**Survey Implementation**

- **Implementing agency:** General Statistics Office of Viet Nam
- **Sampling frame:** Population Census 2019
- **Listing and mapping:** September 2020
- **Interviewer training:** October–November 2020
- **Fieldwork:** November 2020-February 2021
- **Questionnaires:**
  - Household
  - Women age 15-49
  - Men age 15-49
  - Children under 5
  - Children age 5-17
  - Water quality testing

### Response Rates

#### Household

<table>
<thead>
<tr>
<th>Sampled</th>
<th>Occupied</th>
<th>Interviewed</th>
</tr>
</thead>
<tbody>
<tr>
<td>14,000</td>
<td>13,511</td>
<td>13,359</td>
</tr>
</tbody>
</table>

#### Women age 15-49

<table>
<thead>
<tr>
<th>Eligible for interview</th>
<th>Interviewed</th>
</tr>
</thead>
<tbody>
<tr>
<td>11,294</td>
<td>10,770</td>
</tr>
</tbody>
</table>

Response rate: 95%

#### Men age 15-49

<table>
<thead>
<tr>
<th>Eligible for interview</th>
<th>Interviewed</th>
</tr>
</thead>
<tbody>
<tr>
<td>5,429</td>
<td>4,923</td>
</tr>
</tbody>
</table>

Response rate: 91%

#### Children under 5

<table>
<thead>
<tr>
<th>Eligible for interview</th>
<th>Mothers/Caretakers interviewed</th>
</tr>
</thead>
<tbody>
<tr>
<td>4,404</td>
<td>4,329</td>
</tr>
</tbody>
</table>

Response rate: 98%

#### Children age 5-17

<table>
<thead>
<tr>
<th>Eligible for interview</th>
<th>Mothers/Caretakers interviewed</th>
</tr>
</thead>
<tbody>
<tr>
<td>7,003</td>
<td>6,894</td>
</tr>
</tbody>
</table>

Response rate: 98%
### Population Characteristics

#### Household Population Age and Sex Distribution

#### Household Composition and Characteristics of Head of household

#### Women’s and Men’s Profile

#### Children’s Profile

#### Children’s Living Arrangements*

---

*Children age 0-17 years*
## Key Messages

- The response rates for households, eligible women, children 5-17 years and children under 5 are quite high (95 percent and above), while for men this is 91 percent.

- The population pyramid shows the largest proportion of the population is aged 25-49. This population dynamic indicates that Viet Nam continues to maintain a large proportion of working-age people.

- Vietnamese households are predominantly headed by men; just three in every 10 households are headed by women.

- Three in every five households have at least one child aged under 18 years. One in every four households has at least one child under age 5.

- 70 percent of women age 15-49 years are currently married or in union compared with 62 percent of men.

- 86 percent of women age 15-49 are covered by health insurance compared with 80 percent of men.

- The majority of children under 5 and children age 5-17 are covered by health insurance (about 94 percent).

- 6.6 percent of children age 0-17 are living with neither biological parent.

---

The Survey measuring Sustainable Development Goal Indicators on Children and Women (SDGCW) Viet Nam was carried out in 2020-2021 by the General Statistics Office as part of the global MICS programme of UNICEF. Technical and financial support was provided by UNICEF and UNFPA. The objective of this snapshot is to disseminate selected findings from the Viet Nam SDGCW Survey 2020-2021 related to Survey and Sample Characteristics. Data from this snapshot can be found in Tables SR.1.1, SR.5.1W, SR.5.1M, SR.5.2, SR.5.3 and SR.2.3 in the Survey Findings Report. Further statistical snapshots and the Survey Findings Report for this and other surveys are available at mics.unicef.org/surveys.
