

### JAN - DEC 2017

Total number of people reached by UNICEF health interventions

# 11.2

million

People reached in hard to reach & besieged locations by UNICEF health interventions (convoys and regular programmes)

# 2.1

million

Beneficiaries (estimated) in besieged & hard to reach areas served with essential health supplies through convoys

# 249,000

HtR locations reached

# 304

Besieged locations reached

# 14

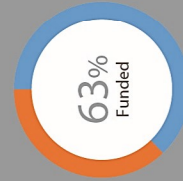

### FUNDING STATUS

# 62.7

million required

# 39.6

million available

## SITUATION ANALYSIS

- Years of conflict have severely disrupted the health system in Syria, leaving less than half of the country's facilities in full service and resulting in thousands of avoidable deaths from injury or illness.
- During 2017, the lack of sustained and predictable access to besieged and hard to reach areas continued to exacerbate needs in these areas, depriving people of essential medical services and supplies.
- In May 2017, a circulating vaccine-derived poliovirus type 2 (cVDPV2) outbreak was confirmed in Deir-Ez-Zor and Raqqa Governorates. The total number of confirmed cases reached 74 as of December.

## RESULTS

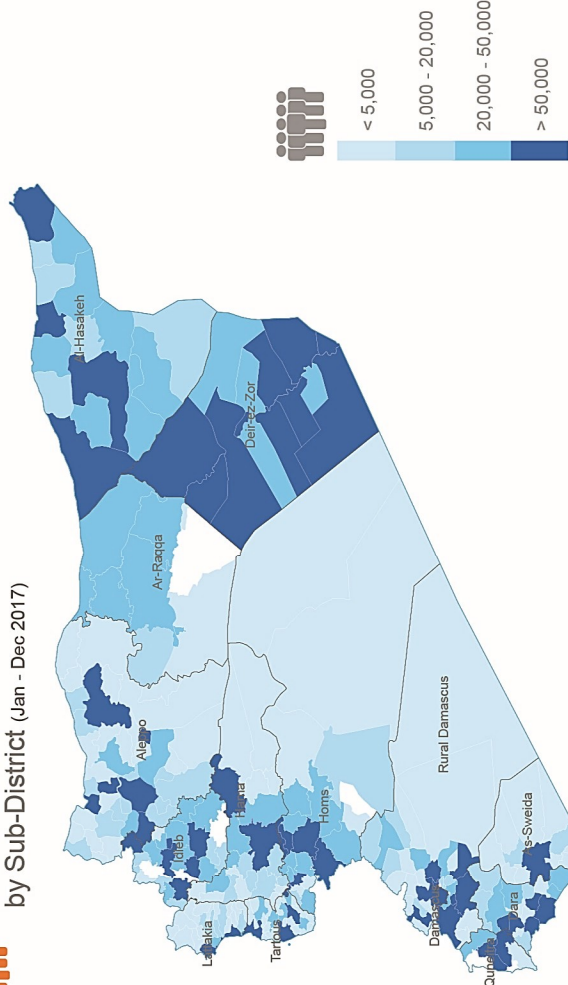

beneficiaries reached by UNICEF interventions (Jan - Dec 2017)  
 beneficiaries targeted (2017)

### INDICATORS

INDICATORS	RESULT	TARGET	% REACHED
1 Number of children under five years vaccinated through polio campaigns	2.7 m	3.3 m	83%
2 Number of children under one year reached with routine vaccination (DTP3 containing vaccine)	386,000	682,000	57%
3 Number of Primary Health Care outpatient consultations supported (children & CBA women)	3.1 m	2.1 m	148%
4 Estimated number of girls, boys, women and men reached with health supplies	2.1 m	3.2 m	64%
5 Number of care givers reached with health promotion, including immunization messages	4.1 m	3 m	136%

## PEOPLE REACHED by Sub-District (Jan - Dec 2017)

## RECENT HIGHLIGHTS

- A response plan for the cVDPV2 outbreak including two rounds of mOPV2 was implemented in Deir-Ez-Zor and Raqqah during the second half of 2017, where 350,000 children were reached each time. UNICEF stemmed the outbreak of polio in Syria, through vaccines for four rounds of mOPV2 campaigns that reached 797,489 children.
- UNICEF supported 3.1 million children and childbearing age women through free pediatric and maternal consultations through fixed health centers and mobile health teams. Critical medical supplies were distributed to over 2 million beneficiaries including people in need in hard to reach and besieged areas.
