Using the instruments of the Child Nutrition Fund, the Government of Mauritania was able to cover the costs of 100% of the RUTF needed for 2023.

Domestic Resources

How the Child Nutrition Fund can add value

What is problem?

What is our solution?

How does it work?

Who is funding it?

Low liquidity to meet surges in demand (e.g. pay for raw materials, new shifts, etc.)

Advanced Payment Facility

Allows UNICEF to pre-finance up to 70% of every RUTF order

BMGF
(\$50m committed)

UNICEF USA Bridge Fund
(\$20m committed)

Sobrato
(\$5m committed)

Low access to local banks/loans to expand production capacity

Nutrition Supplier Finance

Allows UNCDF to lend and act as guarantors for loans taken by producers from local banks

CIFF
(\$5,000,000)

Low visibility on mid-term (>12months) demand

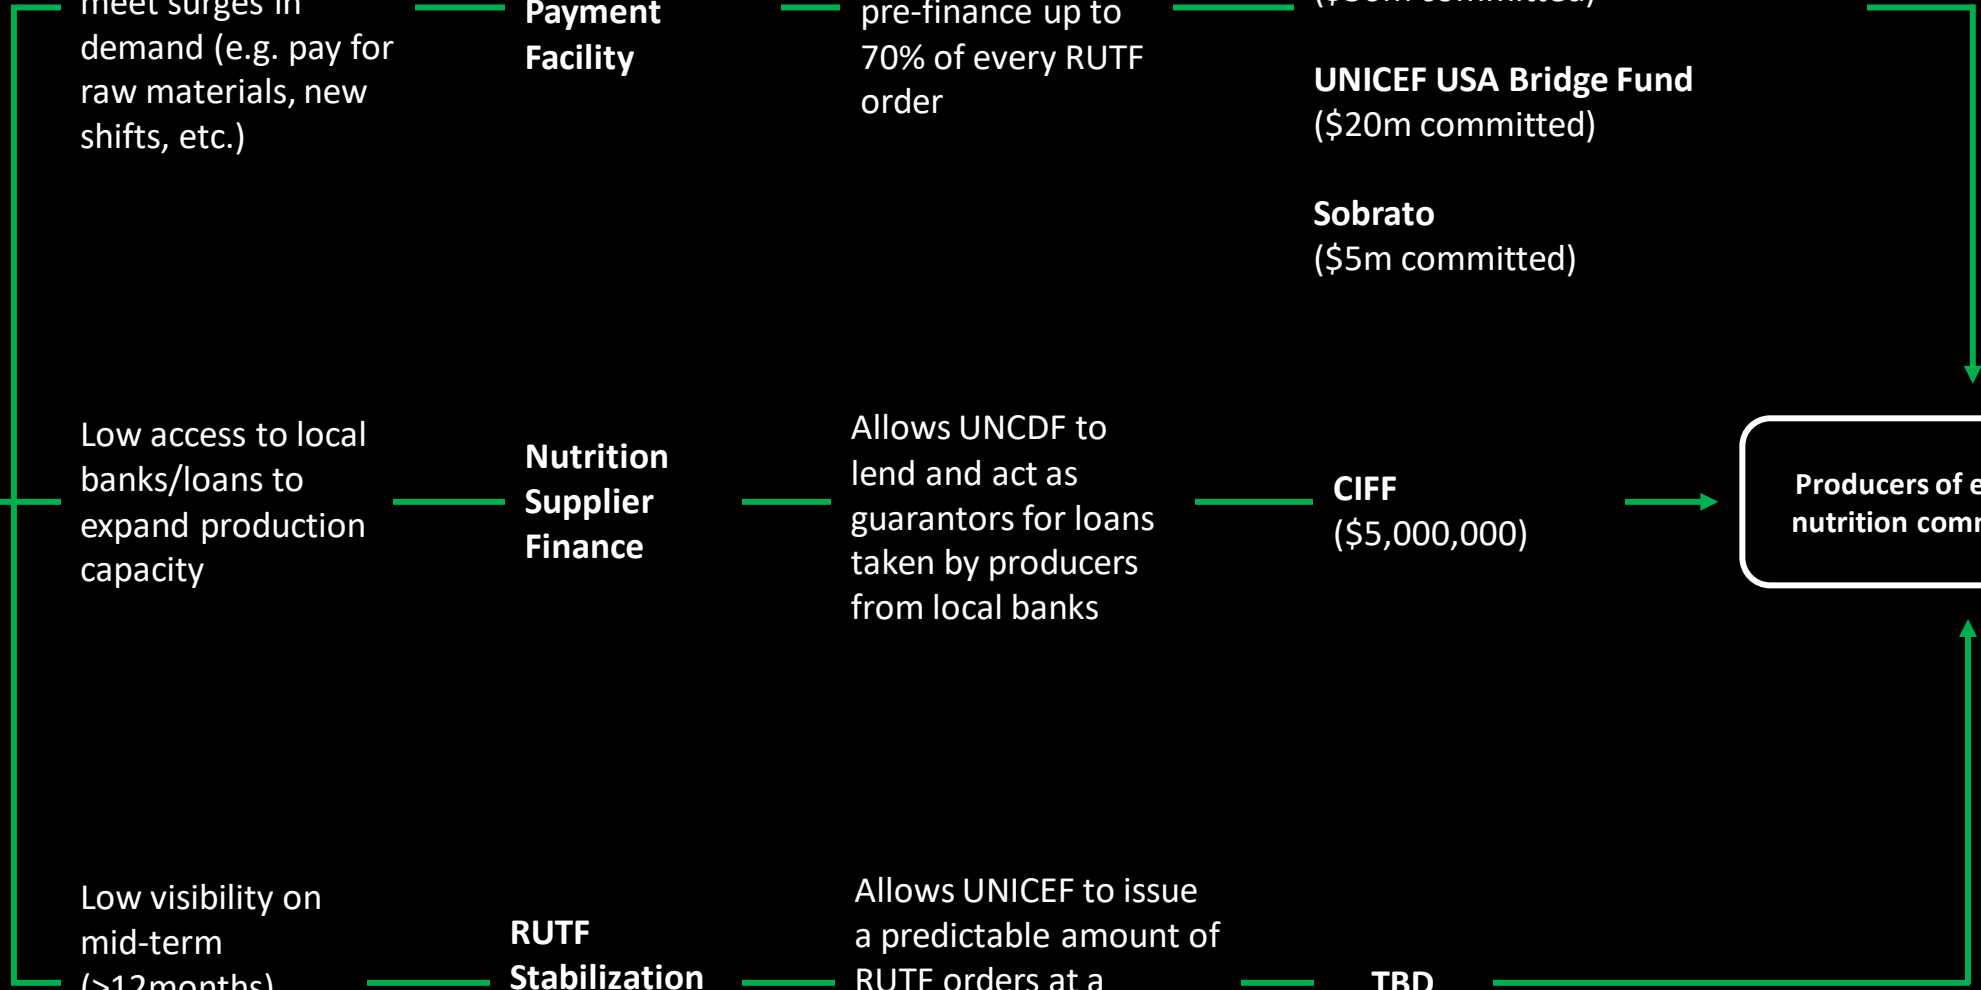

RUTF Stabilization Mechanism

Allows UNICEF to issue a predictable amount of RUTF orders at a predictable time for a predictable period

TBD

Supplier Window

Producers of essential nutrition commodities

What are the broader strategic objectives of the CNF during this inception phase (2022-2025)?

To respond to the negative impact of the global food and nutrition crisis on child nutrition in 2022-2023, the Child Nutrition Fund has focused its attention on the mobilization of resources to support the rapid scale up of essential actions for the early prevention, detection and management of child wasting in the 15 worst affected countries

2022-2023

In 2024-2025, the CNF will embark on its most ambitious goal; to work with global and national partners to mobilize higher levels of funding and re-prioritize these higher levels of funding towards essential services and supplies for the early prevention and detection of child wasting

2024-2025

The Child Nutrition Fund

a new financing mechanism designed to
accelerate the end of child wasting
