

# Ukraine Humanitarian Situation Report No.17

unicef for every child

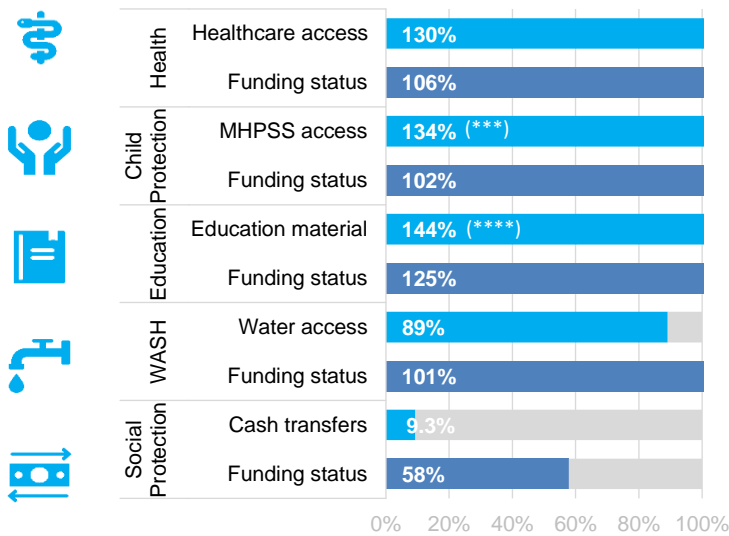

## Situation in Numbers

- 3 million\*** Children in need inside Ukraine
- 15.7 million** People in need inside Ukraine (Ukraine Flash Appeal 2022, April revision)
- 6.27 million** Internally displaced people (IOM Ukraine Internal Displacement Report, General Population Survey, Round 6, 23 June 2022)
- 1.65 million** Children targeted by UNICEF response in Ukraine from March to August 2022 (HAC April 2022)

## Highlights

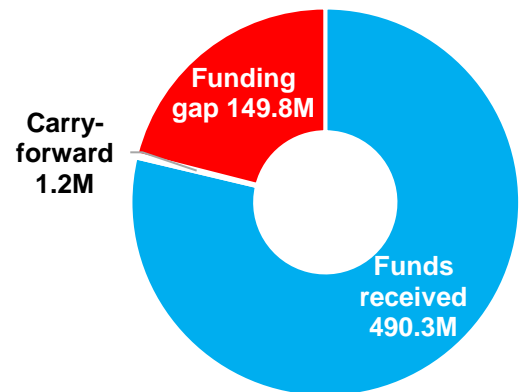

- Intense fighting continues in the Donbas in eastern Ukraine while strikes in numerous locations across the country, including Odessa and Mykolaiv, continue to cause widespread damage.
- Since 24 February, 3,890,177 people in Ukraine have been able to access health care as a result of supplies distributed, either directly by UNICEF or in partnership with implementing organizations. In addition, 3,182,064 people were provided with access to safe drinking water and 398,942 people received critical water, sanitation and hygiene supplies.
- Since 24 February, UNICEF-supported mental health and psychosocial support (MHPSS) interventions have reached 1,339,879 children and caregivers while 60,554 children and their families have benefited from specialized services through case management and referral to support services. Additionally, 50,236 women and children have so far been reached by UNICEF-supported gender-based violence prevention, risk mitigation and response services.
- Since 24 February, 288,853 children have benefited from learning interventions with supplies provided by UNICEF and 402,016 children have been engaged in formal or non-formal education.
- A total of 169,294 individuals (104,355 children) living in 35,284 households have been reached by multi-purpose cash assistance.

## UNICEF Response and Funding Status

## UNICEF Appeal 2022 US\$624 million\*\*

Funding status as of 11 July

\*\*\* This result has been changed from 'Case management' to 'MHPSS access' to reflect the highest target of Child Protection. MHPSS stands for 'mental health and psychosocial support'.

