Humanitarian Situation Report No. 2

Reporting Period
1 January to 30 June 2026

Multi-country Great Lakes

HIGHLIGHTS

- Great Lakes subregion continues to face overlapping crises of conflict, displacement, disease outbreaks, and climate shocks, leaving millions of vulnerable children and families in urgent need of assistance.
- UNICEF and partners delivered life saving interventions across health, nutrition, WASH, child protection, education, and social protection, reaching about 400,000 people including 313,000 children of which 265,000 were under five[1].
- Persistent funding gaps, fragile systems, and limited district level capacity constrain scale up, while disability inclusion, and climate shocks remain under resourced challenges.
- UNICEF is strengthening inclusive preparedness through surveillance, IPC/WASH, RCCE, MHPSS integration, disability inclusion, PSEA mechanisms, and cross border coordination to build resilience and accountability.

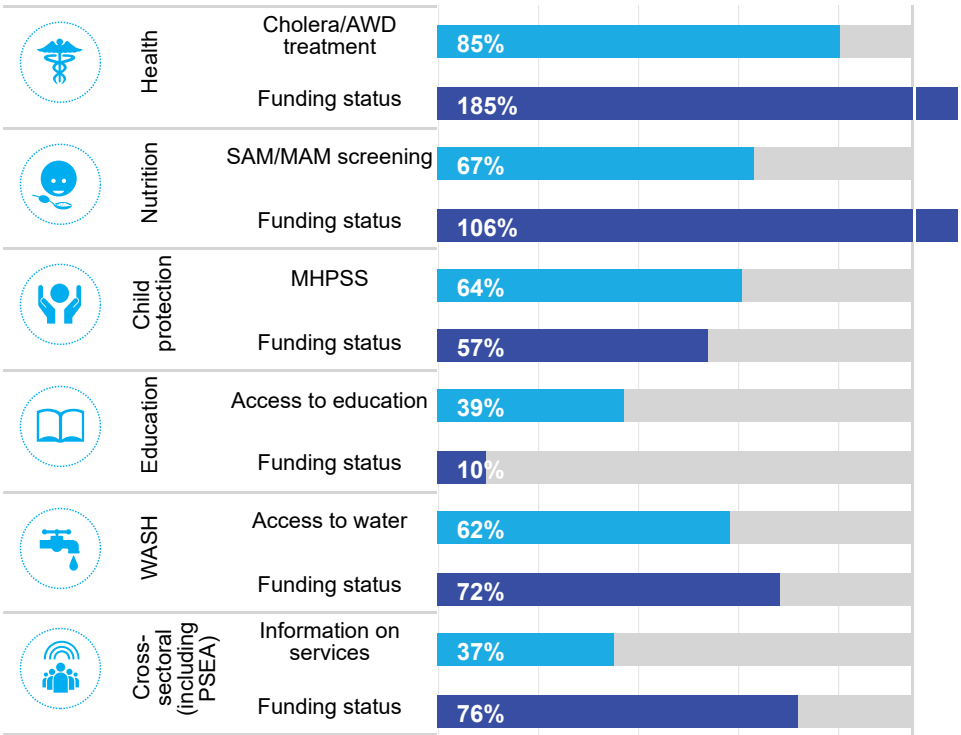

SITUATION IN NUMBERS

1,300,000
Children in need of humanitarian assistance

2,500,000
People in need of humanitarian assistance

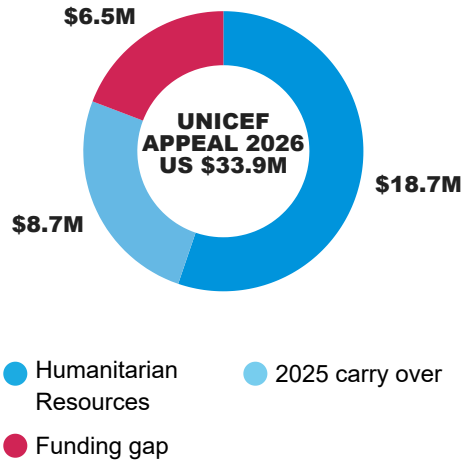

2,700,000
Number of pending and registered refugees

UNICEF RESPONSE AND FUNDING STATUS*

* UNICEF response % is only for the indicator, the funding status is for the entire sector.

FUNDING STATUS (IN US$)**

** Funding available includes: funds received in the current year; carry-over from the previous year; and repurposed funds with agreement from donors

SUBREGIONAL OVERVIEW

SITUATION ANALYSIS AND HUMANITARIAN NEEDS

During the first half of 2026, the subregion faced overlapping crises of conflict, displacement, disease outbreaks, and climate shocks. Burundi received large-scale refugee arrivals from DRC and the return of over 100,000 Burundian refugees from Tanzania, compounded by cholera, measles, and Mpox outbreaks; 1.28 million people, including 632,000 children require assistance. Rwanda activated its National Ebola Contingency Plan across 13 high-risk districts following the Bundibugyo strain outbreak in DRC and in Uganda, though no cases were confirmed locally. Tanzania managed a protracted refugee situation, recurrent flooding, and outbreaks of measles, Mpox, and circulating vaccine-derived poliovirus, with nearly 146,000 refugees — 57% children — dependent on humanitarian assistance. Uganda, hosting over two million refugees, simultaneously responded to Bundibugyo Virus Disease, measles (445 cases across 81 districts), anthrax, and CCHF, while 122,100 children in Karamoja faced acute malnutrition. Forecasted El Niño-driven extreme weather threatens to worsen food insecurity, outbreaks, and malnutrition in the second half of 2026, making sustained investment in preparedness and cross-border coordination essential.

