Highlights

- As of 10 November, the number of internally displaced persons (IDP) reached 1,049,767 (CONASUR), out of which over 60 per cent are children and approximately 43 per cent are school-age children (418,801) according to the Education Cluster.

- More than 100,000 children living in hard-to-reach areas due to insecurity still not have access to formal education.

- Burkina Faso registered 20 security incidents in September, causing 43 civilian casualties.

- On 9 March, the first case of COVID-19 was confirmed in the country, reaching 2,508 cases by the end of October 2020 (Ministry of Health (MoH))

- As part of 2021 humanitarian planning, the addition of the Centre-Est region will bring number of regions to 6 for the humanitarian response and the response to COVID-19 will target the whole country.

UNICEF Appeal 2020
US$98.9 million

Funding Status (in US$)

- Carry-forward, $7M
- Funds received in 2020, $26M
- Funding gap, $67M
Funding Overview and Partnerships
In line with the 2020 UNICEF Humanitarian Action for Children appeal (HAC) appeal, the funding gap at the end of October 2020 was US$64.53 million (67 per cent). UNICEF Burkina Faso would like to recognize the generous support of key partners, who have contributed US$25.53 million in 2020 and US$6.6 million in 2019 to the HAC 2020. UNICEF also recognizes the flexible and unearmarked funding received in 2020 from the Global Humanitarian Thematic Fund.

Situation Overview & Humanitarian Needs
According to the revised Humanitarian Response Plan 2020 (HRP), an estimated 2.1 million people are in need of protection and 2.9 million people are dependent on humanitarian assistance in Burkina Faso. The country is severely affected by a humanitarian crisis due to insecurity. Attacks by non-state armed groups (NSAG) dramatically increased in 2019 and maintained the same space in the first months of 2020, with more civilians being targeted or threatened. Consequently, new waves of displacements took place in several regions.

Internally displaced persons (IDP)
Registration of new IDPs is conducted by the Conseil national de secours d’urgence et de réhabilitation (CONASUR), the government institution in charge of data collection and humanitarian response. As of 10 November, 1,049,767 IDPs had been registered in the country (60 per cent children). Centre-Nord and Sahel remain the regions hosting the highest percentage of displaced populations (41 and 33 per cent respectively).

As of 25 October, 91 out of 1,064 health centres (8.6 per cent) in five emergency-affected regions were closed and 232 (21.8 per cent) offered reduced services. An estimated 964,235 people have no or limited access to nutrition and health services.

As of 21 September, 2,206 schools were still closed due to insecurity, after general close down on 16 March due to COVID-19.

On 9 March, the government of Burkina Faso declared the COVID-19 epidemic. As of 31st October, the Ministry of health (MoH) confirmed 2,508 cases (856 females, 1,652 males) 2,273 recovered and 67 deaths in the 13 regions of the country. Ten of these regions still have active cases. The average age of confirmed cases is 39.9 years and 64.6 years for deaths.

Summary Analysis of Programme Response

Nutrition
From January to October 2020, 73,134 severely acute malnourished (SAM) children (38,030 girls and 35,104 boys), among which 8,459 with complications, were admitted and treated in the community-based management of acute malnutrition (CMAM) programme. Children severely malnourished from the five regions (Boucle du Mouhoun, Centre-Nord, Est, Nord, Sahel) most affected by the security crisis reached 61.76 per cent (43,939 SAM) of the national new SAM admissions.

Simplified approaches and CMAM are implemented to ensure continuity of services in insecure areas. Through the partnership between UNICEF and the NGO Alima, the simplified approaches are implemented in Barsalogho health district, Centre-Nord region. As of 31st October:

- a total of 89 health workers and 213 community-based health workers (CBHW) have been trained for the treatment of 1,495 acute malnourished children, including 388 SAM and 1,107 moderate acute malnourished (MAM).
- 60,256 parents (50,800 mothers and 9,456 men) have been trained and actually have capacity to ensure screening of acute malnutrition.

In Gorom-Gorom and Djibo health districts, in the Sahel region, the treatment of acute malnutrition is done at community level in partnership with NGO LVIA. 63 advanced sites were set up in Gorom-Gorom health district by the NGO LVIA.

