Data shows the awarded price per dose (in US\$) per product per supplier per calendar year, based on a multi year supply agreement.

The price consists of a co-payment of a maximum of \$3.30 (the Tail Price) funded by a country or GAVI and a subsidy up to \$7.00 funded by the donors of the Advance Market Commitment (AMC)

Prices are based on a 10 year supply commitment and a volume guarantee as well as other terms as defined in the AMC legal framework .

(<http://www.gavialliance.org/funding/pneumococcal-amc/amc-legal-agreements/>).

During 2017, the AMC funding for doses procured under the contracts entered in 2013 is expected to be fully disbursed, whereafter the Tail Price will be reached.

Prices apply to GAVI-eligible and graduating countries as listed on GAVI's website at <http://www.gavialliance.org/support/who/eligible/index.php> and <http://www.gavialliance.org/support/apply/graduating-countries/>

Prices displayed are in response to tenders with FCA incoterms, covering vaccines with VVMs.