Forecasts point to a high likelihood of El Niño-driven extreme weather across the subregion in the second half of 2026, including drought, flooding, and disruption to livelihoods and basic services. This is expected to compound existing disease outbreak risks and worsen acute malnutrition among already vulnerable children, particularly in Karamoja (Uganda) and refugee-hosting areas of Tanzania and Burundi. Continued Ebola Bundibugyo Virus Disease transmission in DRC and Uganda means preparedness efforts in Rwanda and Tanzania's high-risk regions must be sustained and, where possible, expanded to remaining high-risk districts. UNICEF and partners will prioritize closing funding gaps for disability inclusion, MHPSS, and child protection systems, while strengthening cross-border coordination mechanisms to ensure timely detection, response, and continuity of care for vulnerable children and families across the subregion.

BURUNDI

SITUATION OVERVIEW & HUMANITARIAN NEEDS

Burundi faces overlapping crises including large-scale refugee arrivals driven by the conflict in the Eastern DRC , the return of over 100,000 Burundian refugees from Tanzania, and risk of disease outbreak (cholera, measles, Mpox, Ebola threat). The Busuma site hosted over 66,000 refugees at its peak with more than 54,000 remaining by mid-year alongside 21,000 refugees in Musenyi. Over1.28 million people, including 632,000 children, require humanitarian assistance.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health: 83,414 children and women were reached with primary healthcare; 42,605 children vaccinated against measles; 625 people treated for cholera/AWD; Ebola preparedness reinforced through a (SIMEX conducted June 2026)

Nutrition: 134,000 children screened for acute malnutrition and 7,300 severely wasted children treated.

IPC/WASH: 38,352 people reached with safe water, 7,344 with sanitation, 3,000 households with hygiene kits; cholera prevention outreach to over 60,000 refugees in Busuma.

Child Protection: 44,565 people provided with MHPSS; GBV services for 46,371; 2,848 children in case management; 1,956 unaccompanied/separated children reunified or in alternative care; 2,446 refugee children registered at birth.

Education & Social Protection: 4,298 children accessed education with learning materials; 50 solidarity groups established for 1,250 displaced households.

SBC/RCCE: 2.5 million people were reached through RCCE; over 2,500 children with disabilities identified in Busuma (support for ~40 planned Q3); 79,695 people gained access to safe PSEA reporting channels.

Overall, the response benefited from the use of both emergency and regular programme platforms, including Ebola preparedness investments, which contributed to sustained service delivery and strong sectoral results during the reporting period.

Zaidi Kwetemwami Judith, an expectant mother, poses with her first child while waiting for her turn at a UNICEF supported clinic in Musenyi 2, Burundi.

HUMAN INTEREST STORIES

- At Busuma, refugees are acting as protectors of their own health

RWANDA

SITUATION OVERVIEW & HUMANITARIAN NEEDS

Since mid-May 2026, the Bundibugyo strain of the EVD outbreak in eastern DRC has expanded with 2,473 confirmed cases and 999 deaths reported as of 20 July. Cross-border transmission risk remains high following the confirmation 20 cases and 2 deaths in Uganda . WHile Rwanda has reported no confirmed case today , the government has activated its National Ebola Contingency Plan across 13 high-risk districts with the affected areas and Kigali's role as a regional transit hub.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health: 21,615 Community Health Workers trained across 9 of 13 high-risk districts; 292 health post staff trained on IDSR/VHF; 70 digital tablets delivered for national surveillance; wastewater surveillance expanded to Rubavu and Rusizi.

SBC/RCCE : IEC materials disseminated at 396 sites including Points of Entry; multilingual messaging; EVD radio spots via 15 stations; 10,316 people reached via VIAMO digital platform; SOPs finalized and a National RCCE Surge Team mobilized.

Child Protection : preparedness planning advanced for child-friendly spaces, school counsellor training, and specialized technical recruitment; integration of child protection into referral pathways underway.

WASH/IPC : 40,000+ people plus 7 health facilities and 14 schools regained water access; 16 facilities strengthened; 672 health workers trained on IPC; WASH rehabilitated at 2 Points of Entry.

PSEA : 40 CSO partners trained on safeguarding, referral pathways, and survivor-centred response, with links to Isange One Stop Centres.

Funding received during the period exceeded requirements in key sectors due to advocacy for Ebola preparedness.