\*\*\*\* This result is calculated on the basis of the average # of children that can be covered by ECD and recreation kits, and/or learning materials (taking into account single-time use even through kit contents can be used multiple times, to avoid double counting of children).

\*Children in need is UNICEF estimation out of PIN/UNOCHA, April 2022.  
 \*\* Revised funding requirement under Pillar 1 (Ukraine) of UNICEF's revised HAC (April 2022).  
 The figures reported to the FTS may differ for the same period due to exchange rate fluctuations, recovery cost estimates, as well as in-process allocation of flexible funding.

## Funding Overview and Partnerships

UNICEF has received US\$491.3 million for its response inside Ukraine out of the US\$624.2 million total funding requirement under Pillar 1 (Ukraine) in its revised 2022 [Ukraine and Refugee Outflow Humanitarian Action for Children \(HAC\)](#) appeal (March–August 2022).<sup>1</sup>

Generous contributions have come from the people and Governments of Austria, Belgium, Czech Republic, Denmark, Germany, Iceland, Italy, Ireland, Japan, the Republic of Korea, Liechtenstein, Norway, Poland, Slovenia, Spain, Switzerland, Thailand, the United States of America, USAID Bureau for Humanitarian Assistance (BHA), the European Commission, and the United Nations Central Emergency Response Fund (CERF).

Ongoing fundraising campaigns by UNICEF National Committees and country offices have generated timely, and 87 per cent flexible support from the private sector including from corporate partners, foundations, philanthropy partners and individual donors, with actual funds already remitted amounting to US\$507.8 million. Private sector support has been unprecedented with donations received from over 620 businesses, 203 philanthropy partners, 108 foundations and a large base of individual donors across over 24 countries. Some prominent private sector donors and partners who have made significant contributions include BP, Epic Games, ING Netherlands, Capgemini, Visa International, Lego Foundation, Google, Axa, Hitachi, Heartland, Formula One, Daichi Sank, United Internet, Action, Ericsson, BMW, Daimler Trucks, Mercedes-Benz Grand Prix and Olam Group, SHO Partners, Akelius, Blackstone Charitable Foundation, Aeon Corporate Ltd and Co-op Deli Consumers Cooperative Union, Lund Trust, Apple, Google, ING, Binance Blockchain Charity Foundation and Ikea.

UNICEF continues to work with the Government of Ukraine, United Nations agencies, civil society organizations (CSOs)/non-governmental organisations (NGOs) and other humanitarian partners. Close consultations are also being held with Presidential advisors, key ministries (Foreign Affairs; Social Policy; Education; Youth; and Health), and mayors in several cities (including through Child and Youth Friendly Cities) and the Ombudspersons Office. Through its long-standing presence in Ukraine, UNICEF has established partnerships in key hromadas (municipalities) and will continue to expand these in all oblasts (regions). Around 92 government and civil society partners have been engaged with UNICEF to respond to the critical needs of children and families across Ukraine.

## Situation Overview & Humanitarian Needs

As the war in Ukraine continues, intense fighting persists in the east in the Donbas. Strikes in numerous locations across the country, including Odessa and Mykolaiv, continue to cause widespread damage. Ukraine has been added to the Secretary-General Annual Report on Children and Armed Conflict as situations of concern.

With nearly 6.3 million internally displaced people and close to 5.5 million returnees (with 74 per cent indicating they intend to stay) in Ukraine,<sup>2</sup> UNICEF and humanitarian partners are analyzing the latest data to inform the scale-up of response priorities and planning, looking at the geographic dispersion of population movement and coverage versus gaps therein, and are additionally using this information to inform winter preparedness.

UNICEF continues to scale up operational presence across the country. As of 1 July 2022, the United Nations relocation status for Kyiv and Odesa was lifted.

