АВРОРА як інноваційний інструмент для роботи соціальних фахівців
Innovative tool and methodology

Methodology to ensure integrated service provision (minimum package of services), consistency and quality

Innovative tool with 2 components:
– mobile application for case management
– web platform for real-time monitoring
AURORA: flow of activities

1. Field work
   • From diagnosis of already identified households with ‘invisible’ children
   • To community census

2. Raising awareness about risks and vulnerabilities
   • Using Aurora’s questionnaire
   • Generating a diagnosis of vulnerabilities
   • Strengthening child participation

3. Minimum package of integrated services
   • 7 categories of services;
   • To be performed by community professionals, ie. social worker, community health nurse, etc.
   • Community mobilization

4. Monitoring and Evaluation
   • Situation of children and families
   • For policy adjustment and development
Quality social services for families with children: space for dialogue – UNICEF for every child
