Achieving the MDG target – halving the proportion of underweight children between 1990 and 2015 – will involve efforts at micro, meso, macro and global levels, as well as partnerships among all sectors of society.

**MDG deadline: 2015**

**global**
- ensure the sustainable supply of affordable health and nutrition commodities and the delivery of increased financial resources

**macro**
- integrate child health and nutrition needs into national policies, plans and budgets

**meso**
- strengthen district and community health and nutrition systems; ensure access to water and sanitation

**micro**
- empower families to improve their health, feeding and childcare practices