## Humanitarian Leadership, Coordination and Strategy

UNICEF is working closely with United Nations agencies, the government, and humanitarian partners under the inter-agency framework. UNICEF leads/co-leads the Water, Sanitation and Hygiene (WASH), Child Protection, Nutrition and Education clusters, the Social Protection sub-group under the Cash Working Group and the Maternal Child Health Care sub-group under the WHO-led Health Cluster.

- **The Child Protection Area of Responsibility (sub-cluster):** The sub-cluster set up Dnipro area-based coordination, and in Lviv, agreed with the Lviv regional Service for Children's Affairs to launch Lviv area-based Child Protection sub-cluster coordination meetings soon. A recent national-level sub-cluster coordination meeting was dedicated to the discussion of humanitarian case management where existing mechanisms and approaches were presented, as well as updates on the state sector's resource and capacity gaps and needs.
- **Nutrition Cluster:** 38 health workers and national and international NGO representatives attended a five-day training for programme managers on infant and young child feeding in emergencies.
- **Education Cluster:** With the support of the Ministry of Education and Science and partners, sub-national engagement started in Kyiv and Dnipro. The cluster has conducted an education needs assessment for 4 May to 24 June 2022. The findings revealed that 75 per cent of students have started learning online and that 11 per cent (3,500 out of 31,347) of school and learning facilities are not available for education as they are being used to shelter internally displaced people or other purposes. The cluster and the ministry are taking measures to make these facilities available again for learning in a safe and protective environment. The partners are supporting the ministry to drive a back-to-learning campaign to improve inclusive learning for

<sup>1</sup> The revised inter-agency appeal covers March–August 2022; the UNICEF HAC for Ukraine was revised accordingly to reflect UNICEF's proportion of the revised inter-agency Flash Appeal targets and requirements.

<sup>2</sup> IOM *Ukraine Internal Displacement Report*, General Population Survey, Round 6, 23 June 2022.

conflict-affected children. To improve learning for children displaced outside of Ukraine, the cluster is engaging with refugee-hosting countries including Romania, Poland and Hungary.

- **WASH Cluster:** Analysis of available data on WASH needs in collective centres is being finalized for use in the Flash Appeal update, to flag key WASH needs and inform future assessments and monitoring in collective centres. Work relating to acute water diarrhea continues to advance in collaboration with the Health Cluster and will be carried forward within the Water Quality Working Group. Sub-national coordination meetings in Vinnytsia, Dnipro and Odessa are being facilitated by cluster focal point agencies (International Organization for Migration – IOM, Solidarités International, and International Medical Corps, respectively). In addition, in-country support from the Swiss Agency for International Development (SDC) will reinforce and give direction to support for water service providers (vodakanals).

**Three-zone humanitarian response strategy:** UNICEF continues a zonal differentiated approach to its humanitarian response in Ukraine. In the east (Zone 1), where humanitarian corridors, intense and sustained conflict, and access constraints remain, UNICEF is using rapid response teams and inter-agency humanitarian convoys, and engaging municipalities, regional and local administrations and civil society partners to implement its response. Supplies are also prepositioned therein to support children, women and other vulnerable people, including the displaced. In the central and western parts (Zones 2 and 3), which have security risks but little to no access challenges, UNICEF is using existing national systems and structures and engaging local authorities (regional, municipal) and CSOs to implement its humanitarian response. Since the war escalated, UNICEF has also increased its response capacity with personnel in Lviv, Kyiv, Dnipro, Kropyvnytskyi, Odessa, Donetsk, Luhansk, Vinnytsia, and other areas within Ukraine.

