured vehicles directly to Pokrovsk city. About 1,000 people were reached with hygiene items and water.

Social Protection: In July, 397 households, covering 933 individuals including 189 children (89 girls) and 587 women, were supported with humanitarian cash transfers, for a total of 15,250 households reached this year. UNICEF provided **multi-purpose cash assistance** to 375 households affected by missile strikes and shelling, covering 851 individuals including 146 children (69 girls) and 556 women. These households received 10,800 UAH (\$260) per person, supporting their basic needs and ensuring minimum living standards.

Cash-for-protection assistance was provided to 22 households, covering 82 people including 43 children (20 girls) and 31 women. Each household received cash assistance in the amount of 16,700 UAH (\$400), supporting households with at least one household member injured or killed.

Adolescent Development and Participation: In July, UNICEF provided humanitarian support to 8,496 adolescents and youth (5,160 females) in Dnipro, Kharkiv, Mykolaiv, Odesa and Zaporizhzhia. Programming focused on: participation and voice; skills for resilience; and MHPSS. Across affected regions, 263 youth (147 females) were trained to shape local response and recovery, co-developing youth strategies, advancing civic action and leading volunteer efforts in their communities. Meanwhile, 7,427 young people (4,653 females) accessed non-formal learning, including financial literacy and career guidance as well as innovation training through [UPSHIFT](#).

Supply and Logistics: So far this year, UNICEF has placed US\$15.7 million worth of orders to purchase life-saving supplies, including US\$0.6 million in orders placed in July. US\$20 million worth of supplies were received in Ukraine. US\$12.4 million worth of supplies were dispatched from UNICEF-controlled warehouses, with US\$1.6 million dispatched in July. US\$13.9 million of supplies were delivered to implementing partners directly from local vendors in 2025, including US\$1.9 million

delivered in July. The value of supplies currently at stock at UNICEF-controlled warehouses is US\$3 million with US\$8.3 million of supplies in the pipeline.

Communication and Advocacy: The intensity of the war across the frontline and immense impact of strikes on children in populated areas meant UNICEF's advocacy and communication for the protection of children in Ukraine was strengthened over the past month. More than 460 content pieces were published on UNICEF Ukraine's social media channels in July, including updates on UNICEF's immediate support to families after attacks, and stories of children impacted by strikes. Overall, content published for the month reached 11.6 million social media users, generating 68.6 million impressions and 1.16 million engagement actions – sustaining awareness about the situation of children in Ukraine.

UNICEF released a [statement](#) on the three-fold increase in verified child casualties from March to May 2025 compared to the previous three months. In addition, five short social media statements about reported child casualties were published. Humanitarian highlights were also included in the Representative's [monthly overview](#) on LinkedIn.

The cumulative impact of the war on children and families was summarized and highlighted in a global [press release](#) and [advocacy brief](#), reiterating the need to continue prioritizing the rights and needs of children and young people both in the immediate and long-term response.

Annex A: Programme Results (January–July 2025)

Sector	UNICEF and IPs Response			
	2025 target	Total results	Change	
Health (9,200,000 people in need)				
Number of children and caregivers accessing primary health care in UNICEF-supported facilities, and through mobile teams and home visits	565,000	365,281	2,371	
Number of primary caregivers of children 0–23 months receiving infant and young child feeding counselling	10,000	6,642	740	
Child Protection, GBViE and PSEA (3,500,000 people in need - Child Protection)				
Number of children, adolescents and caregivers accessing community-based mental health and psychosocial support	Total	828,475	246,649	19,524
	Girls		116,980	8,149
	Boys		89,799	6,373
	Women		32,607	4,154
	Men		7,263	848
Number of women, girls and boys accessing GBV risk mitigation, prevention and/or response interventions	393,819	249,346	17,762	
Number of children who have received individual case management	Total	49,268	28,863	3,560
	Girls		14,222	1,693
	Boys		14,641	1,867
Number of children and caregivers provided with landmine or other explosive weapons prevention and/or survivor assistance interventions	1,038,047	1,421,666 ²	40,126	
Number of people with safe and accessible channels to report sexual exploitation and abuse by personnel who provide assistance to affected populations	1,805,810	894,900	113,905	
Education & Skills (1,600,000 people in need)				
Number of children accessing formal or non-formal education, including early learning	Total	517,530	236,292	11,682
	Girls		119,566	5,796
	Boys		117,655	5,886
Number of girls and boys receiving learning materials	33,100	13,816	-	
Number of educators and community members trained to provide and support quality learning	30,300	5,078	5	
WASH (8,500,000 people in need)				
Number of people accessing a sufficient quantity and quality of water for drinking and domestic needs	4,300,000	2,609,404	91,964	
Number of people reached with critical WASH supplies	1,530,000	565,233	110,670	
Number of institutions provided with child friendly, gender sensitive and inclusive WASH facilities	170	33	23	
Number of people benefiting from restored or maintained heating services	1,480,000	732,732	-	
Social Protection				
Number of households reached with UNICEF-funded humanitarian cash transfers (including for social protection and other sectors)	60,000	15,250	397	
Cross-sectoral				
Number of affected people (children, caregivers, community members) reached with timely and life-saving information on how and where to access available services	4,000,000	1,851,271	116,881	
Number of people participating in engagement actions for social and behaviour change	320,000	272,066	17,462	
Number of people sharing their concerns and asking questions through established feedback mechanisms	40,000	14,151	432	
Number of adolescents and young people who participate in or lead civic engagement initiatives	150,000	92,112	2,793	

² Over-achievement due to integration of EORE messaging into Winter Safety campaign. Results from campaign added in June 2025.

Annex B: Funding Status as of 31 July 2025³

With humanitarian needs still acute, the UNICEF HAC appeal reflects resource requirements under Pillar 1 to reach vulnerable children and families in Ukraine with essential services and life-saving supplies. Continued, flexible contributions mean that UNICEF and partners can act quickly and respond strategically to where the needs are greatest.

Sector	Requirements	Funds available		Funding gap	
		Resources received (ORE/current year)	Carry-over (ORR and ORE)	US\$	%
Health and Nutrition	40,000,000	2,867,057	14,940,907	22,192,036	55%
Child Protection, GBViE and PSEA	86,200,000	12,581,599	45,572,813	28,045,588	33%
Education	80,500,000	20,104,932	39,792,502	20,602,566	26%
WASH	135,400,000	22,056,137	64,017,700	49,326,163	36%
Social Protection	57,900,000	18,899,589	22,232,821	16,767,590	29%
Total	400,000,000	76,509,314	186,556,743	136,933,943	34%

³ The distribution of funds by sector is provisional and may be revised to respond to urgent priorities and needs. Increase in carry-forward due to UNICEF global change in calculation.
