

EDUCATION

Education is a basic human right. UNICEF in Rwanda supports the Government to provide girls and boys – especially the most vulnerable and those affected by humanitarian crises – with inclusive, equitable and quality education and learning opportunities.

SITUATION

TARGETS

CHALLENGES

INCLUSIVE EDUCATION

Access to pre-primary education is still low, with a gross enrolment rate of **24%**.

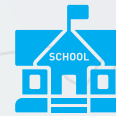

Only about **70%** of children with disabilities are enrolled in school.

By 2021/2022, a pre-primary gross enrolment rate of **44.5%**.

By 2021/2022, at least **85%** of children with disabilities enrolled in school.

Need to explore alternative means in establishing pre-primary centres, given that access is limited.

Working to build the inclusivity of all schools given the breadth of needs to be addressed.

QUALITY OF EDUCATION

Rwanda has a primary net enrolment rate of **97.6%**. **98%** for girls **97.3%** for boys

By 2021/2022, **55%** of students achieving at or above grade level in literacy.

By 2021/2022, **52%** of students achieving at or above grade level in numeracy.

Need to build the capacity of teachers to provide quality, child-centred learning.

The pre-service framework for teachers needs to be revised to align with the national curriculum.

There are still significant challenges regarding the quality of education.

GENDER EQUITY

Gender parity has been achieved at in pre-primary, primary, and secondary education.

However, gender inequities still persist in education.

Establish gender-responsive teaching and learning systems.

Need to train teachers in gender-sensitive pedagogy.

Social norms that negatively impede education need to be addressed.

Remedial education needs to be available for all underperforming students.

STRENGTHENED GOVERNANCE IN EDUCATION

Governance of the education sector is supported by 10+ data management systems.

This provides information at the national level on a variety of issues.

Integrate these data management systems into one platform.

Need to work with stakeholders to:
• Map business processes
• Determine key needs
• Establish a functional and accessible system