9. IDPs as of 10 Nov 2020 https://drive.google.com/file/d/1y1mYiEoQ30DmNqo/30hMgPHNaNf/JC3D?usp=drivesdk
10. Boucle du Mouhoun, Cascades, Centre-Est, Centre-Nord, Centre-Sud, Centre-Ouest, Est, Hauts-Bassins et Sud-Ouest
11. Simplified approaches: Prevention and treatment of acute malnutrition using one admission criteria which is middle-upper arm circumference (MUAC) and only one treatment product, ready-to-use therapeutic food (RUTF)
13. UNICEF also recognizes the flexible and unearmarked funding received in 2020 from the Global Humanitarian Thematic Fund.
Promotion of optimal infant and young child feeding (IYCF) practices:
In October 2020, a total of 2,699 new mother-to-mother support groups (GASPA: *Groupe d’appui et de soutien aux pratiques d’alimentation du nourrisson et du jeune enfant*) were set up. 27,463 new pregnant and lactating women (PLW) participated in IYCF counselling sessions. This result brings up to 376,708 the cumulative number of PLWs registered since January 2020.

15,650 women were trained to take Middle Upper Arm Circumference (MUAC) and screened 56,587 children aged 6 to 59 months in the five regions of humanitarian response.

Rapid nutrition survey\(^1\) conducted in September 2020 in Djibo commune, Sahel region. The results revealed a rate of global acute malnutrition of 13.4 per cent, considered high (between 10-15 per cent), and a rate of SAM of 4.4 per cent, also considered high as it is above 2 per cent. The host population is most at risk of malnutrition with a Global acute malnutrition (GAM) prevalence of 14.2 per cent compared to 12.8 per cent among IDPs.

Following these results, UNICEF and the nutrition cluster are strengthening community platforms/actors to ensure early detection, referral and management of children with acute malnutrition, while WFP will target food distribution to children aged from 6 to 23 months through the NGO LVIA working in the health district of Gorom-Gorom commune (Oudalan province, Sahel region), the most affected zone (18.4 per cent of GAM). In Markoye and Deou, areas with limited humanitarian access, mobile teams are deployed to ensure the support for children under five years old. A joint agencies task force has been set up to address the problem of humanitarian access to these vulnerable populations, and LVIA have planned to start cash transfer interventions by the end of November 2020.

Data collection for the 2020 national nutrition survey (SMART method) is ongoing and is planned to be finalized in November 2020. The preliminary results will be available in November 2020.

Nutrition cluster
As part of the 2021 humanitarian planning, the number of people in need (PIN) defined for the nutrition sector is 1,430,632, including 93,710 SAM children and 421,222 PLWs. Partners are preparing the proposals for submission on Humanitarian project Cycle (HPC) website by the end of November 2020.

Health
In October 2020, UNICEF supported the implementation of community-based interventions and improved primary health care, mainly through the implementation of the integrated community case management (ICCM) approach in emergencies, particularly in Centre-Nord and Sahel regions.

- UNICEF piloted in Sahel region a new initiative to delegate vaccination tasks to CBHWs. As a result, 33,881 children aged under 5 were vaccinated for all antigens (VPO3, VPI, Penta3, PCV13 3, Rota 3, RR1, RR2, VAA, MEN A), including 4,919 against measles. The delegation of oral vaccination tasks represents approximately 22 per cent of children vaccinated at regional level as part of the routine Expanded program on immunization (EPI). A workshop to document good practices and to share the experience of this delegation of tasks was organized by the health direction of Sahel region from October 16\(^{th}\) to 17\(^{th}\).
- Thanks to the extension of community interventions in the hard-to-reach areas of the Barsalogho health district, Centre-Nord region
  - 1,116 children under 5 were treated with the support of community volunteers (410 for malaria, 325 for diarrhea and 381 for pneumonia)
  - 20 home deliveries, with 20 newborns alive were performed with the support of traditional birth attendants trained in good practices of home care of mothers and newborns (monitor pregnant women during pregnancy, assist them during childbirth if necessary, and monitor newborns at home through home visits).
  - 15,340 people were reached by 585 health education talks on the six essential family practices\(^14\) and other emerging themes such as COVID-19

- The national epidemiological situation has been marked since week 36 by the occurrence of febrile jaundice in the Centre-Nord region, particularly among IDPs in the health district of Barsalogho. To date, a cumulative number of 455 cases (including 400 for the health district of Barsalogho) with 16 deaths (all from the district of Barsalogho) have been notified. The hypothesis of a hepatitis E epidemic is confirmed with a co-infection with yellow fever (1 case of the 3 re-sampled was positive for yellow fever IgM and IgG with an increase in seroneutralizing antibodies (1/40); the patient was not vaccinated against yellow fever). In response to this situation, UNICEF and WASH cluster developed and implemented emergency WASH response which include water quality sampling and analysis, water disinfection, rehabilitation and emptying of latrines, hygiene promotion. Key

\(^{13}\) Report of the rapid survey using the SMART methodology in Djibo: [https://drive.google.com/file/d/1OowfTOAcm72QdHhkyGPa7XWX9on-reh/view?usp=sharing](https://drive.google.com/file/d/1OowfTOAcm72QdHhkyGPa7XWX9on-reh/view?usp=sharing)

\(^{14}\) The six essential family practices are handwashing, exclusive breastfeeding and food supplements at 6 months, prenatal consultation, use of latrines, vaccination and prevention of mother-to-child transmission of HIV
messages on hygiene and sanitation have been developed and community relays have been trained for local communication and awareness raising.

