Immunization Agenda 2030
A Global Strategy to leave no one behind

Vaccine Industry Consultation – October 2020
IA2030 Sets a Unifying Vision for the Decade Aligned with the SDGs and Translated into Clear Impact Goals

**Vision**

A world where everyone, everywhere, at every age...

...fully benefits from vaccines...

...for good health and well-being

**Impact goals**

Reduce mortality and morbidity from vaccine-preventable diseases for all across the life course.

Leave no one behind, by increasing equitable access and use of new and existing vaccines.

Ensure good health and well-being for everyone by strengthening immunization within primary health care and contributing to universal health coverage and sustainable development.
IA2030 Proposes a Framework to Achieve the Vision and Impact Goals

7 Strategic Priorities including an overarching priority on immunization programmes for PHC /UHC

4 Core Principles for action

Annex on MICs
IA2030 Strategic Priorities

**SP1. Immunisation for PHC/UHC**
- Effective, efficient and resilient immunisation services are accessible to all people as an essential part of primary health care, and thereby contribute to universal health coverage.

**SP2. Commitment & Demand**
- Immunisation is valued and actively sought by all people, and health authorities commit to ensure immunisation is available as a key contributor to the enjoyment of the highest attainable standard of health as a fundamental right.

**SP3. Coverage & Equity**
- Full protection of immunisation is realized by everyone regardless of location, age, sex, socioeconomic status, or gender-related barriers.

**SP4. Life Course & Integration**
- All people benefit from recommended immunisations throughout the life course, effectively integrated with other essential health services.

**SP5. Outbreaks & Emergencies**
- Immunisation programmes can 1) anticipate, prepare for, detect, and rapidly respond to vaccine-preventable and emerging disease outbreaks, and 2) ensure immunisation service delivery during acute emergencies and among communities affected by conflict, disaster and humanitarian crisis.

**SP6. Supply & Sustainability**
- All countries have a reliable supply of appropriate and affordable vaccines of assured quality, and sustainable financing for immunisation programmes.

**SP7. Research & Innovation**
- Innovations to increase immunisation programme reach and impact are rapidly made available to all countries and communities.
Objectives

• Healthy global markets
• Financial resources for immunisation programmes
• Increased immunisation expenditure from domestic resources

Key areas of focus

A Innovation and affordability
B Vaccine forecasting, procurement and supply tailored to national needs
C Timely access to assured quality vaccines
D Supply for emergency situations
E Sufficient and predictable resources
F Immunisation financing
G Partner alignment
H Sustainable transitions from donor to domestic funding

Goal
All countries have a reliable supply of appropriate and affordable vaccines of assured quality, and sustainable financing for immunisation programmes
Goal

MICs are adequately supported such that new vaccine introductions are accelerated and sustained, and high coverage rates are maintained, including reduction of inequities in service delivery and coverage

Objectives

• Increase the number of MICs that have introduced two or more of PCV, HPV, and rotavirus vaccines and ensure no countries drop newly introduced vaccines from their schedules
• Stabilize high coverage rates in countries at risk of backsliding and reduce significant coverage inequities
• Increase financial and technical resources made available to MICs and ensure that new support is well coordinated with existing regional and global efforts

Key areas of focus – building on SPs and core principles

A Global market assessments
B Timely access to affordable and assured quality vaccines
C Supply for emergency situations
D
E Harmonized registration procedures
  New vaccine introductions
F
  • Partner alignment
G
  In country planning and decision making process
Preparing for IA2030 implementation across related elements, with ownership and accountability at the centre

Vision informs implementation

**Global strategy**
- Vision & guidance
- IA2030 Vision and Strategy
  - Core document and set of annexes sets out vision
- Technical Annexes

**Framework for Action**
- Implementation
- Regional & Country Operational Plans
  - Countries and partners review progress and are accountable for commitments towards goals
- Monitoring and Evaluation framework

**Ownership & Accountability**

**Communications**

**Advocacy & Communications**
Countries and partners can anticipate continued engagement in IA2030 implementation

Countries & partners:
- Brief Ministers on global or regional IA2030 resolutions
- Input into IA2030 workstreams
- Inform regional priorities, indicators and targets
- Consider integration of IA2030 within national strategies

Regional Partners:
- Input into IA2030 workstreams
- Support regional commitment and coordination processes
- Development of Regional IA2030
- Support integration of IA2030 within national strategies

Global partners:
- WHA endorsement and global launch
- Commit to roles and accountabilities
- Advocacy and communication for IA2030

Importance of engagement
1. Use an evidence-based approach to set global targets in consultation with regions and countries

2. Develop targets that balance aspiration & achievement by all countries
   • Tailor targets to differences in country programme maturity
   • Use absolute thresholds & proportional change, as appropriate

3. Align with other global targets (SDGs, UHC, Gavi 5.0, GPW13)
IA2030 Monitoring, Evaluation & Action Framework Overview

6 “Impact Goal” Indicators

21 “Global SP Objective indicators”

Global-Level Monitoring

Show progress to achieve IA2030 vision

Invite broad ownership of IA2030

Inspire stakeholders to act to achieve targets

Relevant across all countries

Useful for global-level stakeholders to track performance

Enable accountability & corrective actions at global level

Country- & Regional-Level Monitoring

Provide more detailed insights into root causes of success/failure

Facilitate addition of indicators tailored to needs and context

Enable accountability & corrective actions at regional & country levels
