FACTS & FIGURES
JANUARY-DECEMBER 2017

SITUATION ANALYSIS
• During 2017, access to safe water remained to be limited for much of the population, with increased water quality assurances necessary to ensure the population had continuous access to safe water.
• Alternate water supply services and WASH supplies are available but relatively expensive, that pushed vulnerable families to adopt unsafe coping strategies.
• People in besieged areas and newly accessible areas lacked sufficient access to critical WASH services and critical WASH supplies.

Many of the UNICEF WASH interventions are regular and sustained support which require predictable funding over the year, while results are achieved through need-based funding to be maintained over the year.

PEOPLE REACHED by Sub-District (Jan - Dec 2017)

FUNDING STATUS
83.0 million required
57.6 million available

69% Funded

RECENT HIGHLIGHTS
• As a direct result of investments in clean water, hygiene, and sanitation, there were no major disease outbreaks or water borne diseases in 2017.
• UNICEF’s support to the provision of over 6,000 metric tons of water disinfectant supported over 14 million people to have access to clean water every month.
• UNICEF improved access to clean water and sanitation for children in northern Syria by investing in the rehabilitation of water systems.