### Highlights of UNICEF's response in Zone 1, including through the Rapid Response Mechanism (RRM)

- An inter-agency exploratory mission to Mala Rohan and neighbouring villages (Kharkiv oblast) assessed WASH, protection, health, and food security needs, helping to identify the most vulnerable families with children and other categories of people in need. UNICEF will follow with delivery of critical supplies to selected settlements.
- As a part of RRM missions to prioritized hard-to-reach areas, life-saving health, protection and WASH supplies were delivered to Slovyansk, Kramatorsk, Kostiantynivka, Druzhkivka, Bakhmut, Pokrovsk, Myrnohrad, Selidove (Donetsk oblast), Kryvy Rih, Dnipro (Dnipropetrovsk oblast), and frontline hromadas in Zaporizhzhia oblast. The supplies included hygiene kits, contingency water stock, inter-agency health, midwifery and first aid kits, and nutrition items to be pre-positioned in these geographical areas. Supplies worth US\$368,683 were delivered to Zone 1 during the reporting period; UNICEF is in the process of shifting 50% of all supplies from Lviv to Zone 1.

## Summary Analysis of Programme Response

**Health and Nutrition:** Since 24 February, 3,890,177 people in Ukraine, namely children and women, have been able to access primary health care as a result of supplies distributed, either directly by UNICEF or in partnership with implementing organizations.

During the reporting period:

- UNICEF supported 236 health care facilities, including 19 maternity houses (perinatal centres) and 16 children's hospitals. Critical midwifery, obstetrics, surgical, medical and first aid kits, diagnostic and treatment equipment were distributed to 17 regions of Ukraine. A total of 773 newborn kits were distributed to maternity houses and perinatal centres to support families with newborns. In addition, 7,388 mattresses were delivered to health care facilities.
- 1,516 people, including 20 children with disabilities, 402 internally displaced children, and 386 internally displaced adults, benefited from ongoing offline and online MHPSS counseling. Ninety adolescents (74 girls and 16 boys) and 42 internally displaced people received information on sexual and reproductive health.
- 49 HIV-positive pregnant women accessed health services and received counseling and treatment in Donetsk.
- 1,718 children, including displaced children and children with disabilities, and their parents were reached with basic nutrition and non-food items.
- At the government's request, UNICEF conducted two online technical workshops on early child development, child protection, MHPSS for pregnant women and families with children under 3 years. The training reached 120 general practitioners, home-visiting nurses, paediatricians and other primary health care service providers in Zhytomyr oblast. As a result, 25,000 children will be covered by early child development services through home visits by trained health care workers.
- To strengthen the vaccine cold chain, the capacity of 1,700 local specialists was strengthened through 16 online training sessions on passive cooling equipment and temperature monitoring for vaccine transportation. A total of 25 online trainings are planned to cover each region in Ukraine.
- Health care workers, supported by UNICEF, continue visiting collective centres for internally displaced people in Lviv, Ternopil, Zakarpattia, Ivano-Frankivsk and Chernivtsi regions, providing counselling on vaccination. To date, this initiative has received 2,535 requests for vaccination.
- Four online educational events were conducted on family medicine, psychological support to children and parents during wartime, the work of the National Health Service of Ukraine, and Ukrainian journalism in the

context of war. These reached 120,000 people on Facebook and received over 2,200 views on YouTube.

**Child Protection:** Since 24 February, UNICEF-supported MHPSS interventions have reached 1,339,879 children and caregivers to help them deal with the distressing effects of war and displacement. A total of 60,554 children and their families have benefited from specialized services through case management and referral to support services, and 50,236 women and children have so far been reached by UNICEF-supported gender-based violence (GBV) prevention, risk mitigation and response services.

During the reporting period:

- 63 Rapid Response Multidisciplinary Teams (mobile teams) reached more than 37,500 beneficiaries (12,500 online) with integrated services, including 26,800 adults and 10,700 children. More than 60 per cent of beneficiaries, including 1,445 children, were referred to specialized health, social and legal services. The dissemination of child protection information reached 35,555 children and adults (including 8,948 online). In addition, 11,288 children and adults (including 3,390 online) received information on violence against children/GBV risk mitigation. A total of 2,077 violence survivors (1,698 adults and 379 children) were referred to psychosocial support (PSS), health, social worker or justice/law enforcement services and 1,820 beneficiaries (1,445 adults and 375 children) benefited from GBV/violence against children response services. Capacity building activities for 204 mobile team professionals were expanded to cover humanitarian case management.
- Regarding specialized services for child victims and witnesses of violence and implementation of the [Barnahus model](#), 34 judiciary, prosecutor, police, social service, and child affairs service specialists in Kyiv city participated in a comprehensive training on how to apply the Barnahus model, as well as multidisciplinary cooperation and child-friendly interrogation and justice process.
- 194,704 children, parents and caregivers, including 1,859 children with disabilities, were reached with PSS, supplies and other protection services through 24 Spilno Child Spots, mobile teams, social service personnel, group supervision, helpline counselling and peer-to-peer support sessions. UNICEF continued to provide protection services (emergency PSS and humanitarian case management) to 2,539 (cumulative number) beneficiaries affected by hostilities, including 1,650 children. In addition to this, 183 local professionals working in the emergency response were counselled to prevent burnout.
- More than 120,000 children and caregivers benefited from group and individual PSS activities, including in combination with sport, art and other activities, and received PSS material and guidelines on how to support distressed children and how to ensure selfcare – through online course, receiving materials and guidelines.
- 1,244 professionals (psychologists, including those from the centres of social psychological rehabilitation and schools, education professionals, judges, legal aid practitioners, advocates and others) were trained in the provision of PSS for children and caregivers.
- 7,500 children and caregivers from all regions benefited from trained professionals with enhanced capacity in PSS. In addition, 40,000 parents/caregivers received PSS material and messages developed by UNICEF, helping to build their capacity to support children in distress and to reduce their own stress.

**Education:** Since 24 February, 288,853 children have benefited from learning interventions with supplies provided by UNICEF and 402,016 children have been engaged in formal or non-formal education.

The Ministry of Education and Science, Institute of Educational Analytics, and the Ukrainian Institute of Education Development, UNICEF and partners discussed preparations for the new academic year. UNICEF, in support of the ministry, continues promoting digital education through the All-Ukrainian School Online platform. UNICEF is also providing support to the National Multi-Subject Testing, which aims to ensure fair and transparent access to tertiary education in the framework of the 2022 admission campaign.

During the reporting period:

- UNICEF and a partner trained 316 educators in Ternopil'ska and Zhytomyr'ska oblasts on life skills and MHPSS in emergencies. The trained educators delivered learning through play sessions for 6,050 children, including 51 children with disabilities and more than 100 displaced children.
- Together with a partner, UNICEF organized learning sessions for more than 2,800 children at Spilno Child Spots and other learning sites in Lviv'ska, Ivano-Frankiv'ska, and Ternopil'ska oblasts.

**Water Sanitation and Hygiene (WASH):** Since 24 February, UNICEF has ensured access to safe water for 3,182,064 people, mostly through providing water companies with water treatment chemicals and equipment but also through water trucking, bottled water distribution and supporting water availability in collective centres and other key locations. In addition, 398,942 people have been reached with WASH supplies.

UNICEF continued supporting vodokanals (water utility companies) in Kharkiv and Zhytomyr with water treatments chemicals, ensuring access to safe drinking water for city residents. In addition, the provision of water treatment chemicals started for Vinnytsya and Korosten vodokanals. Electrical equipment, PE (polyethylene) pipes and fittings were provided to Irpin vodokanal. In Lviv, UNICEF supported the water supply connection of three modular towns for internally displaced. Equipment was also provided to Kherson vodokanal, which enabled critical repairs.