**WASH**

From January to October 2020, UNICEF and its partners achieved 41 percent of the annual water targets, 21 percent of the sanitation target and 99 percent of the hygiene target, including the distribution of hygiene kits\(^{15}\) for 162,590 people.

In October, the following main activities were implemented (non-exhaustive):

- Center-Nord region. Rehabilitation of 4 boreholes for 2,000 people and construction of 142 latrines for 2,850 people;
- Sahel region. Installation of water supply system equipped with solar panels for 1,500 people, construction of 92 latrines for 1,840 people and distribution of 1,800 hygiene kits to 12,800 people;
- Est region. Construction of 127 latrines for 2,540 people and construction of 7 boreholes for 3,500 people;
- Nord region. Construction of 368 latrines and distribution of 1,311 hygiene kits to 9,177 people.

The main constraint is the inaccessibility of some localities for security reasons for drilling.

**WASH cluster**

In October 2020, the WASH Cluster members provided access to water for 81,532 people, sanitation services for 43,117 people and improved hygiene conditions to 96,789 people.

The progress rate towards annual targets is 50 percent for access to water, 40 percent for access to sanitation and 76 percent for access to hygiene. The cumulated results refer to data reported by 33 organizations members of the cluster and not only to the organizations which have projects registered in the HRP (25). The funding gap for the WASH sector is still high and represents one of the main challenges in the progress towards targets for water and sanitation, together with insufficient capacity of the sector stakeholders to face the gravity of the crises.

**Education**

The month of October was a critical moment for education in Burkina Faso with the official start of the school year on 1\(^{st}\) October. However, access to formal and non-formal education remain a challenge for children living hard-to-reach areas and areas affected by crisis where schools remain closed due to insecurity. As of 21 September 2020, 2,398 schools were still closed due to insecurity\(^{16}\). Other factors limit access to school for children living such as limited capacities in functional schools and the use of schools as shelters by people affected by the floods\(^{17}\).

As of end October, UNICEF and its partners reached 232,946 children (114,143 girls - 49 per cent) with educational interventions in the Centre–Nord and Sahel regions through:

- back-to-school campaigns, school supply distribution and the provision of tables benches for classrooms for 14,962 out-of-school children (7,357 girls - 49 cent)
- radio education program for 202,532 children
- 609,090 children (girls 314,339 - 51.6 per cent) reached for life-skills education activities though radio education program since April in response to the closure of schools due to COVID-19 pandemic.

**Child Protection**

In October, under the leadership of regional directorates of social Affairs, the Child Protection Area of Responsibility (CPAoR) established two new Child Protection Working Groups (CPWG) in the Boucle du Mouhoun and Nord regions. INTERSOS (in Nord region), TdH Lausanne (in Boucle du Mouhoun region) and Plan International (in Centre-Est region) have committed to ensure the coordination in these regions with the regional directorates of social affairs as lead. This new coordination at decentralized level will strengthen child protection interventions in the field with better information sharing and optimization of resources to meet the needs of children and their families.

In partnership with the Ministry of Woman, National Solidarity, Family and Humanitarian Action (MFHSSFHA), the CPAoR validated the rapid protection needs assessment tools\(^{18}\) dedicated to child protection in emergency. The assessment will be conducted in December within the six regions affected by the humanitarian crisis in order to have evidence that will guide the planning of the child protection in emergency response for 2021.

---

\(^{16}\) SitRep Number 2, Flooding in Burkina Faso 18 sept 2020 106,228 people affected in the 13 regions: https://drive.google.com/file/d/1taaDBOG05Di_B3EpgmmPhtBrT6aRMtYidI/view

\(^{17}\) Child Protection Needs assessment tools: https://www.dropbox.com/sh/objet0v3cu5qej8/AAABErzDnJZXKxYqUFV6bfK-Aj?dl=0&subfolder_nav_tracking=1
In October 2020, the MFHSFHA has endorsed the revised case management guidelines and tools. UNICEF supported the MFHSHA for the training of social workers involved in case management in emergency zones. 27 social workers from the regions of Centre-Nord and Est trained. A direct link is established between the child protection information management system plus (CPIMS+) and the case management work. The case management process is ongoing using CPIMS+ for 408 children separated and unaccompanied children identified and documented in Sahel and Centre Nord regions.

