VIOLENCE AND ABUSE DURING THE COVID-19 PANDEMIC

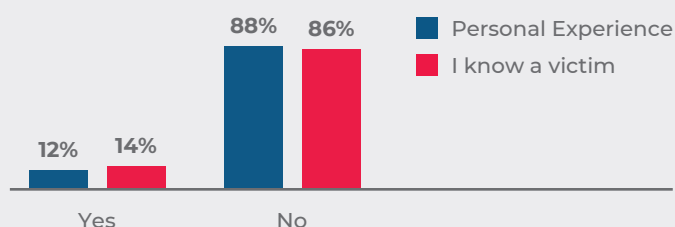

The poll was launched to support the development of the Comprehensive Manual for Child Protection specialists at local level to deal with cases of violence and abuse during the pandemic. It aimed to map the situation since the start of the pandemic and identify main trends among victims and witnesses of violence and abuse.

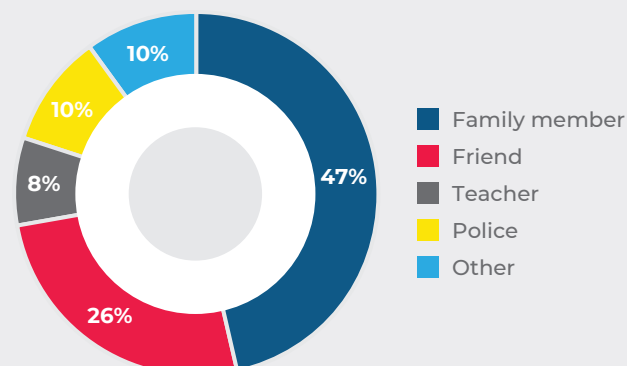

KEY FINDINGS

- 1 out of 9 respondents faced violence and abuse during the pandemic
- 57% of the victims stated that they received help from somebody (mostly family member or a friend)
- 48% of the victims stated they have not asked for help because they didn't know how; 35% were scared to confess
- Nearly half of the reported cases of violence and abuse happened at home. This is especially the case among female U-Reporters
- 12% of respondents experienced violence or abuse in school

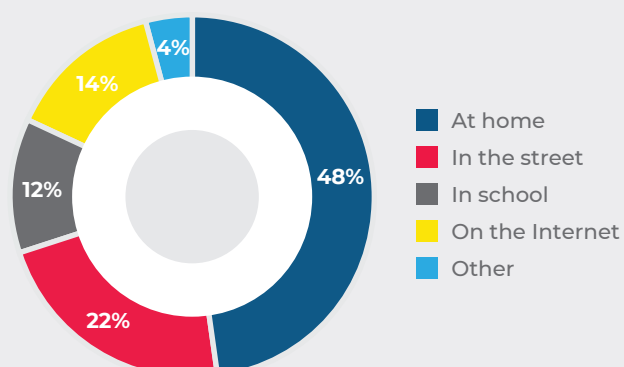

During COVID-19, have you/do you know anybody who faced violence or abuse?

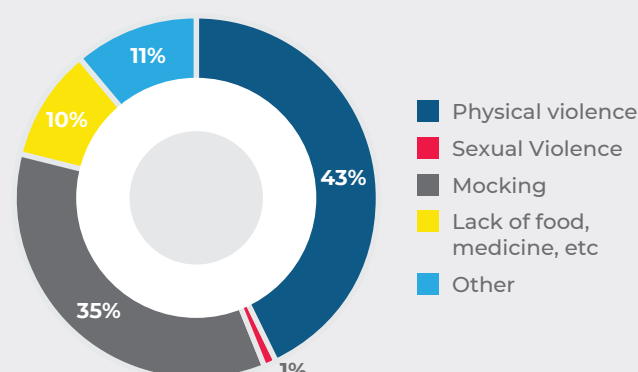

From whom did you receive help?

Where did such violence/abuse happen?