During the reporting period,

- UNICEF delivered institutional hygiene kits, sanitary pads, hygiene kits, diapers, and kits for people with special needs to health care facilities and communities in Donetsk, Khersonska, Mykolaivska, Zakarpatska, Odeska, Dnipropetrovska, Zaporizka oblasts and Kyiv city, helping to improve access to critical hygiene supplies for 36,139 people. In addition, water filters, water tanks and water treatment chlorine tablets were distributed together with hygiene supplies to households and institutions.
- UNICEF continued to support access to safe drinking water and critical hygiene supplies in the most conflict-affected areas. Bottled water was distributed to 800 residents in Mariupol. Water trucking continued in Kharkiv. Hygiene kits and diapers were provided to 2,636 residents in Donetsk, Mariupol, Volnovakha and other settlements in the Donetsk area. Institutional hygiene kits and water canisters were provided to health care facilities in Donetsk, Mariupol, Makiivka, Horlivka and other cities in Donetsk oblast to improve infection prevention and control and cleaning practices. Overall, 13,313 people benefitted from this health care facility support.

**Social Protection:** The multi-purpose cash assistance programme continued delivering cash to households with children. A total of 169,294 individuals (104,355 children) living in 35,284 households have been reached by multi-purpose cash assistance. The total disbursed amount is US\$35,783,730. During the reporting period, on average, more than 2,000 households were registered in the system daily and close to 40,000 households are being processed and transferred for payment.

Expanding the system's capacity, reducing duplication and reinforcing accountability to affected populations (AAP) remains a priority. Existing agreements with local and international implementing partners are being amended. Agreements with financial service providers – Ukrposhta (postal service) and Privat Bank – are being prepared to back up the payment process and set up a system for delivering cash to the unbanked population.

Efforts are also being made to link humanitarian cash with the national social protection system in Ukraine. UNICEF co-chairs the Task Team on Social Protection with the World Food Programme under the Cash Working Group, helping to coordinate and align cash interventions by humanitarian agencies with the Ministry of Social Policy's social protection cash assistance programmes. Consultations continue with the Ministry of Digital Transformation and the Ministry of Social Policy on piggybacking on national data registration systems (DIYA and Edopomoga) for the multi-purpose cash assistance programme.

**Influencing Social Behaviour:** Irpin has become the third location in Kyiv region where a Spilno Child Spot has been opened. The child-friendly space already offers a range of services for children and caregivers, including PSS and edutainment. Over 1,000 people have visited the new spot in the reporting period. In addition, Spilno Child Spots across the country have become an effective platform for Spilno cash registration, as Spilno staff are able to disseminate information and identify eligible families.

The Spilno Creative Camp concluded in Svalyava and re-opened its doors in a new community in Zakarpattia region (Irshava). Over 2,000 children, young people and caregivers visited the Svalyava camp over the course of a month. Some 87 interactive trainings, workshops, and lectures were given by mentors from the creative sector and experts on health, hygiene, local government, security, zero-waste and other topics. During the final event, children presented video-reels, designs and interviews created by themselves under their mentors' supervision.

UNICEF has continued to roll out social and behaviour change content on social media. On 29 June, 11 targeted campaigns on breastfeeding and immunization concluded, with a cumulative reach of 10,512,387 people. The campaigns were launched through both UNICEF and Ministry of Health's channels and informed by bi-weekly social listening results. The campaigns via official channels were also complemented with relevant content disseminated through Viber and Telegram chats. In total, 875 such publications were made in June 2022, with at least 20 per cent focusing on WASH and water diarrhoea prevention messages.

The UNICEF "Child is Not Alone" website, designed to help protect children's rights during the war, has already reached 167,000 users. In the reporting period, the number of users increased by 51,000 and an English-language version of the platform was released.

The dissemination of offline content, including leaflets, brochures and posters, also continued. In the reporting period, 20,000 leaflets on humanitarian multi-purpose cash transfers were distributed to local partners and mobile teams, who work with internally displaced people. Moreover, UNICEF mobilizers have already visited over 300 internally displaced centres, providing counselling and outreach events on immunization and other topics, and disseminating over 30,000 materials on health, nutrition, parenting and cash assistance.