On 30 October 2020, UNICEF, in coordination with the Children Affected by Conflict Working Group (CAAG-WG), submitted the first contribution of Global Horizontal Note (GHN) covering July to September 2020. This contribution is following the Secretary General decision (A/74/845–S/2020/525)\(^\text{19}\) on 15 June 2020 which classified Burkina Faso as a country of concern.

In October, UNICEF supported training of 88 women of local organisations on Gender Based Violence (GBV)/Prevention of Sexual exploitation and abuses (PSEA) risk mitigation, prevention and response in Pama, Diapaga, and Dori communes in the regions of Sahel and Est. In partnership with ECPAT and Coordination nationale des associations d’enfants et jeunes travailleurs (CNAEJTB), 44 GBV survivors (25 girls and 19 women) were provided with psychosocial support and referrals for specialized assistance and 163 dignity kits distributed to girls and women at risk of GBV in the same two regions.

**Communications for Development (C4D), Community Engagement and Accountability**

- UNICEF broadcasted weekly radio programs and spots on lifesaving, messages and information on availability of humanitarian services, as well as implemented 20 community dialogues on social cohesion and peace promotion which engaged 600 affected people in the Nord and Est regions, thanks to the partnership with Radio La Voix du Paysan et Association Tin Taani.
- UNICEF, in partnership with Action Communautaire pour le Developpement (ACD) and Reseau des Radios Locales du Sahel (RAPS), carried out community dialogues and educational talk focusing on social cohesion, peace building, essential family practices which engaged over 2,700 people in the Sahel region.
- UNICEF and its partners ACD and RAPS in the Centre-Nord and Sahel engaged five radios stations to conduct one interactive programmes every two week with an average of 50-60 calls\(^\text{20}\) from auditors per programme. Over 250,000 affected people have been reached by the same programmes.
- UNICEF, in partnership with OCHA, successfully established sub-regional working groups on Community engagement and accountability to affected populations (CEAAP) in the Centre-Nord and Est region to reinforce partners coordination and better address communities needs and feedback
- UNICEF trained and oriented the Ministry of health (MoH) staff and partners on interpersonal communication activities, key messages and how to address rumors and hesitancy in preparation of the second round of the polio campaign planned on 10 November 2020. The technical support provided included social survey on acute flask paralysis and confirmed polio cases. Results and findings from the survey are used to inform further CREC strategies and interventions.

**COVID-19**

- UNICEF and the MoH finalized the social science study (including quantitative and qualitative approaches) on population knowledge and perceptions of the COVID-19 response. Preliminary results and findings\(^\text{21}\) from the survey are used to inform further Risk communication and community engagement (RCCE) Communication sur les risques et engagements communautaires (CREC) strategies and interventions. Results report from the study is under approval and will be available by the end of November.

**Media and external communication**

The external communication and advocacy team reached out to media to raise awareness on the humanitarian situation and response, focusing on the implementation of humanitarian activities in times of COVID-19.

- Campaign on Exclusive Breastfeeding. UNICEF continued the media campaign with The Stronger with Breastmilk Only initiative [Facebook](link), [Twitter](here) and [Instagram](link).
- UN75. The United Nations in Burkina Faso marked its 75th anniversary (UN75) with a press conference on 22 October 2020 [Facebook](link1), [link2], [Twitter] and [Instagram](link).
- COVID-19. UNICEF continues to increase awareness about the pandemic
  - Hamed’s story [Facebook](link), [Twitter] and [Instagram](link)