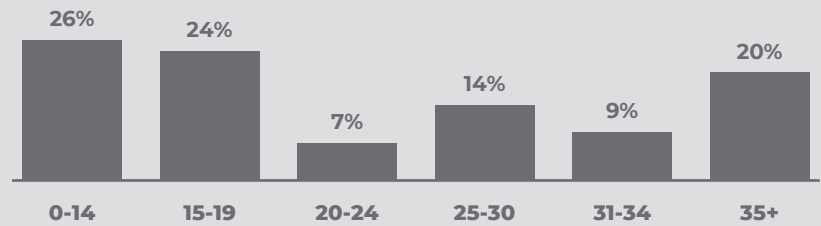

If you know somebody who experienced violence or abuse what kind of violence it was?

CLIMATE CHANGE

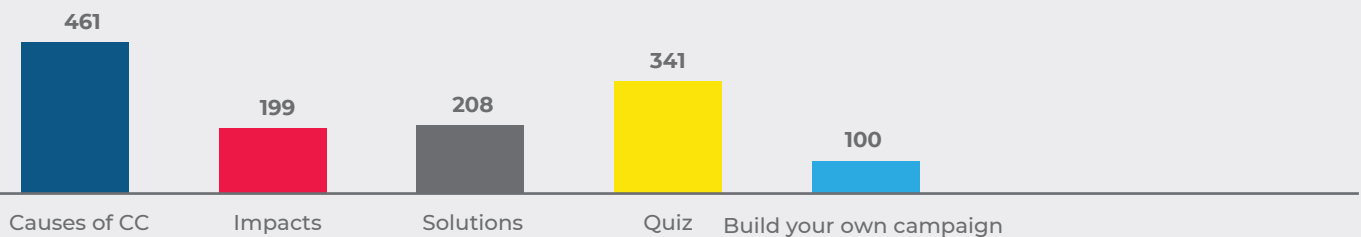

On the occasion of the International Children's Day, U-Report has launched a chatbot focusing on the topic of climate change. The chatbot engaged young people in diverse activities of awareness-raising, educative and calling-to-action character.

The chatbot was divided into 5 categories:

- 1) Causes – what is climate change and why is it happening?
- 2) Impacts – what will happen if we don't solve climate change?
- 3) Solutions – how do we stop it and how can you help?
- 4) Quiz – testing knowledge on climate change
- 5) Build – a guide on how to start an own climate change campaign divided into setting goals, targets, supporters, tactics, delivery and partners

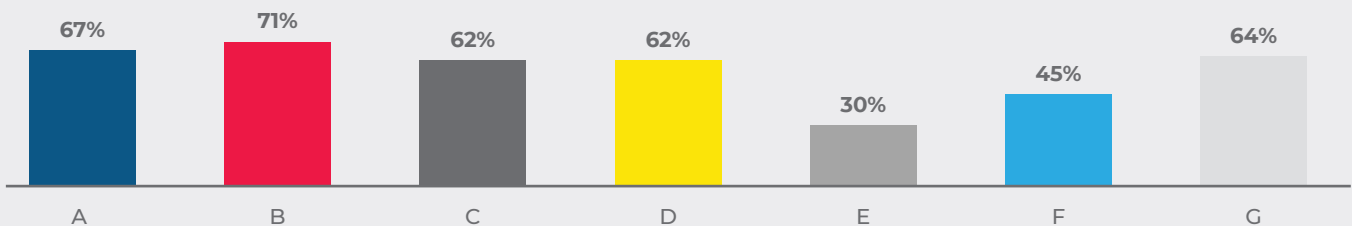

Number of users per topic

QUIZ RESULTS

The quiz revealed users' limited knowledge on the topic of climate change. Majority of respondents answered more than 50% of questions incorrectly. The two most challenging questions were A (global rise in temperature is 1.5°C) and B (water expansion causes sea rising).

Percentage of incorrect answers

- A. According to UN treaties, to what number must we limit the global rise in temperatures?
- B. The sea is rising because heat makes liquids like water expand. True or False?
- C. Which of these is NOT a health impact of climate change? (more malaria, heat-stroke, malnutrition, they all are)
- D. Which greenhouse gas do cows belch?
- E. The single biggest source of greenhouse gases is burning fossil fuels for electricity. True or False?
- F. The name of the treaty governments signed to reduce their emissions is called the Madrid Agreement. True or False?
- G. You can reduce your footprint by eating less: chicken, beef, tomato, cheese