UNICEF expanded its mechanisms in the area of AAP. The capacity of the hotline on cash transfers has been strengthened, with the total number of operators reaching 162. Working in shifts, the operators can now process up to 7,000 inquiries per day. Additionally, the use of the KoBo tool for both social listening and feedback collection has been improved. In the reporting period, UNICEF mobilizers and Spilno Child Spot staff collected over 800 feedbacks from caregivers, both in relation to UNICEF-provided services and the broader needs of the families in the context of the upcoming winter season. Coupled with focus group results, the feedback has been used to inform programmatic planning activities.

**Supply & Logistics:** Purchase Orders from the UNICEF Ukraine Country Office to the UNICEF Supply Division in Copenhagen are at US\$82.2 million. Received supplies in Ukraine warehouses (Lviv, Kyiv and Dnipro) are valued at

US\$42.2 million. US\$30.7 million worth of supplies have been released for distribution to implementing partners (approximately 236 consignees throughout Ukraine), including US\$13 million worth of supplies released during the reporting period.

**External Media:** UNICEF continues to shine the spotlight on conflict-affected children and their families in Ukraine and advocate for their safety through external and internal media outlets. The following is a selection of communication materials produced in the reporting period:

### **Human interest stories**

[Ukrainian families find a safe haven in Germany](#)

[Ukrainian teen on road to recovery after shell strike](#)

[Football helps Ukrainian children mentally recover after witnessing war](#)

[Creative classes help children in Ukraine to keep smiling](#)

\*This result is calculated based on the delivery of supplies from UNICEF to implementing partners.

\*\*This figure includes some previous results which were only reported this week.

\*\*\*Unique numbers that contacted the hotline (one number could call 1-3 times per period).

<sup>3</sup> UNICEF is discussing immunization of children with the Ministry of Health, including vaccine procurement (polio and measles); these discussions have included Supply Division colleagues on vaccine procurement.

<sup>4</sup> The indicators for nutrition will need to be revised; what UNICEF is doing is technical support to partners on infant and young child feeding and key messaging to caregivers; and provision of commodities like LNS, infant formula, baby food etc. all support the prevention of malnutrition, which are not clinical services as per the indicator measure for nutrition services. In the case of iron supplementation for pregnant women, while UNICEF has provided iron supplements to health counterparts, as per national protocols in Ukraine, iron supplementation is only given to pregnant and lactating women who are diagnosed with anemia for treatment, not as a prevention.

<sup>5</sup> The counting of numbers of children and caregivers accessing MHPSS is being reviewed by UNICEF Ukraine as per the IASC guidance on community-based MHPSS in emergency settings (2019), which has a broader view on access to MHPSS services that includes online, social channels, as well access to messages on MHPSS.

<sup>6</sup> 3.6 million is the overall education sector need, including 3.3 million children.

## Annex B: Funding Status as of 12 July<sup>7</sup>

With humanitarian needs still acute, the UNICEF HAC appeal reflects resource requirements to reach vulnerable children and families with essential services and lifesaving supplies in Ukraine. Continued, flexible contributions mean that UNICEF and partners can act quickly and respond strategically to where the needs are greatest.

Sector	Requirements	Funds available		Funding gap	
		Humanitarian resources received in 2022	Resources available from 2021 (Carry-over)	In US\$	%
Health and Nutrition	83,900,000	89,766,110	8,396	0	0%
WASH	94,500,000	95,329,554	358,670	0	0%
Child Protection, GBVIE & PSEA	59,300,000	60,669,930	687,566	0	0%
Education	31,400,000	39,188,622	121,659	0	0%
Social Protection	355,149,430	205,388,868	0	149,760,562	42%
<b>Total</b>	<b>624,249,430</b>	<b>490,343,084</b>	<b>1,176,291</b>	<b>149,760,562</b>	<b>24%</b>

<sup>7</sup> Figures reported to FTS may differ for same period due to exchange rate fluctuation, recovery cost estimates, and in-process allocation of flexible funding.