\(^{20}\) Number and frequency of radio program broadcasted: A total of 10 interactive radio programme broadcasted (1 per week per partner)
o How to protect themselves from coronavirus? The voice of children in this episode of The Grin: Facebook and Instagram
o UNICEF distributed 5,500 handwash basins and 2.7 million bars of soap to support the government's response against COVID-19 Facebook, Twitter, Instagram
o The Centre d'éducation et de réinsertion sociale des enfants (CERESSE), supported by UNICEF, together with the local authorities of the Toukin district, in the city of Ouagadougou, have undertaken COVID-19 awareness activities Facebook, Twitter and Instagram
o ACMUR Festival for raising awareness on COVID-19 and child marriage Facebook, Twitter and Instagram
  • Back to school. At the beginning of the new school year, UNICEF delivered 400 notebooks and 8 recreation kits to 3 schools in the city of Kaya. At the national level, UNICEF provided schools with 214,000 stationary kits (notebooks, bags, pens), more than a million bars of soap for 20,000 schools and 122 new classrooms to be built to better accommodate students Facebook, Twitter and Instagram
  • Protection activities. UNICEF and its partners provided more than 15,000 children with birth certificates in the region of Plateau Central Facebook, Twitter and Instagram
  • International Day of the Girl, every year on 11 October. UNICEF launched its annual campaign with girls to amplify their voices and to stand up for their rights Facebook, Twitter (also here) and Instagram
  • FGM: UNICEF and its partners are addressing the abandonment of this harmful practice for children Facebook, Twitter (link) and Instagram
  • Floods have affected more than 100,000 people in Burkina Faso. UNICEF and its partners deployed emergency relief operations by providing 9,000 mosquito nets to 9,000 flood-affected households Facebook, Twitter and Instagram
  • 7.2 million children need humanitarian assistance in Burkina Faso, Mali and Niger. Armed violence undermines children's health, education, protection and development Facebook, Twitter (link1, link2)

Multisectoral cash response
In October, UNICEF made progress in supporting the most vulnerable children and their families in the Centre-Nord region through multisectoral cash assistance:
  • Cash transfers of US$207,562 to 3,330 (83 per cent of 4,000 targeted households)
  • Conduct post-distribution monitoring to assess gaps for future improvement
  • Complete the selection of beneficiaries to cover the remaining 17 per cent households.

Humanitarian Leadership, Coordination, and Strategy
In 2020, UNICEF Burkina Faso aims at addressing the most urgent needs of 1.5 million people, including 690,000 vulnerable children, affected by humanitarian crisis in the five most affected regions by scaling up its response to emergencies while strengthening social cohesion and resilience. The bottom line is to ensure continuity and high coverage of services to children and families in crisis-affected regions, in accordance with UNICEF’s Core Commitments for Children (CCC) engagements.

UNICEF humanitarian action is guided by guided by 3 principles:
  • Continuity of services in the context of COVID-19 and beyond (as part of Stay and Deliver22)
  • Acceleration of service coverage within the framework of the nexus humanitarian-development-peace/sustaining peace agenda
  • Staff safety/security/wellbeing in the high-risk zones

UNICEF supports community-based interventions in areas where the government suspended basic social services or where insecurity severely restricted access to the most vulnerable populations. This action is seen as an opportunity to strengthen the involvement of communities and local authorities in co-creating solutions to issues affecting children and families, and to showcase the development-humanitarian-peace nexus.

With the drastic increase in the number of IDPs, UNICEF increased its presence by setting up field offices in Dori (Sahel region) and Kaya (Centre-Nord region), and since mid-February, in Fada N’Gourma (Est region). UNICEF is the lead agency for the WASH, nutrition, education clusters and Child protection area of responsibility. UNICEF is also strengthening the operational and information management capacities of the clusters though the recruitment of dedicated specialists at national and subnational levels.

Updated information on the clusters main activities can be found online:
Education cluster https://www.humanitarianresponse.info/en/operations/burkina-faso/education
Health cluster https://www.humanitarianresponse.info/en/operations/burkina-faso/health
Nutrition cluster https://www.humanitarianresponse.info/fr/operations/burkina-faso/nutrition

CPAR https://www.humanitarianresponse.info/en/operations/burkina-faso/protection-de-lenfant

22 Stay and Deliver: the 2011 concept on policy and operations in highly insecure environments provides advices and recommendations to practitioners on critical issues, such as risk management, responsible partnerships, adherence to humanitarian principles, acceptance and negotiations with relevant actors.
COVID-19 adaptation
Following the COVID-19 outbreak in Burkina Faso, an inter-ministerial national coordinating committee (NCC) was set up under the lead of the MoH for the planning, coordination, implementation and monitoring of COVID-19 preparedness and response. The NCC includes all the financial and technical partners. For cohesion purpose and rational use of available technical resources, the members of the health cluster are also members of this coordination mechanism.

UNICEF participates in four commissions established by the government to design, implement, monitor and coordinate the response to COVID-19:
- Coordination commission, where UNICEF plays a key role in the design of government response to COVID-19
- Case management commission, which holds daily meetings to assess the situation of new cases, and challenges related to tests and treatments of those who are already infected
- Logistics commission, where UNICEF provides support for the procurement of oxygen concentrators, protection masks, gloves of protection (covering 10 per cent of the national needs), resuscitation devices, and hand sanitizer
- Risk communication and community engagement commission, where UNICEF is the co-lead with the MoH, to develop key messages to raise public awareness on the prevention of COVID-19.