UNICEF/UNI980088/Iyakaremye

In Rusizi, Rwanda, improved water systems are helping families, schools and health centres access safe water, supporting better health, learning and daily life.

HUMAN INTEREST STORY

- When health facilities are equipped to provide safe and quality care, entire communities benefit.

TANZANIA

SITUATION OVERVIEW & HUMANITARIAN NEEDS

Tanzania faces a protracted refugee situation, multiple public health emergencies, and recurrent flooding. Over 8 million children were vaccinated against circulating vaccine-derived poliovirus type 2, while a new case in Mara Region highlights immunity gaps. Measles transmission continues with 829 suspected cases alongside Mpox with 296 confirmed cases and Ebola BVD preparedness across 11 high-risk regions. Cholera cases have declined to 54 cases between January and June . Flooding displaced more than 30,000 people and caused 54 deaths. Burundian refugee repatriation concluded in June with 96,446 people returned; nearly 146,000 refugees remain, 57 per cent of whom are children.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health & Nutrition : 29,271 refugee children and women accessed primary healthcare; 5,266 children were screened for wasting, with 430 severe cases admitted and a 98 per cent cure rate; and 18,266 children received vitamin A supplements. Nutrition received close to US$600,000 from the Government of Japan to support the response to malnutrition in Zanzibar. However, the results reported are specific to refugees, which explains the sector's overfunded status despite underachievement against results targets, at 13 per cent.

WASH/IPC : 49,662 people reached with WASH supplies across 16 cholera hotspots and Zanzibar; more than 14,000 people accessed safe water in Kibondo/Kasulu; 133,986 refugees werereached through hygiene promotion and the Kigoma Sanitation and Hygiene Strategy 2026–2029 was launched.

SBC/RCCE : Weekly national EVD RCCE Pillar coordination continues; more than 130,000 posters and leaflets were distributed; 2,565 Commuity Health Workers and 8,321 students were sensitized on EVD; nOPV2 campaign media reached more than 25 million people; positive community sentiment ranged from 90.9–95.4 per cent .

Child Protection: Active case management decreased from 518 to 307 following the closure of Nduta Camp closure and more than 450 cases were transferred to Burundi through the CPIMS+/Primero for continuity of care.

Education : 30,863 refugee children including 50 per cent girls accessed education in Nyarugusu Camp; the first DRC Form Four national examinations were held in-camp with 485 candidates.

UGANDA

SITUATION OVERVIEW & HUMANITARIAN NEEDS

Uganda hosts over two million refugees and asylum seekers including 49,038 new arrivals in 2026.Borders remain closed to new arrivals pending Ebola quarantine arrangements. The country is responding to multiple disease outbreaks including Bundibugyo Virus Disease (20 cases, 2 deaths), measles (445 cases across 81 districts), anthrax, and CCHF. In Karamoja, 122,100 children face acute malnutrition, including 30,600 with severe wasting, with El Niño-driven extreme weather forecast to worsen conditions in Q2 2026.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health : 49,737 women and children reached with primary health care; 1,500 village health teams trained in surveillance and RCCE; 39 response tents provided.

Nutrition : 123,912 children were screened for wasting; 56 per cent of annual results achieved by mid-year.

WASH/IPC : 31,000 refugees reached with WASH services; supplies delivered to 48 health facilities across 37 high-risk districts; only 29 per cent of safe water targets were met as resources were redirected to BVD response.

Child Protection & GBV/PSEA : 127 unaccompanied/separated childrenwere supported; 4,443 people received MHPSS and 20,751 individuals were reached through GBV/PSEA prevention and response.

Education & Social Protection : 9,016 children were supported reaching 43 per cent of annual target; 3,189 refugees were reached through PROSPECTS cash-plus, enabling 82 teenage mothers to resume education.

SBC/RCCE : 3,014,044 people were reached through community engagement, mass media, and transport-route messaging bwetween May–June.

Localization : Capacity building for 82 NGOs/CBOs; 21 NGOs received M&E training ; stakeholder mapping was conducted in four districts.

Funding received and results achieved during the period exceeded requirements/targets in key sectors due to the funding received for Ebola preparedness and US OCHA Karamoja and refugee response.

ENDNOTES

1. Estimation of reach for people made from adding screening reach (children under five), education reach (children 5 -17 years), WASH reach*0.32 (adult men) and WASH reach*0.36 (adult women). For children reach was estimated by adding screening reach (children under five), education reach (children 5 -17 years).

2. UNICEF and partners reached 49,737 women and children with primary healthcare, exceeding targets against funding available linked to BVD preparedness and response in seven high risk districts. This will be addresed through the ongoing HAC target revision.

3. Results achieved through carry forward funds and leveraging efforts with other partners

4. Achievement against the safe water target reached 29 per cent with 56 per cent of required funding, largely because the majority of available resources were directed towards the procurement of critical WASH supplies for the BVD response, reducing funding available for water supply interventions.

5. Funding contributed to household cash transfers which is reported under Cross Sectoral section.
