What's Next?

Conversation

Prevention
- Relying on children with disabilities themselves
- We need to have a stronger voice!

Collaboration
- Measuring the impact
- Role of governments
- Role of UNICEF
- Setting examples

Assessment
- Embracing the challenge of scale
- More presence from the field

Awareness
- Raising awareness
- List of 50 products provision
- Training needed

Combating poverty
- But we are important too!

Governments
- To reduce taxes
- There are no fast fixes, see you in 10 years!

UNICEF
- Taking the lead in drafting policies

UNICEF
- Children's disability

Collaborators
- Someone needs to take the initiative!

Creative
- Updating list of potential partners
SUPPLY

How Do We Want to Focus?

STRENGTHENING SUPPLY CHAINS

MONITORING

How to make life possible for children with disabilities

INTEGRATION

INFLUENCING MARKETS

SERVICE DELIVERY

EMERGENCY

DIVERSITY

This is a defining moment!

WE NEED PARTNERSHIPS

RATIONALISE THE TICS

Round 1

Insights
- Need to create ecosystem
  - A multi-stakeholder approach
  - From an institutional model
- WHO-GATE
  - Strong support in the different agencies needed

Government
- Should put assistance devices on their lists

Assistive device chain
- Must be sustainable

Prioritising devices
- International standards
- open source
- Building locally

Education
- Assistive devices for learning disabilities are key

Suppliers
- Can build themselves up to rise to the challenge
Day 1 Recap

What could be? We've done a lot yesterday...

Instrumental to participation

AT - a right, not an option

A benefit for the poorest of poor, using differential pricing

There is no one-size-fits-all solution

Partnerships

Involving users

Use of data to plan better

Standardisation

"... but standardisation to Western standards may not always be the best way to go forward"
How Should We Foster Innovation?

Fishbowl Conversation

Leveraging Internet for Testing and Prototyping

Involving Civil Society

Incremental Innovation Needs Infrastructure

Catalytic Innovation

Training is Crucial!

Innovation Must Be Connected with the End User

Empathy

Don't Miss the Vision!

Barriers

Decentralization

Scale of Platform, Not of Product

3D Innovation Literacy

Innovate, Discover, Develop, Deliver

Invest Time & Effort in Innovation

It is easier to teach programming to a blind person than to explain to a programmer what a blind person needs

Work with the Big Mainstream

Identify the Major Issues Worldwide, and Launch a Contest

Rethink the Role of Science and Technology

Social Innovation

Empathy

Don't Miss the Vision!
