§ Includes territories within each country category or regional group. Countries and territories in each country category or regional group are listed on page 124.

For a complete list of countries and territories in the regions and subregions, see page 124.

DEFINITIONS OF THE INDICATORS

Birth registration – Percentage of children less than 5 years old who were registered at the time of the survey. The numerator of this indicator includes children whose birth certificate was seen by the interviewer or whose mother or caretaker said the birth had been registered.

Skilled attendant at birth – Proportion of births attended by skilled health personnel (doctor, nurse or midwife).

Underweight prevalence (WHO) – Percentage of children 0–59 months old who are below minus two standard deviations from median weight-for-age according to WHO Child Growth Standards.

Measles coverage – Percentage of infants who received measles-containing vaccine.

Use of improved sanitation facilities – Percentage of the population using any of the following sanitation facilities: facilities with sewer connections, septic system connections, pour-flush latrines, ventilated improved pit latrines, pit latrines with a slab or covered pit.

MAIN DATA SOURCES

Sources of data for all indicators presented in this table are included next to each data point, except for the 'Use of improved sanitation facilities' indicator, for which the data source is WHO/UNICEF Joint Monitoring Programme for Water Supply and Sanitation, 2010.

Italicized data are from different sources than the data presented for the same indicators in other tables of the report: Table 2 (Nutrition – Underweight prevalence), Table 8 (Women – Skilled attendant at birth), Table 9 (Child Protection – Birth registration).

Sources for immunization data in this table differ from the total data sources presented in Table 3, which are the WHO/UNICEF Joint Immunization estimates. Immunization coverage survey data have been excluded from selected CEE/CIS countries for which data reflect maternal recall only rather than both vaccination card and maternal recall.

NOTES

- Data not available.
- x Data refer to years or periods other than those specified in the column heading, differ from the standard definition or refer to only part of a country. Such data are not included in the calculation of regional and global averages.
- y Data differ from the standard definition or refer to only part of a country. Such data are included in the calculation of regional and global averages.
- z Recommended measles vaccination age in country is greater than 21 months; the coverage shown is therefore an underestimate.
- ** Excludes China.
