

What do we want to change?

98 million
of children face multi-dimensional poverty

Less than **5%**
of budget allocated to health and less than 1% to social protection

24.3%
living in extreme poverty

Knowledge gap on social protection coverage for children

What are our priorities?

Reduced child poverty and disparities

Increased public spending in social sectors

Better local governance for more equitable access to basic social services

Improved social protection systems

What are we doing?

Situation analysis and knowledge generation on child rights for policy dialogue

Capacity strengthening in public finance management focusing on fiscal space identification, investment cases and programme budgeting

Supporting domestication and implementation of the national social protection policy

Elaboration of child-sensitive state development plans

Production and dissemination of policy briefs for child rights implementation through social policy

What have we accomplished?

Adoption of national social protection policy

Policy briefs to support better social protection

Adoption of social protection law and policy in some states

Development of multidimensional child poverty profile

Cash transfer programme in support of education and health

What do we need?

US\$ 24 million

Adoption of budget organic law

Sustainable financing mechanism for social protection

Development of social protection floor, institutionalized by law

Partnership for impact with civil society organizations
